SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
FORM 10-K

þ **ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**
For the fiscal year ended December 31, 2006

o **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**
For the transition period from __________ to __________

Commission file number 1-5263
THE LUBRIZOL CORPORATION
(Exact name of registrant as specified in its charter)

OHIO	34-0367600
(State of incorporation)	(I.R.S. Employer Identification No.)

29400 Lakeland Boulevard
Wickliffe, Ohio 44092-2298
(Address of principal executive officers, including zip code)
Registrant s telephone number, including area code: (440) 943-4200
Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Shares without par value	New York Stock Exchange
Common Share purchase rights	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Exchange Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined by Rule 405 of the Securities Act of 1933.
Yes þ No o

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Exchange Act.
Yes o No þ

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes þ No o

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant s knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):
Large accelerated filer: þ Accelerated filer: o Non-accelerated filer o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes o No þ

Aggregate market value (on basis of closing sale price) of voting stock held by nonaffiliates as of June 30, 2006: $2,722,535,900.

Number of the registrant s Common Shares, without par value, outstanding as of February 15, 2007: 69,160,429.

Documents Incorporated by Reference

Portions of the registrant s 2006 Annual Report to its shareholders (Incorporated into Part I and II of this Form 10-K)
Portions of the proxy statement for the 2007 Annual Meeting of Shareholders (Incorporated into Part III of this Form 10-K)

ITEM 1. BUSINESS

References to Lubrizol , the company , we , us or our refer to The Lubrizol Corporation and its subsidiaries, except where the context makes clear that the reference is only to The Lubrizol Corporation itself and not its subsidiaries.

Overview

We are an innovative specialty chemical company that produces and supplies technologies that improve the quality and performance of our customers products in the global transportation, industrial and consumer markets. Our business is founded on technological leadership. Innovation provides opportunities for us in growth markets as well as advantages over our competitors. From a base of approximately 1,700 patents, we use our product development and formulation expertise to sustain our leading market positions and fuel our future growth. We create additives, ingredients, resins and compounds that enhance the performance, quality and value of our customers products, while minimizing their environmental impact. Our products are used in a broad range of applications, and are sold into stable markets such as those for engine oils, specialty driveline lubricants and metalworking fluids, as well as higher-growth markets such as personal care and over-the-counter pharmaceutical products and performance coatings and inks. Our specialty materials products also are used in a variety of industries, including the construction, sporting goods, medical products and automotive industries.

We are an industry leader in many of the markets in which our product lines compete. We also produce products with well-recognized brand names, such as Anglamol® (gear oil additives), Carbopol® (acrylic thickeners for personal care products), Estane® (thermoplastic polyurethane) and TempRite® (engineered polymers resins and compounds used in plumbing, industrial and fire sprinkler systems).

We are geographically diverse, with an extensive global manufacturing, supply chain, technical and commercial infrastructure. We operate facilities in 29 countries, including production facilities in 20 countries and laboratories in 13 countries, in key regions around the world through the efforts of more than 6,700 employees. We derived approximately 45% of our consolidated total revenues from North America, 29% from Europe, 20% from the Asia/Pacific and the Middle East region and 6% from Latin America. We sell our products in more than 100 countries and believe that our customers recognize and value our ability to provide customized, high quality, cost-effective performance formulations and solutions worldwide. We also believe our customers value highly our global supply chain capabilities.

Our consolidated results for the year ended December 31, 2006 included total revenues of $4,040.8 million. We have generated consistently strong cash flows from our diverse product lines, leading market positions, disciplined capital expenditure programs and working capital management. We believe our strong cash flow will enable us to maintain our leading market positions and to invest in targeted growth strategies while continuing to reduce indebtedness.

We are organized into two operating and reporting segments. We made the final determination in January 2007 to change the names of our two reporting segments. The new segment names are Lubrizol Additives, previously known as Lubricant Additives, and Lubrizol Advanced Materials, previously known as Specialty Chemicals. The change was in name only as the management structure of the segments and product lines included in each segment remain unchanged.

Our principal executive offices are located at 29400 Lakeland Boulevard, Wickliffe, Ohio 44092-2298 and our telephone number is 440-943-4200. Our website is located at *www.lubrizol.com*. Information contained on our website does not constitute part of this Form 10-K. We make available free of charge on our website the annual report on Form 10-K, the quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 as soon as reasonably practicable after we electronically file or furnish the material to the Securities and Exchange Commission.

Acquisitions and Divestitures

On February 7, 2007, we acquired a broad line of additive products in the metalworking markets worldwide from Lockhart Chemical Company (Lockhart), a private company with headquarters in Gibsonia, Pennsylvania. We purchased Lockhart s entire metalworking product line, which includes: natural, synthetic and gelled sulfonates;

emulsifier packages; corrosion inhibitors and lubricity agents; grease additives; oxidates; esters; soap; semi-finished coatings; and rust preventatives. In 2006, these product lines had annualized revenues of approximately $20.0 million.

In May 2006, we sold the food ingredients and industrial specialties business (FIIS) and the active pharmaceutical ingredients and intermediate compounds business (A&I), both of which were included in the Lubrizol Advanced Materials segment. A&I and most of the FIIS divestiture reported in to the Noveon consumer specialties product line, while a small portion of the FIIS divestiture reported into the performance coatings product line. We recorded a $15.9 million after-tax loss on the sale of these divested businesses.

In February 2006, we sold certain assets and liabilities of Noveon International, Inc. s Telene® resins business (Telene), which was included in the Lubrizol Advanced Materials segment.

In December 2005, we sold certain assets, liabilities and stock of our Engine Control Systems (ECS) business, with facilities located in Canada, the United States and Sweden. In September 2005, we sold certain assets and liabilities of our U.S. and U.K. Lubrizol Performance Systems (LPS) operations. Both of these businesses had been included in the Lubrizol Additives segment.

On June 3, 2004, we acquired Noveon International, Inc. (Noveon International) a leading global producer and marketer of technologically advanced specialty materials and chemicals used in the industrial and consumer markets.

In January 2004, we acquired the coatings hyperdispersants business from Avecia for cash totaling $129.7 million, including transaction costs of $2.2 million. This business is included in the Lubrizol Advanced Materials segment and develops, manufactures and markets high-value additives that are used in coatings and inks.

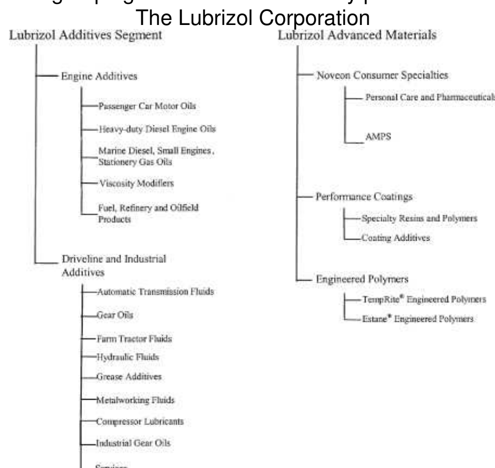
Business Segments

The Lubrizol Additives segment represents 64% of our 2006 consolidated revenues and is comprised of our businesses in engine additives and driveline and industrial additives. The Lubrizol Advanced Materials segment represents 36% of our 2006 consolidated revenues and is comprised of the businesses of the acquired Noveon International and our former performance chemicals product group.

Table of Contents

The following chart summarizes the product groupings within each of our key product lines.

The Lubrizol Corporation



Lubrizol Additives Segment

The Lubrizol Additives segment is the leading global supplier of additives for transportation and industrial lubricants. We pioneered the development of lubricant additives over 75 years ago and continue to maintain leadership in what we estimate to be an $8.0 billion industry. Our customers rely on our products to improve the performance and lifespan of critical components, such as engines, transmissions and gear drives for cars, trucks, buses, off-highway equipment, marine engines and industrial applications.

For the year ended December 31, 2006, the Lubrizol Additives segment generated revenues of $2,600.5 million and segment operating income of $306.1 million.

Our products serve to increase cost-effectiveness by reducing friction and heat, resisting oxidation, minimizing deposit formation, and preventing corrosion and wear. Through our in-house research, development and testing programs, we have the capability to invent and develop a broad range of proprietary chemical components, including antioxidants, anti-wear agents, corrosion inhibitors, detergents, dispersants, friction modifiers and viscosity modifiers. We formulate proprietary additive packages by combining these different components to create unique products targeting specific customer problems. We are recognized by our customers for innovative technology, the broadest product line and high-quality products. Our key components of our additive packages include:

antioxidants that retard oil thickening;

anti-wear agents that prevent surfaces metal-to-metal contact;

corrosion inhibitors that prevent rust;

- detergents that prevent deposit build-up;
- dispersants that protect equipment by suspending contaminant particles;
- friction modifiers that control friction at surfaces;
- polymer-based viscosity modifiers that allow lubricants to operate over broad temperature ranges; and
- pour point depressants that control low temperature fluid thickening.

Our products are essential to the performance of the finished lubricant, yet represent a relatively small portion of its volume. Our products are often designed to meet specific customer requirements. For example, we work with customers to develop additive packages that perform in combination with their proprietary base oil or that meet their marketing objectives to differentiate their lubricant. Extensive testing is conducted in our world-class laboratories, global mechanical testing facilities and in the field to determine additive performance under actual operating conditions. With this testing, we provide proof of performance, which enables our customers to label and certify the lubricant as meeting the exact performance specifications required for these products by the industry. The majority of our products are designed to meet an industry standard or specification.

During 2006, we had two primary product lines within our Lubrizol Additives segment: engine additives and driveline and industrial additives.

Engine Additives. Our engine additives products hold a leading global position for a wide range of additives for lubricating engine oils, such as for gasoline, diesel, marine and stationary gas engines. We also produce additives for fuel and refinery and oilfield chemicals. In addition, this product line sells additive components and viscosity improvers within its lubricant and fuel additives product areas. Our customers, who include major global and regional oil companies, refineries and specialized lubricant producers and marketers, blend our additive products with their base oil and distribute the finished lubricant to end users via retail, commercial or vehicle original equipment manufacturer (OEM) channels. Passenger car motor oils and diesel engine oils are approximately 80% of our engine additive sales. In 2006, our engine additives products generated total revenues of $1,665.4 million.

The following is a list of representative uses for and a description of our engine additives products:

Category	Product/Brand	Description
Engine Additives	Passenger car motor oils, heavy-duty diesel engine oils, marine diesel, small engines, stationery gas and viscosity modifiers	Additives that extend engine life, lower emissions and enhance fuel economy.
	Fuel, refinery and oilfield products and other components	Additives designed to eliminate deposits and provide fuel system cleanliness, prevent rust and corrosion, enhance fuel economy, provide anti-knock, lower volatility and improve storage stability.

Driveline and Industrial Additives. We are a global supplier of specialty driveline and industrial oil additive products for use in driveline and industrial applications. This product line also provides outsourcing services for supply chain and knowledge center management. In 2006, our driveline and industrial additives generated total revenues of $935.1 million.

Driveline Additives

Our driveline additives products include additives for driveline oils, such as automatic transmission fluids, gear oils and tractor lubricants. Relative to engine oils, specialty driveline additives are more complex formulations that carry higher average pricing and value and have longer product life cycles. We sell our products to major global and regional oil companies, specialized lubricant producers and marketers. Our customers use our products to blend with their lubricant fluids and distribute the finished lubricant to end users via retail, commercial or vehicle OEM

channels. The specialty driveline additives industry is characterized by well-established product lines that meet OEM specifications and carry OEM approvals.

Industrial Additives

Our industrial oil additives products include additives for hydraulic lubricants, metalworking fluids, industrial gear oils and grease, as well as compressor lubricants. We sell our products to major global and regional oil companies, specialized lubricant producers and marketers. Our customers use our products to blend with their fluid products and distribute the finished lubricant to end users via retail, commercial or OEM channels. Because our products are sold to industrial end-markets, our industrial oil additives products are exposed to economic cycles more than other products within the Lubrizol Additives segment.

The following is a list of representative uses for and a description of our driveline and industrial oil additives products:

Category	Product/Brand	Description
Driveline and Industrial Additives	Driveline additives for automatic transmission fluids, gear oils and farm tractor fluids	Additives that provide multiple and complex performance properties, including reducing friction in order to prevent wear of transmissions, gears and farm tractor components.
	Additives for industrial fluids, including hydraulics, metalworking, industrial gear, grease and compressor fluids	A wide range of additives to meet the lubricant performance requirements of industrial equipment.

Lubrizol Advanced Materials Segment

The Lubrizol Advanced Materials segment represents a diverse portfolio of performance chemicals used in consumer and industrial applications, such as ingredients for personal care and pharmaceutical products, emulsions and additives for coatings and inks, and specialty plastics and materials.

For the year ended December 31, 2006, the Lubrizol Advanced Materials segment generated revenues of $1,440.3 million and segment operating income of $167.6 million.

We have three primary product lines within our Lubrizol Advanced Materials segment: Noveon consumer specialties, performance coatings and engineered polymers.

Noveon Consumer Specialties. We are a global producer of specialty chemicals targeting the personal care and pharmaceutical industries. Key products include Carbopol acrylic thickeners, film formers, fixatives, emollients, silicones, botanicals and process chemicals. In 2006, our Noveon consumer specialties products generated total revenues of $373.5 million.

We are a global producer of specialty chemicals targeting the personal care and pharmaceutical industries. Our products impart physical and sensory properties, such as texture, stability and thickness to products, including lotions, shampoos, hair gels, cosmetics and personal and oral hygiene products. Key products in this area include selected functional specialties and formulation additives such as specialty surfactants, methyl glucoside and lanolin derivatives, and acrylic thickeners, specialty monomers, film formers and fixatives. Our products are an important component of the functionality and aesthetics of the end product, but typically represent a small portion of the customer s total product costs. Key product families include:

- Carbopol acrylic thickener, which is a global leader in synthetic thickeners due to its efficient stabilizing properties and superior thickening capabilities. Primary end-uses in the personal care industry include hair care, skin care and personal and oral hygiene products. Pharmaceutical primary end-uses include topical and controlled-release applications.

Methyl glucoside and lanolin derivatives that enhance the functional and aesthetic properties of personal care products by delivering characteristics such as emulsification, thickening and moisturizing, as well as imparting the elegant feel to lotions and creams.

AMPS® specialty monomers that are used in the manufacture of polymers for a variety of applications such as dishwashing detergents to reduce spotting, skin creams to improve lubricity and feel, medical gels for defibrillator pads to enhance conductivity, and coatings and adhesives to improve adhesion.

Specialty surfactants and additives that enhance the functional and aesthetic properties of personal care products and household and industrial cleaners by improving characteristics such as foaming, cleansing, conditioning and mildness. Surfactants primarily are used in hair care products, such as shampoos and body washes.

The following is a list of representative uses for and a description of our personal care and pharmaceuticals products:

Category	Product/Brand	Description
Personal Care and Pharmaceuticals	Carbopol®	Acrylic thickener, which imparts stability and improves aesthetics. Often used as a controlled release agent.
	Pemulen®	Polymeric emulsifier reducing formulation irritancy and providing unique sensory properties.
	Avalure®	Polymers for color cosmetics and skin care.
	Specialty silicones	Polymers affecting slip-and-feel.
	Fixate®	Resin for hair styling.
	Emollients	Improve skin feel and appearance.
	Botanical extracts	Specialty additives for cosmetic and skin care formulations.
	Methyl glucoside derivatives, including Glucamate®	Natural thickeners, emulsifiers and moisturizers for shampoos, liquid cleansers, face and body creams and lotions.
	Lanolin derivatives	Natural emollients, emulsifiers and conditioners for creams, lotions and color cosmetics.
	AMPS® monomers	Specialty monomer for high performance polymers.
	Specialty surfactants, including Sulfochem®	Enhance cleansing, foaming and moisturizing of shampoos, body washes and industrial and household cleaners.
	Polycarbophil	Active agent for bulk laxatives.
	Cassia gum	Gelling agents for human food (Japan) and pet food.

Performance Coatings. We are a leading supplier of specialty resins and additives for the coatings and ink markets worldwide. We offer a wide range of products for formulating paints, coatings and inks. In 2006, our performance coatings products generated total revenues of $543.7 million.

Our business strategy for performance coatings is centered on our ability to formulate and compound polymer emulsions to create customized solutions meeting the specific needs of our customers. The performance coatings product line includes high-performance polymers and additives for specialty paper, graphic arts, paint and textile coating applications.

Specialty Resins and Polymers

Our water-based polymer emulsions and dispersions, including resins and auxiliaries, are used in the production of high-end paint and coatings for wood, paper, metal, concrete, plastic, textiles and other surfaces. Our acrylic emulsions and polyurethane dispersions, which are environmentally attractive substitutes for solvent-based and hydrocarbon products, are valued for the superior gloss and durability properties they provide. In addition, our polymers are used as ink vehicles, overprint varnishes and functional coatings for specialty paper, printing and packaging applications. We supply acrylic emulsions used to improve the appearance, texture, durability and flame retardance of high-end specialty textiles sold to the home furnishings and technical fabrics industries. In addition to water-based polymers, we specialize in unique, non-aqueous acrylic and other proprietary polymer resins for the paint and coatings, printing ink, laminating, adhesives and sealants markets. These value-added Doresco® specialty resins not only function as carriers for pigment, but also provide surface protection and adhesion properties. We work closely with our customers to develop resins that address their specific needs.

The following is a list of representative uses for and a description of our resins and polymer products:

Category	Product-line	Description
Specialty Resins and Polymers	Acrylic Emulsions, Polyurethane Dispersions and Other Water-based Systems, Hycar®, Sancure®, Algan®, Performax®	Provide superior gloss and durability properties to paints and coatings. End markets include wood, paper, metal, concrete, plastic and textiles.
	Acrylic and Other Polymer Resins, Doresco®	Function as carriers for pigments, and provide surface protection and adhesion properties. End-markets include paint and coatings, printing ink, laminating, adhesives and sealants.

Coating Additives

Our additives for coatings and inks are used to enhance the appearance and durability of coatings in architectural and industrial uses, as well as to improve their processing and application characteristics. Additives such as pigment dispersants enhance the processing and performance of printing ink, while also maximizing color strength and stability in coatings and plastics. We expanded this product line by purchasing the dispersants business of Avecia in January 2004. We are a leading global supplier of surface modifiers that improve the abrasion resistance properties, gloss, leveling and film characteristics of printing ink and coatings. Our products include:

High-performance hyperdispersants for coatings, inks, thermoplastics and thermoset composites. We are a world leader in polymeric hyperdispersant technology, sold under the Solsperse® and Solplus® trade names. Hyperdispersants improve the dispersion of almost any solid particulate (including pigments, fillers, flame retardants and fibers) into almost any liquid medium (water, solvents and resins). They are primarily used to achieve even color saturation. They enrich and strengthen color, while reducing production costs and solvent emissions. We also produce Ircosperse® pigment dispersants for coatings and COLORBURST pigment dispersants for printing inks.

Surface modifiers improve the performance of industrial, architectural, can, coil, wood and powder coatings by enhancing and protecting surfaces. Lanco®, Lanco® Glidd, Lanco® Matt and Aquaslip surface modifiers impart a variety of properties to a coating, including enhanced slip, improved abrasion and scratch resistance, matting, texturing and a silky, soft feel.

Rheology control additives improve the performance of coatings by providing thickening, sag control, pigment anti-settling and improved surface appearance. Rheology control additives are sold under the brand names Ircothix®, Ircogel® and Solthix®.

Specialized additives for inks improve rub resistance properties and film characteristics.

The following is a list of representative uses for and a description of our coating additives products:

Category	Product/Brand	Description
Coating Additives	Dispersants,Solsperse® Ircosperse®, COLORBURST	Improve the dispersion of solid particulates into liquid mediums. End-markets include paints and printing inks.
	Surface Modifiers Lanco®, Lanco® Glidd, Lanco® Matt, Aquaslip	Impart a variety of properties to a coating, including enhanced slip, improved abrasion and scratch resistance, matting and texturing. End markets include industrial, architectural, can and coil, wood and powder coatings.
	Rheology Control Additives, Ircothix®, Ircogel® and Solthix®	Provide thickening, sag control and improved surface appearance of coatings.
	Specialized Additives for Inks, Duotron®, Liquitron®, Fluotron®	Improve the processing, performance and rub resistance properties.

Engineered Polymers. We are a leading global supplier of engineered polymers (EP) resins and compounds sold under the trademark TempRite. Applications for TempRite resins and compounds include piping for residential and commercial plumbing and fire sprinkler systems. In addition to TempRite, we are also a leading producer of thermoplastic polyurethane (TPU) sold under the trademark Estane. Applications for Estane TPU include plastic film and sheet for various coatings processes. In 2006, the engineered polymers product line generated total revenues of $523.1 million.

TempRite Engineered Polymers

TempRite EP is a technologically advanced heat, fire and chemical resistant polymer that we developed to serve technically demanding applications not well served by traditional PVC and other commodity plastics. Our TempRite EP is sold to customers who produce plastic piping for residential and commercial plumbing, fire sprinkler systems and industrial piping applications. TempRite EP piping has inherent advantages over copper and other metals due to its heat and corrosion resistance, increased insulation properties, mold resistance, ease of installation and lower installed cost. We market our branded TempRite EP products for specific applications: FlowGuard® and FlowGuard Gold® for residential and commercial plumbing, BlazeMaster® for fire sprinkler systems and Corzan® for industrial piping. We believe we have built strong end-user awareness of our brands by using a sales force that markets directly to builders, contractors, plumbers, architects, engineers and building owners.

In 2001, Noveon International purchased select assets and technology to manufacture PEX compounds, further used to produce PEX pipe. TempRite PEX enables us to add a flexible piping compound to our rigid piping product offering. TempRite PEX is a small but growing product for applications that demand flexible piping systems.

In January 2007, TempRite EP introduced two new piping products, FlowGuard Gold® Bendable and FlowGuard Flex. Both products are used in residential and commercial plumbing.

The following is a list of representative uses for and a description of our EP and PEX products:

Category	Product/Brand	Description
EP	TempRite®	Residential plumbing
	FlowGuard®	Residential and commercial plumbing
	FlowGuard Gold®	Residential and commercial plumbing
	Corzan®	Industrial and commercial piping
	BlazeMaster®	Fire sprinkler piping
PEX	TempRite®	Flexible piping systems

Estane Engineered Polymers

Estane TPU, an engineered, highly versatile thermoplastic, provides a high performance alternative to rigid plastics and flexible rubber. Performance attributes of Estane TPU include abrasion, heat and chemical resistance, minimal fatigue from bending, ease of processing and good paintability. These performance characteristics make Estane TPU attractive for use in a broad range of end-uses, including film and sheet for various coating processes, wire and cable insulation, athletic equipment (such as footwear), medical applications, pneumatic tubing and automotive molded parts. In addition, Estane TPU has expanded into products that can be melt spun into elastic spandex fibers and materials that offer enhanced breathability for garments. We believe that Estane TPU is one of the industry s leading brand names. We also market Stat-Rite® conductive polymers, which are static dissipative materials used in packaging for the electronics industry. In addition, we market fiber-reinforced TPU under the Estaloc® brand. Estaloc reinforced engineering thermoplastics offer the functional properties of traditional TPU, yet are reinforced for higher stiffness to provide the strength, dimensional stability and impact resistance required to withstand a variety of tough applications and harsh environments. Applications include sporting goods, agricultural equipment and other mechanical components.

The following is a list of representative uses for and a description of our Estane engineered polymers products:

Category	Product/Brand	Description
TPU	Estane®	Aromatic grades for film and sheet, wire and cable insulation, athletic equipment, medical applications, pneumatic tubing, automotive molded parts and adhesives.
	Estaloc®	Automotive trim, sporting goods, agricultural equipment and other mechanical components.
	Stat-Rite®	Packaging of semiconductors, sensitive electronic components, disk drive heads and cell phone components.
	Tecoflex®	Aliphatic grades for optical film, medical tubing and general industrial applications.

Competition

Our Lubrizol Additives segment is highly competitive in terms of price, technology development, product performance and customer service. Our principal competitors, both in the United States and overseas, are: Infineum, a joint venture involving Shell Oil Company and Exxon Mobil Corporation; Chevron Oronite Company, a subsidiary of Chevron Corporation; and Afton Chemical Corporation, a subsidiary of NewMarket Corporation (formerly Ethyl Corporation). Petroleum companies also produce, either directly or indirectly, lubricants and fuel additives for their own use and also sell additives to others. These petroleum companies also are our customers, and some of them sell raw materials to us. We believe, based on volume sold, that we are a leading supplier of performance additives for lubricants to the petroleum industry.

Our Lubrizol Advanced Materials segment faces a variety of competitors in each of our product lines, but we believe no single company competes with us across all of our existing product lines. The advanced materials industry is highly fragmented. Individual products or service offerings compete on a global, regional and local level due to the nature of the businesses and products, as well as the applications and customers served. The following chart sets forth our principal competitors of the Lubrizol Advanced Materials segment by product line:

Product Line	Principal Competitors
Noveon consumer specialties	Cognis, Croda, Degussa Goldschmidt, ISP, NK Chemicals, Rhodia, Rohm and Haas, Stepan, Sumitomo Seika, 3V Sigma, Toagosei, Vinati
Performance coatings	BASF, Bayer, Byk, Ciba, Clariant, Cytec, Dow Chemical, DSM, Eastman, OMNOVA, Parachem, Reichhold, Rohm and Haas, Tego
Engineered polymers	Atofina, BASF, Bayer, Dow, Georgia Gulf, Huntsman, Kaneka, Merquinsa, Sekisui Chemical, SK, Vanguard, Victaulic, Wirsbo

Sales and Marketing

We primarily market our lubricant and fuel additives products worldwide through our own direct sales organization. In addition, we use sales agents and distributors where necessary. Our additive customers primarily consist of oil refiners and independent oil blenders and are located in more than 100 countries. Our 10 largest customers, most of which are international oil companies and a number of which are groups of affiliated entities, accounted for approximately 39% of our consolidated net sales in 2006. In 2006, there was no single customer that accounted for more than 10% of consolidated net sales.

In order to maximize our understanding of customer needs as well as emerging trends, our sales and marketing activities for our advanced materials products are organized by end-use applications. Each sales team includes representatives from sales, marketing and research and development.

Our sales and marketing staff is technically oriented and works closely with customers to develop products and formulations that deliver the desired product attributes. Some of our laboratories are equipped with small-scale equipment that replicates our customers processing capabilities, which ensure our solutions are easily and efficiently implemented at our customers facilities.

Finally, many of our sales and marketing resources are dedicated to stimulating end-use demand for our products. For example, in the case of our TempRite plumbing, fire sprinkler and industrial piping applications, our resources are focused on marketing to building contractors, plumbers, distributors and construction code officials to convince them to specify our products in their projects or building codes.

Backlog

We have no material backlog of orders in either business segment at December 31, 2006 or December 31, 2005. All unfilled orders that were placed by December 31, 2006 are reasonably expected to be filled during 2007.

Research, Development and Technology

Technology leadership in design and formulation of additives and specialty chemicals drives our business. Historically, we have emphasized consistent investment in research. We have developed internally a large percentage of the products we manufacture and sell. Our internal technical resources encompass chemical synthesis, world-class physical and analytical science, statistical and computer modeling expertise and extensive applications technology and testing laboratories. We balance centralized research facilities with applications technology capabilities that are closely tied to their counterparts in the commercial organizations. Our technical facilities are located all over the world. We provide tools and processes for knowledge sharing and for leveraging our technology globally and across product lines.

Lubrizol Additives. In our Lubrizol Additives segment, the majority of the additives we manufacture and sell are developed by our in-house research group. Technological advances in materials and in the design of engines and other automotive equipment, combined with rising demands for environmental protection and fuel economy, require increasingly sophisticated research capabilities to meet industry performance standards.

We have technical facilities in Wickliffe, Ohio; Hazelwood, United Kingdom; and Kinuura, Japan for lubricant additives research. We also conduct a limited program of corporate research designed to leverage technology across our product lines. We maintain mechanical testing laboratories at those three locations, equipped with a variety of gasoline and diesel engines, driveline and other mechanical equipment to evaluate the performance of additives for lubricants and fuels. In addition, we make extensive use of independent research firms. Global field testing is conducted through various arrangements with fleet operators and others.

We maintain offices in Southfield, Michigan; Hazelwood, United Kingdom; Paris, France; Hamburg, Germany; Shanghai, China; Mumbai, India; Tokyo, Japan; and Seoul, South Korea to maintain close contact with the principal automotive OEMs of the world and to keep us abreast of the performance requirements for our products.

These liaison activities also serve as contacts for cooperative development and evaluation of products for future applications.

Lubrizol Advanced Materials. Our Lubrizol Advanced Materials segment has had a long history as an industry innovator, creating proprietary, high-performance materials for our customers, including ingredients for personal care products, the invention of Carbopol acrylic thickener, additives for coatings and the commercial development of TempRite engineered polymers. We have leveraged our core surface activity chemistry into new specialty chemicals and materials markets through acquisitions and application technology expertise. Our specialty chemical and materials products are derived from a broad range of technology platforms developed either internally or externally through licensing, acquisition or joint technological alliances with global suppliers and customers.

Our primary research facility for our Lubrizol Advanced Materials segment is located in Brecksville, Ohio, where we develop new technologies and products and conduct applications development and technical service for our customers. We maintain other smaller technical facilities in various locations in the United States, Europe and Asia.

Patents. We own approximately 1,700 patents worldwide relating to our products and manufacturing processes. Although these domestic and foreign patents expire from time to time, we continue to apply for and obtain patent protection for new products on an ongoing basis. We believe that, in the aggregate, our patents constitute an important asset. However, we do not regard our business as being materially dependent upon any single patent or any group of related patents. We use patents in both of our reporting segments.

Research, Testing and Development Expenditures. Our consolidated research and development expenditures were $135.3 million in 2006, $128.1 million in 2005 and $103.7 million in 2004. These amounts were equivalent to 3.3%, 3.5% and 3.6% of the respective consolidated total revenues for those years. These amounts include expenditures for the performance evaluation of additive developments in engines and other types of mechanical equipment as well as expenditures for the development of specialty chemicals for industrial applications. In addition, we spent $70.2 million, $70.8 million and $81.1 million in 2006, 2005 and 2004, respectively, for technical service (testing) activities, principally for evaluation in mechanical equipment of specific lubricant formulations designed for the needs of petroleum industry customers throughout the world.

Our research and development staff works with both our sales force and customers to use our wide spectrum of technology platforms and processing capabilities to enhance our product offerings in the specialty chemicals industry. We have developed many of our products in cooperation with our customers, often as a result of their specific needs, resulting in long-standing customer relationships.

Raw Materials

We use a broad variety of specialty and commodity chemical raw materials in our manufacturing processes, and use oil in processing and blending additives. These raw materials are obtainable from several sources. The materials that we choose to purchase from a single source generally have long-term supply contracts as a basis to guarantee supply reliability. For the most part, our raw materials are derived from petroleum and petrochemical-based feedstocks.

Lubricant base oil is our single largest purchased raw material, representing approximately 30% of our purchases, by weight, for the Lubrizol Additives segment. Other major categories of raw materials for the Lubrizol Additives segment include olefins and esters (approximately 20% of purchases); inorganic acids, bases and oxides (approximately 10%); and alcohols and glycols (approximately 5%). We believe that raw materials derived from petrochemicals are approximately 80% of our purchases for the Lubrizol Additives segment. For our Lubrizol Advanced Materials segment, no single raw material represents more than 9% of purchases. The top eight raw materials total about 40% of our purchases for the Lubrizol Advanced Materials segment. Principal raw materials for the Lubrizol Advanced Materials segment include three different acrylates for personal care and coatings, styrene for coatings, and PVC, PTMEG, MDI and BDO for engineered polymers.

Environmental Matters

We are subject to foreign, federal, state and local laws and regulations designed to protect the environment and limit manufacturing wastes and emissions. We believe that, as a general matter, our policies, practices and

procedures are properly designed to prevent unreasonable risk of environmental damage and the consequent financial liability to us. Compliance with environmental laws and regulations requires continuing management effort and expenditures. We have incurred, and will continue to incur, costs and capital expenditures to comply with these laws and regulations and to obtain and maintain all necessary permits. We believe that the cost of complying with environmental laws and regulations will not have a material affect on our earnings, liquidity or competitive position, although we cannot provide you assurance in that regard.

We believe that our business, operations and facilities are being operated in compliance, in all material respects, with applicable environmental laws and regulations, many of which provide for substantial fines, penalties and criminal sanctions for violations. The operation of manufacturing plants entails environmental risks, and we may incur material costs or liabilities in the future that could adversely affect us. For example, we may be required to comply with evolving environmental laws, regulations or requirements that may be adopted or imposed in the future or to address newly discovered contamination or other conditions or information that require a response on our part.

Among other environmental laws, we are subject to the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (commonly known as Superfund), under which we have been designated as a potentially responsible party that may be liable for cleanup costs associated with various waste or operating sites, some of which are on the U.S. Environmental Protection Agency Superfund priority list. Our experience, consistent with what we believe to be the experience of others in similar cases, is that Superfund site liability tends to be apportioned among parties based upon the contribution of materials to the Superfund site. Accordingly, we measure our liability and carry out our financial reporting responsibilities with respect to Superfund sites based upon this standard, even though Superfund site liability is technically joint and several in nature. We accrue for estimated environmental liabilities with charges to cost of sales. We believe our environmental accrual is adequate to provide for our portion of the costs of all such known environmental liabilities. Based upon consideration of currently available information, we believe liabilities for environmental matters will not have a material adverse affect on our financial position, operating results or liquidity, although we cannot provide you assurance in that regard.

Noveon International is the beneficiary of agreements with Goodrich Corporation (Goodrich) that require Goodrich to indemnify Noveon International for, among other things, certain environmental liabilities and costs relating to facilities of the former Performance Materials Segment of Goodrich. However, we cannot assure you that Goodrich or other third party indemnitors will, in the future, honor their indemnification obligations to us.

Employees

At December 31, 2006, we had approximately 6,700 employees of which approximately 53% were in the United States. We believe that our relationship with our employees is good. Three of our U.S. sites, and approximately 4% of our domestic employees, are organized by labor unions with collective bargaining agreements that are subject to periodic renegotiation. There are five agreements covering two plants expiring in 2007 and one agreement expiring in 2008. We expect to enter into new agreements with these unions as the current agreements expire.

Manufacturing and Properties

We possess global manufacturing, laboratory and sales and technical service facilities enabling us to provide customers with worldwide service and a reliable supply of products. Our corporate headquarters are located in Wickliffe, Ohio. We have manufacturing facilities and laboratories, which we own or lease, at 22 sites in the United States and approximately 41 sites in 19 other countries. We also have entered into long-term contracts for the exclusive use of major marine terminal facilities at various ports and leases for storage facilities. We maintain a capital expenditure program to support our operations and believe our facilities are adequate for our present operations and for the foreseeable future.

Geographic Area Information

Financial information with respect to our domestic and foreign operations is contained in Note 15 to our consolidated financial statements, which is included in our 2006 Annual Report to shareholders, and is incorporated herein by reference.

We supply our customers abroad through exports from the United States and from overseas manufacturing plants. We believe the political and economic risks related to our foreign operations are mitigated due to the stability of the countries in which our largest foreign operations are located.

ITEM 1A. RISK FACTORS

If any of the events contemplated by the following discussion of risks should occur, our business, results of operations and financial condition could suffer significantly. The risks described below are not the only risks that we face. Additional risks not currently known to us or that we currently deem immaterial may also impair our business.

Financial Risks

The limits imposed on us by the restrictive covenants contained in our credit facilities could prevent us from making acquisitions or capital improvements or cause us to lose access to these facilities.

Our existing credit facilities contain restrictive covenants that limit our ability to, among other things:

- borrow money or guarantee the debts of others;
- use assets as security in other transactions;
- change our business or enter into new lines of business; and
- sell assets or merge with or into other companies.

In addition, our credit facilities require us to meet financial ratios, including debt to consolidated earnings before income taxes, depreciation and amortization (EBITDA) (as defined in the credit facilities) and consolidated EBITDA (as defined in the credit facilities) to interest expense. These restrictions could limit our ability to plan for or react to market conditions or meet extraordinary capital needs and could otherwise restrict our financing activities.

Our ability to comply with the covenants and other terms of our credit facilities will depend on our future operating performance. If we fail to comply with such covenants and terms, we will be in default and the maturity of the related debt could be accelerated and become immediately due and payable. We may be required to obtain waivers from our lenders in order to maintain compliance under our credit facilities, including waivers with respect to our compliance with certain financial covenants. If we are unable to obtain any necessary waivers and the debt under our credit facilities is accelerated, our financial condition would be adversely affected.

We may not have access to capital in the future.

We may need new or additional financing in the future to expand our business or refinance existing indebtedness. If we are unable to access capital on satisfactory terms and conditions, we may not be able to expand our business or meet our payment requirements under our existing credit facilities. Our ability to obtain new or additional financing will depend on a variety of factors, many of which are beyond our control. We may not be able to obtain new or additional financing because we have substantial debt or because we may not have sufficient cash flow to service or repay our existing or future debt. In addition, depending on market conditions and our financial performance, equity financing may not be available on satisfactory terms or at all.

We could be adversely affected if our debt is downgraded.

Our ability to complete offerings of debt securities on satisfactory terms in the future will depend on the status of our credit rating. The current rating of our senior unsecured long-term indebtedness is BBB- by Standard & Poor s Ratings Group (S&P) and Baa3 by Moody s Investors Service, Inc. (Moody s). Either S&P or Moody s or both may downgrade our credit rating at any time, which would make it more difficult to complete offerings of debt securities on satisfactory terms and generally would result in increased future borrowing costs and adversely affect our access to debt and capital markets.

Risks Relating to our Business

Volatility in raw material prices could reduce our profitability and reductions in the availability of raw material supplies could disrupt our operations.

Some of the raw materials that we use are derived from petrochemical-based feedstocks, such as crude oil and natural gas, which have been subject to historical periods of rapid and significant movements in price. These fluctuations in price could be aggravated by political instability, terrorist attacks or other hostilities in oil-producing countries or elsewhere in the world, and supply and demand factors, including OPEC production quotas and increased global demand for petroleum-based products. We also use natural gas as fuel at our facilities, and increases in the price of natural gas may reduce our profitability. Any significant variations in the cost and availability of our specialty and commodity materials or energy may negatively affect our business, financial condition or results of operations. We typically do not enter into hedging arrangements with respect to raw materials or energy, other than for natural gas and electricity. We selectively pass changes in the prices of raw materials to our customers from time to time. However, we cannot always do so, and any limitation on our ability to pass through any price increases could affect our financial performance.

We use significant quantities of a variety of specialty and commodity chemicals in our manufacturing processes, such as lubricant base oils (a derivative of crude oil); C4 feedstreams; acrylates; PVC; inorganic acids, bases and oxides; alcohols, glycols and polyols; olefins and esters; sulfonates; phenates; alkylates; sulfonic acids; and amines. These raw materials generally are available from numerous independent suppliers. However, some of our raw material needs are met by a sole supplier or only a few suppliers. If any supplier that we rely on for raw materials ceases or limits production, we may incur significant additional costs, including capital costs, in order to find alternate, reliable raw material suppliers. We may also experience significant production delays while locating new supply sources.

We face competition from other chemical companies, which could adversely affect our revenue and financial condition.

We actively compete with companies producing the same or similar products and, in some instances, with companies producing different products designed for the same uses. We encounter competition in price, delivery, service, performance, product innovation and product recognition and quality, depending on the product involved. For some of our products, our competitors are larger and have greater financial resources and less debt than we do. As a result, these competitors may be better able to withstand a change in conditions within the industries in which we operate, a change in the prices of raw materials or a change in the economy as a whole.

Our competitors can be expected to continue to develop and introduce new and enhanced products, which could cause a decline in market acceptance of our products. Current and future consolidation among our competitors and customers also may cause a loss of market share as well as put downward pressure on pricing. Additionally, a number of our niche product applications are customized or sold for highly specialized uses. Our competitors could cause a reduction in the prices for some of our products as a result of intensified price competition. Competitive pressures can also result in the loss of major customers. If we cannot compete successfully, our business, financial condition and consolidated results of operations could be adversely affected.

Failure to make continued improvements in our technology and productivity could hurt our competitive position.

We believe that we must continue to enhance our existing products and to develop and manufacture new products with improved capabilities in order to continue to be a market leader. We also believe that we must continue to make improvements in our productivity in order to maintain our competitive position. When we invest in new technologies, processes or production facilities, we face risks related to construction delays, cost over-runs and unanticipated technical difficulties. Our inability to anticipate, respond to or utilize changing technologies could have a material adverse effect on our business and our consolidated results of operations.

Our and our suppliers production facilities are subject to operating risks that may adversely affect our operations.

We are dependent upon the continued safe operation of our and our suppliers production facilities. These production facilities are subject to hazards associated with the manufacture, handling, storage and transportation of chemical materials and products, including leaks and ruptures, explosions, fires, inclement weather and natural

disasters, unscheduled downtime and environmental hazards. Incidents at our or our suppliers production facilities could temporarily shut down or otherwise disrupt our manufacturing operations, causing production delays and, with respect to our facilities, resulting in liability for workplace injuries and fatalities. In addition, some of our and our suppliers production facilities are highly specialized, which limits our ability to shift production to other facilities in the event of an incident at a particular facility. If a production facility, or a critical portion of a production facility, were temporarily shut down, we likely would incur higher costs for alternate sources of supply for our products. Some of our products involve the manufacture and/or handling of a variety of reactive, explosive and flammable materials. Use of these products by our customers also could result in liability if an explosion, fire, spill or other accident were to occur. We cannot assure you that we will not experience these types of incidents in the future or that these incidents will not result in production delays or otherwise have a material adverse effect on our business, financial condition or results of operations.

Some of our businesses are cyclical and demand by our customers for our products weakens during economic downturns.

A portion of our product sales is attributable to industries and markets, such as the construction and metalworking industries, that historically have been cyclical and sensitive to relative changes in supply and demand and general economic conditions. The demand for our products depends, in part, on the general economic conditions of the industries or national economies of our customers. Downward economic cycles in our customers industries or countries may reduce sales of some of our products. It is not possible to predict accurately the factors that will affect demand for our products in the future. Any significant downturn in the health of the general economy, either globally or regionally, or the markets in which we sell products could have an adverse effect on our revenues and financial performance.

Failure to implement our common information system platform successfully could negatively impact our ability to integrate our core business processes.

In 2006 we launched a company-wide initiative to extend our current information system platform to the entire organization so that our core business processes are integrated globally. We successfully implemented a common information system platform in 1998 and now we have begun rolling out the system to the acquired Lubrizol Advanced Materials segment and to those parts of Lubrizol Additives that are not yet utilizing it. Currently, this substantial investment is progressing on schedule; we expect to have more than 75% of our revenue base utilizing the same information system platform by mid-2008 and anticipate completing the migration to our entire company by mid-2009.

We consider the risk to be low that our information system implementation may significantly disrupt our business processes and impact our ability to serve customers. We essentially are implementing an existing design of the system that has worked for the past six years in our Lubrizol Additives segment. Moreover, we have put together a seasoned project management team. However, we face the risks that the common information system platform will not be completed on a timely basis, it may cost more than projected or we may not realize its anticipated benefits.

We face numerous risks relating to our foreign operations, including foreign currency exchange rate fluctuations, exchange controls and currency devaluations, that may adversely affect our results of operations.

In 2006 approximately 33% of our consolidated revenues were generated in currencies other than the U.S. dollar, which is our reporting currency, and 31% of our consolidated cost of sales and 30% of STAR expenses were generated in currencies other than the U.S. dollar. We recognize foreign currency transaction gains and losses arising from our operations in the period incurred. As a result, currency fluctuations between the U.S. dollar and the currencies in which we do business have caused and will continue to cause foreign currency transaction gains and losses, which historically have been material and could continue to be material. We cannot predict the effects of exchange rate fluctuations upon our future operating results because of the number of currencies involved, the variability of currency exposures and the potential volatility of currency exchange rates. We take actions to manage our foreign currency exposure such as entering into hedging transactions, where available, but we cannot assure you that our strategies will adequately protect our consolidated operating results from the effects of exchange rate fluctuations.

We also face risks arising from the imposition of exchange controls and currency devaluations. Exchange controls may limit our ability to convert foreign currencies into U.S. dollars or to remit dividends and other payments by our foreign subsidiaries or businesses located in or conducted within a country imposing controls. Currency

devaluations result in a diminished value of funds denominated in the currency of the country instituting the devaluation and, if they occur or continue for significant periods, could adversely affect our earnings or cash flow.

International social, political and economic conditions may adversely affect our operating performance.

Our international operations are also subject to the risk of labor unrest, regional economic uncertainty, political instability, terrorism, expropriation of property, restrictions on the transfer of funds into or out of a country, trade restrictions, export duties, taxes and quotas, domestic and foreign customs and tariffs, and current and changing regulatory environments. Any of these events could have an adverse effect on our international operations in the future by reducing the demand for our products, increasing the prices at which we can sell our products or otherwise having an adverse effect on our operating performance.

Our production facilities are of the type that may attract terrorist attacks, and any attack may disrupt our operations and cause us to incur significant costs and liabilities.

Uncertainty surrounding the possibility and scope of terrorist attacks may affect our operations in unpredictable ways, including the possibility that our chemical production facilities may become direct targets, or indirect casualties, of terrorist attacks. Although our production facilities are under a heightened level of security, this level of security may be insufficient to prevent a terrorist attack. The resulting damage may be severe and could include loss of life and property damage. In addition, some of our production and other facilities are located at sites near to other chemical plants that may be potential targets of terrorist attacks. The resulting collateral damage may be significant and substantial. Available insurance coverage may not be sufficient to cover all of the damage incurred or may be prohibitively expensive.

Certain of our employees are covered by collective bargaining agreements, and the failure to renew these agreements could result in labor disruptions and increased labor costs.

Employees at three of our U.S. sites, who constitute approximately 4% of our domestic employees, are organized by labor unions that have collective bargaining agreements with us that are subject to renegotiation. Five agreements covering two plants expire in 2007 and one agreement expires in 2008. Although we believe that our present labor relations are satisfactory, our failure to renew these agreements on reasonable terms as the current agreements expire could result in labor disruptions and increased labor costs, which could adversely affect our financial performance.

The applicability of numerous environmental laws to our manufacturing facilities could cause us to incur significant costs and liabilities.

We are subject to extensive federal, state, local and foreign environmental, safety and health laws and regulations concerning, among other things, emissions to the air, discharges to land and water and the generation, handling, treatment and disposal of hazardous waste and other materials. Under certain environmental laws, we can be held strictly liable for hazardous substance contamination of any real property we have ever owned, operated or used as a disposal site or for natural resource damages associated with such contamination. We are also required to maintain various environmental permits and licenses, many of which require periodic modification and renewal. Our operations entail the risk of violations of those laws and regulations, many of which provide for substantial fines and criminal sanctions for violations. We cannot assure you that we have been or will be at all times in compliance with all of these requirements.

In addition, these requirements and their enforcement may become more stringent in the future. Although we cannot predict the ultimate cost of compliance with any such requirements, the costs could be significant. Non-compliance could subject us to significant liabilities, such as government fines, third-party lawsuits or the suspension of non-compliant operations. We also may be required to make significant site or operational modifications at substantial cost. Future developments also could restrict or eliminate the use of or require us to make modifications to our products, which could have a significant negative impact on our results of operations and cash flows.

At any given time, we are involved in claims, litigation, administrative proceedings and investigations of various types in a number of jurisdictions involving potential environmental liabilities, including clean-up costs associated with hazardous waste disposal sites, natural resource damages, property damage and personal injury. We

cannot assure you that the resolution of these environmental matters will not have a material adverse effect on our results of operations or cash flows.

The ultimate costs and timing of environmental liabilities are difficult to predict. Liability under environmental laws relating to contaminated sites can be imposed retroactively and on a joint and several basis. One liable party could be held responsible for all costs at a site, regardless of fault, percentage of contribution to the site or the legality of the original disposal. We may also face liability with respect to acquired businesses for violations under environmental laws occurring prior to the date of our acquisition, and some or all of these liabilities may not be covered by indemnification from the sellers from which we acquired these businesses. We could incur significant costs, including cleanup costs, natural resources damages, civil or criminal fines and sanctions and third-party claims, as a result of past or future violations of, or liabilities under, environmental laws.

If we are unable to protect our intellectual property rights, our product sales and financial performance could be adversely affected.

We rely on a combination of patent, trade secret, copyright and trademark law, nondisclosure agreements and technical security measures to protect our intellectual property rights in our various lines of business. Our performance may depend in part on our ability to establish, protect and enforce intellectual property rights with respect to our patented technologies and proprietary rights and to defend against any claims of infringement, which involves complex legal, scientific and factual questions and uncertainties.

In the future, we may have to rely on litigation to enforce our intellectual property rights and contractual rights. In addition, we may face claims of infringement that could interfere with our ability to use technology or other intellectual property rights that are material to our business operations. If litigation that we initiate is unsuccessful, we may not be able to protect the value of some of our intellectual property. In the event a claim of infringement against us is successful, we may be required to pay royalties or license fees to continue to use technology or other intellectual property rights that we have been using or we may be unable to obtain necessary licenses from third parties at a reasonable cost or within a reasonable time. If we are unable to obtain licenses on reasonable terms, we may be forced to cease selling or using any of our products that incorporate the challenged intellectual property, or to redesign or, in the case of trademark claims, rename our products to avoid infringing the intellectual property rights of third parties, which may not be possible and may be time-consuming if possible. Any litigation of this type, whether successful or unsuccessful, could result in substantial costs to us and diversions of some of our resources. Our intellectual property rights may not have the value we believe them to have, which could result in a competitive disadvantage or adversely affect our business and financial performance.

ITEM 1B. UNRESOLVED STAFF COMMENTS

We have no unresolved Securities and Exchange Commission staff comments at this time.

ITEM 2. PROPERTIES

Our corporate headquarters are located in Wickliffe, Ohio. Our commercial centers for Lubrizol Additives and Lubrizol Advanced Materials are located in Wickliffe, Ohio and Brecksville, Ohio, respectively. Our significant Lubrizol Additives segment manufacturing facilities are located in Bayport, Texas; Deer Park, Texas; Le Havre, France; Painesville, Ohio; and Rouen, France. Our significant Lubrizol Advanced Materials manufacturing facilities are located in Antwerp, Belgium; Avon Lake, Ohio; Calvert City, Kentucky; Louisville, Kentucky; and Oevel, Belgium. We have other offices and facilities around the world. The locations of our manufacturing and laboratory facilities are indicated below in the following chart.

(1) These manufacturing plants are owned and operated by joint venture companies licensed by Lubrizol.

In some cases, the ownership or leasing of these facilities is through a subsidiary or affiliate. We have entered into long-term contracts for our exclusive use of major marine terminal facilities at the Port of Houston, Texas.

In September 2006, we entered into an agreement to sell our Lubrizol Additives manufacturing plant in Bromborough, United Kingdom. The sale closed in January 2007 for a purchase price of approximately $5.9 million. Production from this U.K. facility was transferred to higher-capacity Lubrizol facilities in France and the United States. The sale of the facility will save approximately $3.0 million to $5.0 million in restructuring costs that would have been associated with the demolition of the plant facilities on the site. Cumulative pretax charges of approximately $12.8 million were incurred through 2006, of which $6.7 million were incurred in 2006, to satisfy severance and retention obligations, plant dismantling, site restoration and other site environmental evaluation costs.

We have invested approximately $15.3 million in capital related to the Bromborough plant closure through December 31, 2006 for capacity upgrades in France and the United States. We expect additional capacity upgrades through the first quarter of 2007 to total approximately $4.0 million.

We maintain a capital expenditure program to support our operations and believe our facilities are adequate for our present operations and for the foreseeable future.

ITEM 3. LEGAL PROCEEDINGS

In the fourth quarter of 2006, we received a notice of violation from the Louisville (KY) Metro Air Pollution Control District relating to alleged violations of the air permit held by our Louisville, Kentucky facility. Initial discussions with the regulators indicate that the final resolution of this matter may include a penalty greater than the applicable reporting threshold. At this time, however, we do not have sufficient information to make a reasonable assessment of the penalty.

In the third quarter of 2005, we voluntarily notified the U.S. Departments of Treasury and Commerce that an internal review of certain export transactions within the personal care and pharmaceuticals business of the Lubrizol Advanced Materials segment indicated that some exports were made that were not in compliance with current U.S. trade sanctions. We voluntarily completed a thorough review of all possibly non-complying transactions and detailed our findings in a subsequent report that was made to the government in the third quarter of 2005. While the sales involved were not substantial in relation to the company or the Lubrizol Advanced Materials segment, we consider legal compliance to be very important. In 2006, the U.S. Department of Treasury, Office of Foreign Assets Control, alleged that we violated the Iran Trading Regulations applicable to U.S. companies and persons and they fined us $5,500 for the behaviors disclosed. Separately, the U.S. Department of Commerce investigated us and issued a finding that, while the acts committed and disclosed could have been referred to the U.S. Department of Justice for criminal prosecution and/or been the basis of a monetary penalty against the company, it had closed the matter with a written warning and an order to cease and prevent offending acts in the future. We believe our self-reporting and corrective measures, including disciplinary actions taken, mitigated the penalties assessed against us.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matters were submitted to the vote of the security holders during the three months ended December 31, 2006.

EXECUTIVE OFFICERS OF THE REGISTRANT

The following sets forth the name, age, recent business experience and certain other information relative to each person who was an executive officer as of February 28, 2007.

Name	Age	Position
James L. Hambrick	52	Chairman of the Board, President and Chief Executive Officer
Joseph W. Bauer	53	Vice President and General Counsel
Donald W. Bogus	59	Senior Vice President and President Lubrizol Advanced Materials
Charles P. Cooley	51	Senior Vice President, Treasurer and Chief Financial Officer
W. Scott Emerick	42	Corporate Controller
Stephen F. Kirk	57	Senior Vice President and President Lubrizol Additives
Mark W. Meister	52	Vice President and Chief Ethics Officer
Leslie M. Reynolds	46	Corporate Secretary
Patrick Saunier	51	Vice President, Information Systems
Gregory D. Taylor	48	Vice President, Corporate Planning, Development and Communications
Jeffrey A. Vavruska	46	Chief Tax Officer
Joanne Wanstreet	55	Vice President, Investor Relations

James L. Hambrick is chairman of the board of directors, president and chief executive officer of The Lubrizol Corporation. He was elected president in January 2003, chief executive officer in April 2004 and chairman of the board effective January 3, 2005. From May 2000 to January 2003, he was vice president responsible for managing corporate strategies in the Asia Pacific region.

Joseph W. Bauer has been the vice president and general counsel of The Lubrizol Corporation since April 1992.

Donald W. Bogus became a senior vice president of The Lubrizol Corporation in July 2004 and president of the Lubrizol Advanced Materials segment in April 2004. He joined Lubrizol in 2000 as vice president responsible for the Fluid Technologies for Industry segment. He also led Lubrizol s mergers and acquisitions committee.

Charles P. Cooley is a senior vice president and the chief financial officer of The Lubrizol Corporation. He joined Lubrizol in 1998 as its chief financial officer and vice president. He was also treasurer from April 1998 to September 2001 and since September 2006. Mr. Cooley became a senior vice president in July 2004.

W. Scott Emerick joined The Lubrizol Corporation as corporate controller in June 2004. Prior to that, Mr. Emerick was at Noveon International, where he held the positions of director of finance - TempRite products from September 2003 to June 2004 and director of accounting and external financial reporting from April 2001 to September 2003.

Stephen F. Kirk became a senior vice president of The Lubrizol Corporation in July 2004 and the president of the Lubrizol Additives segment in June 2004. Previously, he was vice president of sales and marketing for Lubrizol since January 1999.

Mark W. Meister has been the vice president of human resources for The Lubrizol Corporation since 1993 and chief ethics officer since 1994.

Leslie M. Reynolds is corporate secretary and counsel for The Lubrizol Corporation. She has been counsel since February 1991. She served as assistant secretary from 1997 until her appointment as corporate secretary in April 2001.

Patrick H. Saunier became the vice president for information systems and business processes for The Lubrizol Corporation in July 2004. From 1999 to 2004, Mr. Saunier led the European shared services organization.

Gregory D. Taylor became the vice president for corporate planning, development and communications for The Lubrizol Corporation in February 2007. From 2003 to 2007, Mr. Taylor was the managing director of corporate planning for Lubrizol. From 2000-2003, he was a global business manager for Lubrizol.

Table of Contents

Jeffrey A. Vavruska joined The Lubrizol Corporation as chief tax officer in April 2004. Previously, he worked at American Greetings Corporation, where he was executive director of tax from September 2001 to April 2004.

Joanne Wanstreet was elected vice president with responsibility for global communications and investor relations for The Lubrizol Corporation in April 2002. From January 2001 to April 2002, Ms. Wanstreet was manager, investor relations.

All executive officers serve at the pleasure of the Board.

PART II

ITEM 5. MARKET FOR REGISTRANT S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

Our common shares are listed on the New York Stock Exchange under the symbol LZ. The number of shareholders of record of common shares was 3,229 as of February 15, 2007.

Information relating to the recent price and dividend history of our common shares follows:

	Common Share Price History				Dividends Per Common Share	
	2006		2005			
	High	Low	High	Low	2006	2005
1st quarter	$ 46.44	$ 41.70	$ 43.57	$ 35.25	$ .26	$ .26
2nd quarter	45.20	38.52	44.51	36.74	.26	.26
3rd quarter	46.25	38.03	44.50	39.12	.26	.26
4th quarter	50.75	44.16	44.16	39.83	.26	.26
					$ 1.04	$ 1.04

We have no restrictions on the payment of dividends on Lubrizol common shares.

On October 2, 2006, 235 common shares were issued in a private placement transaction exempt from registration under the Securities Act of 1933 pursuant to Section 4(2) of that Act. We issued the common shares to a former officer under a deferred compensation plan for officers.

On December 1, 2006, 193 common shares were issued in a private placement transaction exempt from registration under the Securities Act of 1933 pursuant to Section 4(2) of that Act. We issued the common shares to a former officer under a deferred compensation plan for officers.

The following table provides information regarding our purchases of Lubrizol common shares during the quarter.

Period	Total Number of Shares (or Units) Purchased[1]	Average Price Paid per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet be Purchased Under the Plans or Programs
Month #1 (Oct. 1, 2006 through Oct. 31, 2006)	0 Shares	N/A	N/A	N/A
Month #2 (Nov. 1, 2006 through Nov. 30, 2006)	12,267 Shares	$ 47.84	N/A	N/A
Month #3 (Dec. 1, 2006 through Dec. 31, 2006)	0 Shares	N/A	N/A	N/A
Total	12,267 Shares			

[1] This column represents common shares that we purchased pursuant to:

(a) our option plan, whereby participants exchange already owned shares to us to pay for the exercise price of an option or whereby we withhold shares upon the exercise of an option to pay the withholding taxes on behalf of the employee.

(b) our deferred compensation plans, whereby we withhold shares upon a distribution to pay the withholding taxes on behalf of the employee.

Performance Comparisons

The following chart compares our combined total shareholder returns for the five years ended December 31, 2006 to the combined total shareholder returns of the Standard & Poor s 500 Index and the Standard & Poor s Chemicals Industry.

We have selected the Standard & Poor s 500 Index, because we believe it provides a broad equity market comparison and is widely used for comparison by our peer group. We believe we have a peer group relationship with companies in the Standard & Poor s Chemicals Industry.

No single peer index or peer company is comparable totally to our business. Included in the Standard & Poor s Chemicals Industry are companies that supply specialty chemicals and other related products to a wide variety of markets. Some of our direct competitors are chemical divisions that represent small portions of large oil companies. These chemical divisions are not included in the peer comparison because information is not available to us that shows those divisions separately from the parent company.

	12/01	12/02	12/03	12/04	12/05	12/06
The Lubrizol Corporation	100.00	89.77	98.98	115.83	139.99	165.43
S&P Chemicals Industry	100.00	96.97	123.06	148.05	147.91	171.48
S&P 500	100.00	77.90	100.24	111.15	116.61	135.03

The above chart assumes the investment of $100 on December 31, 2001 and the immediate investment of all dividends.

ITEM 6. SELECTED FINANCIAL DATA

The summary of selected financial data for each of the last five years included in the Historical Summary contained on pages 56-57 of our 2006 Annual Report to shareholders is incorporated herein by reference.

Total debt reported in the Historical Summary includes the following amounts classified as long-term at December 31: $1,538.0 million in 2006, $1,662.9 million in 2005, $1,964.1 million in 2004, $386.7 million in 2003 and $384.8 million in 2002.

ITEM 7. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The Management s Discussion and Analysis of Financial Condition and Results of Operations, including the information appearing under the heading Cautionary Statements for Safe Harbor Purposes, contained on pages 11 through 27, inclusive, of our 2006 Annual Report to shareholders is incorporated herein by reference.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information appearing under the heading Quantitative and Qualitative Disclosures about Market Risk contained on page 27 of our 2006 Annual Report to shareholders is incorporated herein by reference.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Our consolidated financial statements, together with the report of the independent registered public accounting firm relating thereto, contained on pages 30 through 55, inclusive, of our 2006 Annual Report to shareholders, and the Quarterly Financial Data (Unaudited) contained on page 55 of the 2006 Annual Report to shareholders, are incorporated herein by reference.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

At the end of the period covered by this annual report (December 31, 2006), we carried out an evaluation, under the supervision and with the participation of the company s management, including our chief executive officer and chief financial officer, of the effectiveness of our disclosure controls and procedures, as such term is defined in Rule 13a-15(e) of the Securities Exchange Act of 1934 (the Exchange Act). Based on that evaluation, our chief executive officer and chief financial officer concluded that as of the end of such period, our disclosure controls and procedures were effective and designed to ensure that all material information required to be disclosed by the company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the SEC and that such information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in our internal control over financial reporting identified in the evaluation described in the preceding paragraph that occurred during the fourth quarter of 2006 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management s report on internal control over financial reporting and the report of the independent registered public accounting firm relating thereto are contained on pages 28 and 29, inclusive, of our 2006 Annual Report to shareholders and are incorporated herein by reference.

Table of Contents

ITEM 9B. OTHER INFORMATION

Not applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information contained under the headings Election of Directors and Section 16(a) Beneficial Ownership Reporting Compliance of our proxy statement for the 2007 Annual Meeting of Shareholders is incorporated herein by reference. Information relative to executive officers is contained under Executive Officers of the Registrant in Part I of this Annual Report on Form 10-K. Information regarding the identification of a financial expert on the Audit Committee contained under the heading Audit Committee in our proxy statement for the 2007 Annual Meeting of Shareholders is incorporated herein by reference.

We have a code of ethics, entitled the Ethical and Legal Conduct Guidelines, that applies to our directors and all employees, including our chief executive officer, chief financial officer and controller. The Ethical and Legal Conduct Guidelines are posted at the company overview area of our website, *www.lubrizol.com*.

ITEM 11. EXECUTIVE COMPENSATION

The information relating to executive compensation contained under the headings Director Compensation, Executive Compensation, Board Committees Organization and Compensation Committee and Board Committees Compensation Committee Report in our proxy statement for the 2007 Annual Meeting of Shareholders is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information relating to security ownership set forth under the heading Share Ownership of Directors, Executive Officers and Large Beneficial Owners in our proxy statement for the 2007 Annual Meeting of Shareholders is incorporated herein by reference.

The following table gives information about our common shares that may be issued under the company s equity compensation plans as of December 31, 2006.

Plan Category	Number of Securities to be Issued upon Exercise of Outstanding Options, Warrants and Rights	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance under Equity Compensation Plans (excluding Securities reflected in Column (a))
Equity compensation plans approved by security holders	3,339,329	$ 32.72	3,030,401(1)
Equity compensation plans not approved by security holders	(2)	N/A	(2)
Total	3,339,329	$ 32.72	3,030,401(1)

(1) The 1991 Stock Incentive Plan was terminated with respect to future grants effective November 15, 2004. The shares shown are with respect to the 2005 Stock Incentive Plan. In addition to the shares shown, effective January 1, 2003, pursuant to grants under the 1991 Stock Incentive Plan, Donald W. Bogus, Charles P. Cooley and Stephen F. Kirk each will be issued 15,000 shares if the officer remains an

employee until January 1, 2008. There are no voting or dividend rights associated with these common shares unless and until they are issued.

(2) Under the Executive Council Deferred Compensation Plan, certain executive officers may defer any amount of their variable pay under the annual incentive pay plan. Deferred amounts are converted into share units based on the current market price of Lubrizol s common shares. There is a 25% company match. Additional share units are credited for quarterly dividends paid on Lubrizol common shares. At the end of the deferral period, which is at least

three years, common shares are issued equal to the number of share units in the participant s account. Amounts attributable to the company match credited after January 1, 2004 will be paid in cash. As of December 31, 2006, there were 92,523 share units outstanding that are payable in shares.

Prior to January 1, 2004, under the Deferred Stock Compensation Plan for Outside Directors, each director who was not a Lubrizol employee received 500 share units on each October 1st and was credited with additional share units for quarterly dividends paid on Lubrizol common shares. When a person is no longer a director, Lubrizol common shares are issued equal to the number of share units in the person s account. As of December 31, 2006, there were 35,563 share units outstanding that are

payable in shares. No additional share units other than those credited for quarterly dividends have been or will be granted after January 1, 2004.

Under the Deferred Compensation Plan for Directors, each director who is not a Lubrizol employee may defer all or any portion of his or her yearly fee and meeting attendance fees and have these amounts credited to various cash investment accounts and/or a share unit account. The number of share units credited to the share unit account is based on the price of Lubrizol common shares on the day the share units are credited to the account and includes share units credited for quarterly dividends paid on Lubrizol common shares. When a person is no longer a director, Lubrizol shares are issued equal to the number of share units in the person s share unit account. As of December 31, 2006, there were 65,454 share units

outstanding, 31,682 of which must be paid in Lubrizol shares and the remainder of which may be invested in the various cash investment accounts at the discretion of the director, and paid in cash.

Under the Senior Management Deferred Compensation Plan, each executive officer and other management participants may defer all or any portion of his or her total annual pay and have these amounts credited to various cash investment accounts and/or a share unit account. The number of share units credited to the share unit account is based on the price of Lubrizol common shares on the day the share units are credited to the account and includes share units credited for quarterly dividends paid on Lubrizol common shares. Upon the distribution date, Lubrizol common shares are issued equal to the number of share units in the person s share unit account. As of December 31,

2006, there were 67,398 share units outstanding.

Under the Supplemental Retirement Plan for Donald W. Bogus, 500 share units are credited each anniversary date of the officer s employment to an officer s account and includes share units credited for quarterly dividends paid on Lubrizol common shares. Upon retirement, Mr. Bogus may elect to receive cash or Lubrizol shares equal to the number of share units in the account. As of December 31, 2006, there were 2,336 share units outstanding that could be paid in shares. For units credited after January 1, 2004, the payment will be made in cash only.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information relating to certain relationships, related transactions and director independence contained under the headings Director Independence and Related Person Transactions in our proxy statement for the 2007 Annual Meeting of Shareholders is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information included under the heading entitled Independent Registered Public Accountant Fees in our proxy statement for the 2007 Annual Meeting of Shareholders is incorporated herein by reference.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) Documents filed as part of this Annual Report:

1. The following consolidated financial statements of The Lubrizol Corporation and its subsidiaries, together with the reports of the independent registered public accounting firm relating thereto, contained on pages 28 through 55, inclusive, of our 2006 Annual Report to shareholders, and incorporated herein by reference:

   Management s Report on Internal Controls over Financial Reporting.

   Reports of Independent Registered Public Accounting Firm.

   Consolidated Statements of Income for the years ended December 31, 2006, 2005 and 2004.

   Consolidated Balance Sheets at December 31, 2006 and 2005.

   Consolidated Statements of Cash Flows for the years ended December 31, 2006, 2005 and 2004.

   Consolidated Statements of Shareholders Equity for the years ended December 31, 2006, 2005 and 2004.

   Notes to Financial Statements.

2. Schedule

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

TO THE SHAREHOLDERS AND BOARD OF DIRECTORS OF
THE LUBRIZOL CORPORATION

We have audited the consolidated financial statements of The Lubrizol Corporation and subsidiaries (the Company) as of December 31, 2006 and 2005, and for each of the three years in the period ended December 31, 2006, management s assessment of the effectiveness of the Company s internal control over financial reporting as of December 31, 2006, and the effectiveness of the Company s internal control over financial reporting as of December 31, 2006, and have issued our reports thereon dated February 28, 2007 (which report relating to the consolidated financial statements expresses an unqualified opinion and includes an explanatory paragraph regarding the Company s adoption of new accounting standards in 2006); such consolidated financial statements and reports are included in your 2006 Annual Report to Shareholders and are incorporated herein by reference. Our audits also included the consolidated financial statement schedule of the Company listed in Item 15. This consolidated financial statement schedule is the responsibility of the Company s management. Our responsibility is to express an opinion based on our audits. In our opinion, such consolidated financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

Exhibit 10.26

INDEMNIFICATION AGREEMENT

This Agreement made this ___th day of ___, ___, between The Lubrizol Corporation, an Ohio corporation (the Company) and ___, a director, officer, employee or representative (as hereinafter defined) of the Company (the Indemnitee);

WHEREAS, the Company and the Indemnitee are each aware of the exposure to litigation of directors, officers, employees and representatives of the Company as such persons exercise their duties to the Company;

WHEREAS, the Company and the Indemnitee are also aware of conditions in the insurance industry that have affected and may continue to affect the Company s ability to obtain appropriate liability insurance on an economically acceptable basis;

WHEREAS, the Company desires to continue to benefit from the services of highly qualified, experienced and otherwise competent persons such as the Indemnitee;

WHEREAS, the Indemnitee desires to serve or to continue to serve the Company as a director, officer, employee and/or as a director, officer, trustee or other fiduciary of another corporation, joint venture, trust or other enterprise in which the Company has a direct or indirect ownership interest, for so long as the Company continues to provide on an acceptable basis adequate and reliable indemnification against certain liabilities and expenses which may be incurred by the Indemnitee.

NOW, THEREFORE, in consideration of the foregoing premises and the mutual covenants herein contained, the parties hereto agree as follows:

1. Indemnification

The Company shall indemnify the Indemnitee with respect to his activities as a director, officer or employee of the Company and/or as a person who is serving or has served on behalf of the Company (representative) as a director, officer, trustee or other fiduciary of another corporation, joint venture, trust or other enterprise, domestic or foreign, in which the Company has a direct or indirect ownership interest (an affiliated entity) against expenses (including, without limitation, attorneys fees, judgments, fines, and amounts paid in settlement) actually and reasonably incurred by him (Expenses) in connection with any claim against Indemnitee which is the subject of any threatened, pending, or completed action, suit, or proceeding, whether civil, criminal, administrative, investigative or otherwise and whether formal or informal (a Proceeding), to which Indemnitee was, is, or is threatened to be made a party by reason of facts which include Indemnitee s being or having been such a director, officer, employee or representative, to the extent of the highest and most advantageous to the Indemnitee, as determined by the Indemnitee, of one or any combination of the following:

(a) The benefits provided by the Company s Code of Regulations in effect on the date hereof, a copy of the relevant portions of which are attached hereto as Exhibit I;

(b) The benefits provided by the Articles of Incorporation, Code of Regulations, or By-laws or their equivalent of the Company in effect at the time Expenses are incurred by Indemnitee;

(c) The benefits allowable under Ohio law in effect at the date hereof;

(d) The benefits allowable under the law of the jurisdiction under which the Company exists at the time Expenses are incurred by the Indemnitee;

(e) The benefits available under liability insurance obtained by the Company; and

(f) Such other benefits as are or may be otherwise available to Indemnitee.

Combination of two or more of the benefits provided by (a) through (f) shall be available to the extent that the Applicable Document, as hereafter defined, does not require that the benefits provided therein be exclusive of other benefits. The document or law providing for the benefits listed in items (a) through (f) above is called the Applicable Document in this Agreement. Company hereby undertakes to use its best efforts to assist Indemnitee, in all proper and legal ways, to obtain the benefits selected by Indemnitee under items (a) through (f) above. For purposes of this Agreement, references to other enterprises shall include employee benefit plans for employees of the Company or of any affiliated entity without regard to ownership of such plans; references to fines shall include any excise taxes assessed on the Indemnitee with respect to any employee benefit plan; references to serving or has served on behalf of the Company shall include any service as a director, officer, employee or agent of the Company which imposes duties on, or involves services by, the Indemnitee with respect to an employee benefit plan, its participants or beneficiaries; references to the masculine shall include the feminine; references to the singular shall include the plural and vice versa; and if the Indemnitee acted in good faith and in a manner he reasonably believed to be in the interest of the participants and beneficiaries of an employee benefit plan he shall be deemed to have acted in a manner consistent with the standards required for indemnification by the Company under the Applicable Documents.

2. Insurance

The Company shall maintain directors and officers or other similar liability insurance for so long as Indemnitee s services are covered hereunder, provided and to the extent that such insurance is available on a basis acceptable to the Company. However, the Company agrees that the provisions hereof shall remain in effect regardless of whether liability or other insurance coverage is at any time obtained or retained by the Company; except that any payments in fact made to Indemnitee under an insurance policy obtained or retained by the Company shall reduce the obligation of the Company to make payments hereunder by the amount of the payments made under any such insurance policy.

3. Payment of Expenses

At Indemnitee s request, after receipt of written notice pursuant to Section 6 hereof and an undertaking in the form of Exhibit II attached hereto by or on behalf of Indemnitee to repay such

amounts so paid on Indemnitee s behalf if it shall ultimately be determined under the Applicable Document that Indemnitee is not entitled to be indemnified by the Company for such Expenses, the Company shall pay the Expenses as and when incurred by Indemnitee. That portion of Expenses which represents attorneys fees and other costs incurred in defending any Proceeding shall be paid by the Company within thirty (30) days of its receipt of such request, together with reasonable documentation (consistent, in the case of attorneys fees, with Company practice in payment of legal fees prior to a Change in Control, as hereafter defined) evidencing the amount and nature of such Expenses, subject to its also having received such a notice and undertaking.

4. Escrow

The Company shall dedicate up to an aggregate of SEVEN MILLION FIVE HUNDRED THOUSAND DOLLARS ($7,500,000) as collateral security for the initial funding of its obligations hereunder and under similar agreements with other directors, officers, employees and representatives by depositing assets or bank letters of credit in escrow or reserving lines of credit that may be drawn down by an escrow agent in the dedicated amount (the Escrow Reserve); provided, however, that the terms of any such Escrow reserve may provide that the cash, securities or letter or line of credit available therefor shall only be utilized for the indemnification or advancement of expenses provided for herein in the event that there shall have occurred within the preceding five (5) years a Change in Control of the Company, as defined below. The Company shall promptly provide Indemnitee with a true and complete copy of the agreement relating to the establishment and operation of the Escrow Reserve, together with such additional documentation or information with respect to the escrow as Indemnitee may from time to time reasonably request. The Company shall promptly deliver an executed copy of the Agreement to the escrow agent for the Escrow Reserve to evidence to that agent that Indemnitee is a beneficiary of that Escrow Reserve and shall deliver to Indemnitee the escrow agent s signed receipt evidencing that delivery. For purposes of this Agreement, a Change in Control of the Company shall have occurred if at any time during the Term (as hereafter defined) any of the following events shall occur:

(a) The Company is merged or consolidated with another corporation and as a result of such merger or consolidation less than 80% of the outstanding voting securities of the surviving or resulting corporation are owned in the aggregate by the shareholders of the Company, immediately prior to such merger or consolidation;

(b) There is a report filed on Scheduled 13D or Schedule 14D-l (or any successor schedule, form, or report) each as promulgated pursuant to the Securities Exchange Act of 1934, as amended (Exchange Act) disclosing the acquisition of 20% or more of the voting stock of the Company in a transaction or series of transactions by any person (as the term person is used in Section 13(d)(3) or Section 14(d)(2) of the Exchange Act);

(c) The Company shall file a report or proxy statement with the Securities and Exchange Commission pursuant to the Exchange Act disclosing in response to Item 1 of Form 8-K thereunder or Item 5(f) of Schedule 14A thereunder (or any similar item of a successor schedule, form or report) that a Change in Control of the Company has or may have occurred or will or may occur in the future pursuant to any then-existing contract or transaction; or

(d) During any period of twenty-four (24) consecutive months, individuals who at the beginning of any such period constitute the directors of the Company cease for any reason to constitute at least a majority thereof unless the election, or the nomination for election by the Company s shareholders, of each new director of the Company was approved by a vote of at least two-thirds of the directors of the Company then still in office who were directors of the Company at the beginning of any such period.

5. Additional Rights

The indemnification provided in this Agreement shall not be exclusive of any other indemnification or right to which Indemnitee may be entitled and shall continue after Indemnitee has ceased to occupy a position as an officer, director, employee or representative as described in Paragraph 1 above with respect to Proceedings relating to or arising out of Indemnitee s acts or omissions during his service in such position.

6. Notice to Company

Indemnitee shall provide to the Company prompt written notice of any Proceeding brought, threatened, asserted or commenced against Indemnitee with respect to which Indemnitee may assert a right to indemnification hereunder; provided that failure to provide such notice shall not in any way limit Indemnitee s rights under this Agreement.

7. Cooperation in Defense and Settlement

Indemnitee shall not make any admission or effect any settlement without the Company s written consent unless Indemnitee shall have determined to undertake her own defense in such manner and has waived the benefits of this Agreement. The Company shall not settle any Proceeding to which Indemnitee is a party in any manner which would impose any Expense on Indemnitee without his written consent. Neither Indemnitee nor the Company will unreasonably withhold consent to any proposed settlement. Indemnitee and the Company shall cooperate to the extent reasonably possible with each other and with the Company s insurers, in attempts to defend and/or settle such Proceeding.

8. Assumption of Defense

Except as otherwise provided below, to the extent that it may wish, the Company jointly with any other indemnifying party similarly notified will be entitled to assume Indemnitee s defense in any Proceeding, with counsel mutually satisfactory to Indemnitee and the Company. After notice from the Company to Indemnitee of the Company s election so to assume such defense, the Company will not be liable to Indemnitee under this Agreement for Expenses subsequently incurred by Indemnitee in connection with the defense thereof other than reasonable costs of investigation or as otherwise provided below. Indemnitee shall have the right to employ counsel in such Proceeding, but the fees and expenses of such counsel incurred after notice from the Company of its assumption of the defense thereof shall be at Indemnitee s expense unless:

(a) The employment of counsel by Indemnitee has been authorized by the Company;

(b) Counsel employed by the Company initially is unacceptable or later becomes unacceptable to Indemnitee and such unacceptability is reasonable under then existing circumstances;

(c) Indemnitee shall have reasonably concluded that there may be a conflict of interest between Indemnitee and the Company in the conduct of the defense of such Proceeding; or

(d) The Company shall not have employed counsel promptly to assume the defense of such Proceeding, in each of which cases the fees and expenses of counsel shall be at the expense of the Company and subject to payment pursuant to this Agreement. The Company shall not be entitled to assume the defense of Indemnitee in any Proceeding brought by or on behalf of the Company or as to which Indemnitee shall have made either of the conclusions provided for in clauses (b) or (c) above.

9. Enforcement

In the event that any dispute or controversy shall arise under this Agreement between Indemnitee and the Company with respect to whether the Indemnitee is entitled to indemnification in connection with any Proceeding or with respect to the amount of Expenses incurred, then with respect to each such dispute or controversy Indemnitee may seek to enforce the Agreement through legal action or, at Indemnitee s sole option and request, through arbitration. If arbitration is requested, such dispute or controversy shall be submitted by the parties to binding arbitration in the City of Cleveland, State of Ohio, before a single arbitrator agreeable to both parties; provided that indemnification in respect of any claim, issue or matter in a Proceeding brought against Indemnitee by or in the right of the Company and as to which Indemnitee shall have been adjudged to be liable for negligence or misconduct in the performance of her duty to the Company shall be submitted to arbitration only to the extent permitted under the Company s Code of Regulations and applicable law then in effect. If the parties cannot agree on a designated arbitrator within 15 days after arbitration is requested in writing by either of them, the arbitration shall proceed in the City of Cleveland, State of Ohio, before an arbitrator appointed by the American Arbitration Association. In either case, the Arbitration proceeding shall commence promptly under the rules then in effect of that Association and the arbitrator agreed to by the parties or appointed by that Association shall be an attorney other than an attorney who has, or is associated with a firm having associated with it an attorney which has been retained by or performed services for the Company or Indemnitee at any time during the five years preceding the commencement of arbitration. The award shall be rendered in such form that judgment may be entered thereon in any court having jurisdiction thereof. The prevailing party shall be entitled to prompt reimbursement of any costs and expenses (including, without limitation, reasonable attorneys fees) incurred in connection with such legal action or arbitration; provided that Indemnitee shall not be obligated to reimburse the Company unless the arbitrator or court which resolves the dispute determines that Indemnitee acted in bad faith in bringing such action or arbitration.

10. Exclusions

Notwithstanding the scope of indemnification which may be available to Indemnitees from time to time under any Applicable Document, no indemnification, reimbursement or payment shall be required of the Company hereunder with respect to:

(a) Any claim or any part thereof as to which Indemnitee shall have been adjudged by a court of competent jurisdiction from which no appeal is or can be taken to have acted in willful misfeasance, or willful disregard of his duties, except to the extent that such court shall determine upon application that, despite the adjudication of liability, but in view of all the circumstances of the case, Indemnitee is fairly and reasonably entitled to indemnity for such expenses as the court shall deem proper;

(b) Any claim or any part thereof arising under Section 16(b) of the Exchange Act pursuant to which Indemnitee shall be obligated to pay any penalty, fine, settlement or judgment;

(c) Any obligation of Indemnitee based upon or attributable to the Indemnitee gaining in fact any personal gain, profit or advantage to which he was not entitled; or

(d) Any Proceeding initiated by Indemnitee without the consent or authorization of the Board of Directors of the Company, provided that this exclusion shall not apply with respect to any claims brought by Indemnitee to enforce his rights under this Agreement or in any Proceeding initiated by another person or entity whether or not such claims were brought by Indemnitee against a person or entity who was otherwise a party to such Proceeding.

Nothing in this Section 10 shall eliminate or diminish Company s obligations to advance that portion of Indemnitee s Expenses which represent attorneys fees and other costs incurred in defending any Proceeding pursuant to Section 3 of this Agreement.

11. Extraordinary Transactions

The Company covenants and agrees that, in the event of any merger, consolidation or reorganization in which the Company is not the surviving entity, any sale of all or substantially all of the assets of the Company or any liquidation of the Company (each such event is hereinafter referred to as an extraordinary transaction), the Company shall:

(a) Have the obligations of the Company under this Agreement expressly assumed by the survivor, purchaser or successor, as the case may be, in such extraordinary transaction; or

(b) Otherwise adequately provide for the satisfaction of the Company s obligations under this Agreement, in a manner acceptable to Indemnitee.

12. No Personal Liability

Indemnitee agrees that neither the Directors nor any officer, employee, representative or agent of the Company shall be personally liable for the satisfaction of the Company s obligations under this Agreement, and Indemnitee shall look solely to the assets of the Company and the escrow referred to in Section 4 hereof for satisfaction of any claims hereunder.

13. Severability.

If any provision, phrase, or other portion of this Agreement should be determined by any court of competent jurisdiction to be invalid, illegal or unenforceable, in whole or in part, and such determination should become final, such provision, phrase or other portion shall be deemed to be severed or limited, but only to the extent required to render the remaining provisions and portions of the Agreement enforceable, and the Agreement as thus amended shall be enforced to give effect to the intention of the parties insofar as that is possible.

14. Subrogation

In the event of any payment under this Agreement, the Company shall be subrogated to the extent thereof to all rights to indemnification or reimbursement against any insurer or other entity or person vested in the Indemnitee, who shall execute all instruments and take all other actions as shall be reasonably necessary for the Company to enforce such rights.

15. Governing Law

The parties hereto agree that this Agreement shall be construed and enforced in accordance with and governed by the laws of the State of Ohio.

16. Notices

All notices, requests, demands and other communications hereunder shall be in writing and shall be considered to have been duly given if delivered by hand and receipted for by the party to whom the notice, request, demand or other communication shall have been directed, or mailed by certified mail, return receipt requested, with postage prepaid:

(a) If to the Company, to: THE LUBRIZOL CORPORATION
29400 Lakeland Boulevard
Wickliffe, Ohio 44092-2298
Attention: General Counsel

(b) If to Indemnitee, to:

29400 Lakeland Boulevard
Wickliffe, Ohio 44092-2298

or to such other or further address as shall be designated from time to time by the Indemnitee or the Company to the other.

17. Termination

This Agreement may be terminated by either party upon not less than sixty (60) days prior written notice delivered to the other party, but such termination shall not in any way diminish the obligations of Company hereunder (including the obligation to maintain the escrow referred to in Section 4 hereof) with respect to Indemnitee s activities prior to the effective date of termination.

18. Amendments

This Agreement and the rights and duties of Indemnitee and the Company hereunder may not be amended, modified or terminated except by written instrument signed and delivered by the parties hereto. This Agreement is and shall be binding upon and shall inure to the benefits of the parties thereto and their respective heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the undersigned have executed this Agreement in triplicate as of the date first above written.

EXHIBIT I
LUBRIZOL S CODE OF REGULATIONS

Section 33. Indemnification

The Company shall indemnify any director or officer and any former director or officer of the Company and any such director or officer who is or has served at the request of the Company as a director, officer or trustee of another corporation, partnership, joint venture, trust or other enterprise (and her heirs, executors and administrators) against expenses, including attorney s fees, judgments, fines and amounts paid in settlement, actually and reasonably incurred by him by reason of the fact that he is or was such director, officer or trustee in connection with any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative to the full extent permitted by applicable law. The indemnification provided for herein shall not be deemed to restrict the right of the Company (i) to indemnify employees, agents and others to the extent not prohibited by such law, (ii) to purchase and maintain insurance or furnish similar protection on behalf of or for any person who is or was a director, officer, employee or agent of the Company, or any person who is or was serving at the request of the Company as a director, officer, trustee, employee or agent of another corporation, joint venture, partnership, trust or other enterprise against any liability asserted against him or incurred by him in any such capacity or arising out of her status as such, and (iii) to enter into agreements with persons of the class identified in clause (ii) above indemnifying them against any and all liabilities (or such lesser indemnification as may be provided in such agreements) asserted against or incurred by them in such capacities.

9

EXHIBIT II
FORM OF UNDERTAKING

THIS UNDERTAKING has been entered into by ______ (hereinafter Indemnitee) pursuant to an Indemnification Agreement dated _________ (the Indemnification Agreement) between The Lubrizol Corporation (hereinafter Company), an Ohio corporation and Indemnitee.

W I T N E S S E T H:

WHEREAS, pursuant to the Indemnification Agreement, Company agreed to pay Expenses (within the meaning of the Indemnification Agreement) as and when incurred by Indemnitee in connection with any claim against Indemnitee which is the subject of any threatened, pending, or completed action, suit, or proceeding, whether civil, criminal, administrative or investigative, to which Indemnitee was, is, or is threatened to be made a party by reason of facts which include Indemnitee s being or having been a director, officer or representative (within the meaning of the Indemnification Agreement) of Company;

WHEREAS, such a claim has arisen against Indemnitee and Indemnitee has notified Company thereof in accordance with the terms of Section 6 of the Indemnification Agreement (hereinafter the Proceeding);

WHEREAS, Indemnitee believes that Indemnitee should prevail in this Proceeding and it is in the interest of both Indemnitee and Company to defend against the claim against Indemnitee thereunder;

NOW, THEREFORE, Indemnitee hereby agrees that in consideration of Company s advance payment of Indemnitee s Expenses incurred prior to a final disposition of the Proceeding, Indemnitee hereby undertakes to reimburse Company for any and all Expenses paid by Company on behalf of Indemnitee prior to a final disposition of the Proceeding in the event that Indemnitee is determined under the Applicable Document (within the meaning of the Indemnification Agreement) not to be entitled to indemnification for such Expenses pursuant to the Indemnification Agreement and applicable law, provided that if Indemnitee is entitled under the Applicable Document to indemnification for some or a portion of such Expenses, Indemnitee s obligation to reimburse Company shall only be for those Expenses for which Indemnitee is determined not to be entitled to indemnification. Such reimbursement or arrangements for reimbursement by Indemnitee shall be consummated within ninety (90) days after a determination that Indemnitee is not entitled to indemnification and reimbursement pursuant to the Indemnification Agreement and applicable law.

IN WITNESS WHEREOF, the undersigned has set his hand this ___day of ___, ___.

Exhibit 13.1

This Management s Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the consolidated financial statements, the notes thereto and the historical summary appearing elsewhere in this annual report. Historical results and percentage relationships set forth in the consolidated financial statements, including trends that might appear, should not be taken as indicative of future operations. The following discussion contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those discussed in such forward-looking statements as a result of various factors, including those described under the section Cautionary Statements for Safe Harbor Purposes included elsewhere in this annual report.

OVERVIEW

General

We are an innovative specialty chemical company that produces and supplies technologies that improve the quality and performance of our customers products in the global transportation, industrial and consumer markets. Our business is founded on technological leadership. Innovation provides opportunities for us in growth markets as well as advantages over our competitors. From a base of approximately 1,700 patents, we use our product development and formulation expertise to sustain our leading market positions and fuel our future growth. We create additives, ingredients, resins and compounds that enhance the performance, quality and value of our customers products, while minimizing their environmental impact. Our products are used in a broad range of applications, and are sold into stable markets such as those for engine oils, specialty driveline lubricants and metalworking fluids, as well as higher-growth markets such as personal care and over-the-counter pharmaceutical products and performance coatings and inks. Our engineered polymers products also are used in a variety of industries, including the construction, sporting goods, medical products and automotive industries. We are an industry leader in many of the markets in which our product lines compete.

We are geographically diverse, with an extensive global manufacturing, supply chain, technical and commercial infrastructure. We operate facilities in 29 countries, including production facilities in 20 countries and laboratories in 13 countries, in key regions around the world through the efforts of more than 6,700 employees. We sell our products in more than 100 countries and believe that our customers value our ability to provide customized, high-quality, cost-effective performance formulations and solutions worldwide. We also believe that our customers value our global supply chain capabilities.

As part of our corporate goal to enhance our one company identity and to reflect more accurately our positioning in the marketplace, we completed a corporate identity review in the fourth quarter of 2006. We made a final determination in January 2007 that the trade name Noveon no longer would be used to describe the specialty chemicals business segment of our company and that its use would be discontinued except in connection with the consumer specialties product line. We acquired the rights to the Noveon trade name in June 2004 when we acquired Noveon International, Inc. (Noveon International). At the time of acquisition, an appraised value was attached to the Noveon trade name. We recorded a pretax charge of $41.2 million ($25.4 million after-tax) to reduce the related asset to its estimated fair value. This charge was reflected in the fourth quarter of 2006 as we believed at that time we would more likely than not discontinue the use of the Noveon trade name, except in the limited context of our consumer specialties product line.

In addition, we made a decision to change the names of our business segments. We believe that these names are a better fit with the corporate brand that we are presenting to our markets. These name changes do not change the way we manage our segments or the product lines included in the segments.

Following are the name changes to our segments:

Former Name	New Name
Lubricant Additives	Lubrizol Additives
Specialty Chemicals	Lubrizol Advanced Materials

On February 7, 2007, we completed the acquisition of a broad line of additive products used in the metalworking markets worldwide from Lockhart Chemical Company (Lockhart), a private company with headquarters in Gibsonia, Pennsylvania. Lockhart is recognized in the metalworking industry for its application and formulation capabilities and quality products. We purchased Lockhart s entire metalworking product line, which includes: natural, synthetic and gelled sulfonates; emulsifier packages; corrosion inhibitors and lubricity agents; grease additives; oxidates; esters; soap; semi-finished coatings; and rust preventatives. In 2006, these product lines had annualized revenues of approximately $20.0 million.

In May 2006, we sold the food ingredients and industrial specialties business (FIIS) and the active pharmaceutical ingredients and intermediate compounds business (A&I), both of which were included in the Lubrizol Advanced Materials segment. A&I and almost all of the FIIS divestiture reported into the Noveon consumer specialties product line, while a small portion of the FIIS divestiture reported into the performance coatings product line. We recorded a $15.9 million after-tax loss on the sale of these divested businesses. During the first quarter of 2006 and in connection with the held-for-sale classification, we performed an impairment test resulting in a $60.6 million after-tax impairment charge in the first quarter of 2006. We have reflected the results of these divested businesses in the discontinued operations net of tax line item in the consolidated statements of income for all periods presented.

In February 2006, we sold certain assets and liabilities of our Telene® resins business (Telene), which was included in the Lubrizol Advanced Materials segment. We have reflected the results of Telene in the discontinued operations net of tax line item in the consolidated statements of income for all periods presented, including an after-tax loss on the sale of $0.7 million.

In December 2005, we sold certain assets, liabilities and stock of our Engine Control Systems (ECS) business and, in September 2005, we sold certain assets and liabilities of our U.S. and U.K. Lubrizol Performance Systems (LPS) operations, both of which were included in the Lubrizol Additives segment. We have reflected the results of these businesses in the discontinued operations net of tax line item in the consolidated statements of income for 2005 and 2004.

On June 3, 2004, we completed the acquisition of Noveon International, a leading global producer and marketer of technologically advanced consumer specialties, engineered polymers and performance coatings used in the industrial and consumer markets. We acquired Noveon International for cash of $920.2 million (inclusive of certain seller expenses of $32.9 million) plus transaction costs of $11.4 million and less cash acquired of $103.0 million. In addition, we assumed $1,103.1 million of long-term indebtedness from Noveon International.

In connection with the acquisition of Noveon International, we targeted non-core businesses with total revenues of approximately $500.0 million for disposition. All disposition activities related to these businesses were completed by the end of 2006.

LUBRIZOL ADDITIVES SEGMENT

Challenging industry market forces and conditions continue to influence the Lubrizol Additives business. A key factor is the low global growth rate for this market, which we believe is in the range of approximately 0% to 1% per year. Additional characteristics of this market are:

Consolidation of the additive industry and capacity reductions in recent years, which has tightened the supply of lubricant additive components and packages.

Frequent product specification changes primarily driven by original equipment manufacturers (OEMs) and the impact of environmental and fuel economy regulations on the OEMs. The specification changes require us to incur product development and testing costs, but also enable us to apply our technology know-how to create products and solve problems. We believe our technology, and our expertise in applying it, are key strengths.

Improved engine design, which can result in longer lubricant drain intervals. Longer drain intervals reduce demand for finished lubricants.

New vehicle production levels, which affect our driveline fluids in particular because the initial factory fill is an important market factor in that product line.

In recent years, a general tightening of supplies leading to significant increases in raw material and energy costs.

We believe we are the market leader in lubricant additives and intend to remain the leader by continuing to invest in this business. Our strategy is to continue to optimize our product line mix with existing production capacity. Our Lubrizol Additives segment represents approximately 64% of consolidated revenues.

LUBRIZOL ADVANCED MATERIALS SEGMENT

Our Lubrizol Advanced Materials segment s growth strategy involves a combination of internal growth and acquisitions. Since 2000 and prior to the Noveon International acquisition, we made eight acquisitions with aggregate annual revenues at the time of acquisition of approximately $200.0 million.

We have a strategy to continue to achieve internal growth in the Lubrizol Advanced Materials segment by using our strengths, including our technology, formulating skills and broad geographic infrastructure, to develop and invest in new performance technologies in higher-growth industrial and consumer markets. Key factors to our success continue to be the introduction of new products, development of new applications for existing products, cross-selling of products, the integration of acquisitions and geographic expansion. Our Lubrizol Advanced Materials segment represents approximately 36% of consolidated revenues.

PRIMARY FACTORS AFFECTING 2006 RESULTS FROM CONTINUING OPERATIONS

The factors that most affected our consolidated 2006 results from continuing operations were:

Our ability to raise selling prices to recover raw material cost increases from 2006 and prior years.

Volume increases of 6% in the Lubrizol Advanced Materials segment and just under one-half percent in the Lubrizol Additives segment.

Increased operating costs due to general salary and benefit cost increases and the hiring of growth resources, costs associated with a newly commenced project to implement a common information systems platform primarily in the Lubrizol Advanced Materials segment, the impact of variable accounting for some of our liability-based incentive compensation plans, the adoption of Statement of Financial Accounting Standards (SFAS) No. 123R Share-Based Payment for the accounting of stock-based awards, and a $2.9 million pension settlement charge for a non-qualified plan distribution.

Pretax impairment charges of $41.2 million associated with the impairment of the Noveon trade name and $10.7 million related to plant and line closures in both the Lubrizol Additives and Lubrizol Advanced Materials segments.

Reduced interest expense net of $17.7 million as a result of higher interest income of $12.3 million associated with greater cash and short-term investment balances, primarily related to the cash proceeds from the 2006 divestitures and lower interest expense of $5.4 million associated with reduced debt levels.

Increased other income of $6.7 million primarily from legal settlements with suppliers.

Reduced effective tax rate primarily due to the favorable provision impacts of foreign operations.

Raw material costs increased 14% in 2006 after increasing 18% excluding the impact of acquisitions in 2005. Our results were affected by how quickly and the extent to which we were able to raise selling prices in response to raw material, utility and other operating cost increases. Both the Lubrizol Additives and Lubrizol Advanced Materials segments implemented price increases throughout 2006 in response to continuing increases in these costs. However, we have not yet recovered the full effect of the cumulative cost increases.

2006 RESULTS OF OPERATIONS COMPARED WITH 2005

Income from continuing operations increased $20.3 million to $181.8 million for 2006 compared to $161.5 million for 2005. The increase in earnings from continuing operations primarily was attributable to improvements in the combination of price and product mix, higher volume and reduced interest expense net, which more than offset higher raw material and utility costs, higher restructuring and impairment charges and higher selling, technology, administrative and research (STAR) expenses.

We recorded restructuring and impairment charges that reduced income from continuing operations by $0.47 per diluted share in 2006, which primarily related to a pretax impairment charge associated with the Noveon trade name and the phase-out of a manufacturing facility located in Bromborough, United Kingdom. We incurred restructuring and impairment charges of $0.15 per diluted share in 2005, which primarily related to the phase-out of manufacturing facilities located in Bromborough, United Kingdom; Linden, New Jersey; and Mountaintop, Pennsylvania, as well as other workforce reductions.

Net income for 2006 includes the factors described above for income from continuing operations and the impact of discontinued operations. Loss from discontinued operations net was $76.2 million in 2006 compared to income from discontinued operations net of $27.8 million in 2005. The loss from discontinued operations net in 2006 primarily related to a $60.6 million after-tax impairment charge recorded in the first quarter of 2006 to reflect the FIIS business at its fair value and a $16.6 million after-tax loss on the sale of divested businesses.

ANALYSIS OF REVENUES The changes in consolidated revenues are summarized as follows:

(In Millions of Dollars)	2006	2005	$ Change	% Change
Net sales	$ 4,036.4	$ 3,618.8	$ 417.6	12%
Royalties and other revenues	4.4	3.4	1.0	29%
Total revenues	$ 4,040.8	$ 3,622.2	$ 418.6	12%

The increase in revenues in 2006 compared to 2005 primarily was due to a 10% improvement in the combination of price and product mix and a 2% increase in volume. We experienced volume gains in all geographic zones except Europe.

ANALYSIS OF VOLUME 2006 VS. 2005 Volume patterns vary in different geographic zones. The following table shows our 2006 volume by geographic zone as well as the changes compared with 2005:

	2006 Volume	% Change
North America	46%	1%
Europe	27%	(1%)
Asia-Pacific / Middle East	22%	6%
Latin America	5%	11%
Total	100%	2%

Segment volume variances by geographic zone, as well as the factors explaining the changes in segment revenues for 2006 compared with 2005, are contained under the Segment Analysis section.

ANALYSIS OF COSTS AND EXPENSES

(In Millions of Dollars)	2006	2005	$ Change	% Change
Cost of sales	$ 3,041.9	$ 2,696.6	$ 345.3	13%
Selling and administrative expenses	381.7	348.4	33.3	10%
Research, testing and development expenses	205.5	198.9	6.6	3%
Amortization of intangible assets	23.7	23.5	0.2	1%
Restructuring and impairment charges	51.9	15.9	36.0	*
Total costs and expenses	$ 3,704.7	$ 3,283.3	$ 421.4	13%

* *Calculation not meaningful*

The increase in cost of sales for 2006 compared to 2005 primarily was due to higher average raw material cost and higher manufacturing expenses. Average raw material cost increased 14% in 2006 compared to 2005 primarily due to higher petrochemical raw material cost. Total manufacturing expenses increased 4% in 2006 compared to 2005, primarily due to higher salaries and benefits, higher utility costs and increased volume. On a per-unit-sold basis, manufacturing costs increased 2% in 2006 compared to 2005.

Gross profit (net sales less cost of sales) increased $72.3 million, or 8%, in 2006 compared to 2005. The increase primarily was due to improvement in the combination of price and product mix and higher volume partially offset by higher average raw material cost. In addition, gross profit was impacted unfavorably by higher salaries and benefits, an increase in utility costs and an unfavorable currency impact in 2006 when compared to 2005. Although we were successful in raising selling prices to offset higher cost of sales, our 2006 gross profit percentage (gross profit divided by net sales) decreased to 24.6% compared to 25.5% in 2005 due to the increase in net sales from our pricing responses to escalating raw material costs.

Selling and administrative expenses increased $33.3 million, or 10%, in 2006 compared to 2005. The increase primarily reflects an increase in salaries and benefits including the addition of growth resources, an increase of $4.5

million associated with a newly commenced project to implement a common information systems platform primarily in the Lubrizol Advanced Materials segment, the unfavorable impact of variable accounting for some of our liability-based incentive plans, a $2.9 million pension settlement charge for a non-qualified pension plan distribution and incremental stock-based compensation expense of $2.4 million associated with the adoption of SFAS No. 123R.

The timing and amount of research, testing and development expenses (technology expenses) are affected by lubricant additives product standards, which change periodically to meet new emissions, efficiency, durability and other performance factors as OEMs improve engine and transmission designs. Technology expenses increased $6.6 million, or 3%, in 2006 compared to 2005 primarily due to increases in annual salaries and benefits. During 2006 and 2005, approximately 87% of our technology costs were incurred in company-owned facilities and approximately 13% were incurred at third-party facilities.

In 2006, we recorded aggregate restructuring and impairment charges of $51.9 million, or $0.47 per diluted share, primarily related to the write-down of a trade name in the Lubrizol Advanced Materials segment and the phase-out of a manufacturing facility in the Lubrizol Additives segment.

The components of the 2006 restructuring and impairment charges are detailed as follows:

(In Millions of Dollars)	Asset Impairments	Other Plant Exit Costs	Severance	Total
Noveon trade name impairment	$ 41.2	$	$	$ 41.2
Bromborough, U.K. closure		4.8	1.9	6.7
Lubrizol Advanced Materials plant and line closures and workforce reductions	3.3	0.2	0.6	4.1
Other			(0.1)	(0.1)
Total restructuring and impairment charges	$ 44.5	$ 5.0	$ 2.4	$ 51.9

As part of our corporate goal to enhance our one company identity and to reflect more accurately our positioning in the marketplace, we completed a corporate identity review in the fourth quarter of 2006. We made a final determination in January 2007 that the trade name Noveon no longer would be used to describe the specialty chemicals business segment of our company and that its use would be discontinued except in connection with the consumer specialties product line. We acquired the rights to the Noveon trade name in June 2004 when we acquired Noveon International. At the time of acquisition, an appraised value was attached to the Noveon trade name. We calculated a pretax charge of $41.2 million ($25.4 million after-tax) to reduce the related asset to its estimated fair value. This charge was reflected in the fourth quarter of 2006 as we believed at that time we would more likely than not discontinue the use of the Noveon trade name, except in the limited context of the consumer specialties product line.

In September 2006, we entered into an agreement to sell the manufacturing facility located in Bromborough, United Kingdom. The sale closed in January 2007. In connection with the sale, we received net cash proceeds of $5.9 million and recorded a pretax gain of $2.9 million during the first quarter of 2007. The gain will be classified as a restructuring credit associated with closure of the facility. Production from the Bromborough facility was transferred to higher-capacity Lubrizol facilities in France and the United States. The sale of the facility will avoid approximately $3.0 million to $5.0 million in restructuring costs that would have been associated with demolition of the plant facilities on the site. On January 17, 2005, we announced our plans to phase-out production at the Bromborough facility by the end of 2006. At that time, we estimated that total restructuring costs, including employee severance and other plant closure costs (including planned demolition costs), would be approximately $15.0 million. Cumulative pretax charges of approximately $12.8 million were incurred through 2006, of which $6.7 million were incurred in 2006, to satisfy severance and retention obligations, plant dismantling, site restoration and other site environmental evaluation costs.

We have invested approximately $15.3 million in capital related to the Bromborough closure through December 31, 2006 for capacity upgrades in France and the United States. We expect to invest an additional $4.0 million related to these capacity upgrades through the first quarter of 2007.

In the first quarter of 2005, we decided to close two Lubrizol Advanced Materials performance coatings production facilities in the United States. One facility, located in Mountaintop, Pennsylvania, was closed in October 2005 and sold in January 2006. We recorded an additional $0.8 million in asset impairments and other exit costs and $0.6 million in severance obligations in 2006 relating to the other facility located in Linden, New Jersey, which was closed in the third quarter of 2006. Additional asset impairment charges of $2.7 million were recorded in 2006, which primarily related to the planned closure of a performance coatings production line in the first quarter of 2007.

In addition, we expect these workforce reductions, facility closures and transfers of production to more efficient manufacturing locations to generate annual pretax savings of approximately $5.3 million for the Lubrizol Advanced Materials segment and approximately $12.0 million for the Lubrizol Additives segment. Approximately $8.4 million of these savings were realized in 2006.

The charges for these cost reduction initiatives and impairments are reported as a separate line item in the consolidated statements of income, entitled Restructuring and impairment charges and are included in the Total cost and expenses subtotal on the consolidated statements of income.

ANALYSIS OF OTHER ITEMS AND NET INCOME

(In Millions of Dollars)	2006	2005	$ Change	% Change
Other income net	$ 8.3	$ 1.6	$ 6.7	*
Interest expense net	79.3	97.0	(17.7)	(18%)
Income from continuing operations before income taxes	265.1	243.5	21.6	9%
Provision for income taxes	83.3	82.0	1.3	2%
Income from continuing operations	181.8	161.5	20.3	13%
Discontinued operations net of tax	(76.2)	27.8	(104.0)	*
Net income	$ 105.6	$ 189.3	$ (83.7)	(44%)

* *Calculation not meaningful*

The increase in other income net for 2006 compared to 2005 primarily was due to the favorable legal settlements of insurance and commercial matters of $10.4 million and an increase in the net gain on the sale of property of $1.3 million, partially offset by an increase in currency transaction losses of $2.4 million and an increase in the elimination of minority interest of $2.4 million due to higher profitability of our joint ventures.

The decrease in interest expense net for 2006 compared to 2005 primarily was due to an increase in interest income of $12.3 million as a result of our increased cash and short-term investments from the divestiture proceeds and a decrease in interest expense of $5.4 million due to a reduction in our long-term debt balances.

Our effective tax rate was 31.4% in 2006 compared to 33.7% in 2005. The decrease in the effective tax rate primarily was due to the favorable provision impacts of foreign operations.

Primarily as a result of the above factors, income from continuing operations per diluted share was $2.62 in 2006 compared to $2.35 in 2005. Loss from discontinued operations per diluted share was $1.10 in 2006 compared to income from discontinued operations per diluted share of $0.40 in 2005. The loss from discontinued operations per diluted share of $1.10 in 2006 consisted of operating income of $0.01 per diluted share, excluding an $0.87 per diluted share impairment charge and a $0.24 per diluted share loss on the sale of divested businesses.

2005 RESULTS OF OPERATIONS COMPARED WITH 2004
Our 2005 revenues as compared to 2004, excluding the impact of acquisitions, increased primarily due to improvements in the combination of price and product mix, offset by a slight decrease in volume. The increased revenues partially were offset by higher raw material costs and higher utility costs. Primarily as a result of these factors and the impact of acquisitions, gross profit increased 22% in 2005 compared with 2004. Excluding the impact of acquisitions, gross profit increased 4% in 2005 compared to 2004.
ANALYSIS OF REVENUES The changes in consolidated revenues are summarized as follows:

					Excluding the Impact of Acquisitions	
(In Millions of Dollars)	2005	2004	$ Change	% Change	$ Change	% Change
Net sales	$ 3,618.8	$ 2,860.5	$ 758.3	27%	$ 333.0	12%
Royalties and other revenues	3.4	3.9	(0.5)	(13%)	(0.5)	(13%)
Total revenues	$ 3,622.2	$ 2,864.4	$ 757.8	26%	$ 332.5	12%

The 2004 acquisitions contributed $425.3 million toward the increase in 2005 consolidated revenues compared with 2004. Acquisitions in 2004 included Noveon International and the hyperdispersants business purchased from Avecia.
Excluding the impact of acquisitions, the increase in consolidated revenues in 2005 compared to 2004 was due to a 12% increase in the combination of price and product mix.
ANALYSIS OF VOLUME 2005 VS. 2004 Volume patterns vary in different geographic zones. The following table shows our 2005 volume by geographic zone as well as the changes compared with 2004:

	2005 Volume	% Change	Excluding the Impact of Acquisitions % Change
North America	46%	6%	(6%)
Europe	28%	8%	3%
Asia-Pacific / Middle East	21%	13%	8%
Latin America	5%	6%	2%
Total	100%	8%	

Segment volume variances by geographic zone, as well as the factors explaining the changes in segment revenues for 2005 compared with 2004, are contained under the Segment Analysis section.

ANALYSIS OF COSTS AND EXPENSES

					Excluding the Impact of Acquisitions	
(In Millions of Dollars)	2005	2004	$ Change	% Change	$ Change	% Change
Cost of sales	$ 2,696.6	$ 2,101.7	$ 594.9	28%	$ 304.0	14%
Selling and administrative expenses	348.4	284.8	63.6	22%	9.1	3%
Research, testing and development expenses	198.9	184.8	14.1	8%	(5.7)	(3%)
Amortization of intangible assets	23.5	16.9	6.6	39%		*
Write-off of acquired in-process research and development		34.0	(34.0)	*	(34.0)	*
Restructuring and impairment charges	15.9	38.1	(22.2)	*	(24.0)	*
Total costs and expenses	$ 3,283.3	$ 2,660.3	$ 623.0	23%	$ 249.4	9%

* *Calculation not meaningful*

Cost of sales increased due to acquisitions, higher average raw material cost and higher manufacturing expenses. Excluding the impact of acquisitions, average raw material cost increased 18% in 2005 compared with 2004. The increase in the material costs during the latter half of 2005 largely was driven by supply disruptions caused by the U.S. Gulf coast hurricanes. Material cost, including acquisitions, also included inventory step-up adjustments associated with the increased valuation of inventory of $12.5 million in 2004 for the Noveon International and hyperdispersants acquisitions. The Noveon International portion of the inventory step-up adjustment was $9.8 million, or $0.11 per diluted share.

Total manufacturing expenses increased 19% (5% excluding the impact of acquisitions) in 2005 compared with 2004. Excluding the impact of acquisitions, the increase primarily was due to an increase in utility costs as well as an unfavorable currency impact. On a per-unit-sold basis, manufacturing costs increased 5% in 2005 compared to 2004, excluding the impact of acquisitions.

Gross profit increased $163.4 million, or 22% ($29.0 million, or 4%, excluding the impact of acquisitions), in 2005 compared with 2004. Excluding the impact of acquisitions, the increase primarily was due to higher average selling price, partially offset by higher unit average raw material cost and higher utility costs. Our 2005 gross profit percentage decreased to 25.5% (24.7% excluding the impact of acquisitions) compared to 26.5% in 2004. The decrease primarily was due to higher raw material costs outpacing our ability to raise selling prices sufficiently to sustain gross profit percentages.

Selling and administrative expenses increased $63.6 million, or 22% ($9.1 million, or 3%, excluding the impact of acquisitions), in 2005 compared with 2004. The increase in selling and administrative expenses, excluding the impact of acquisitions, primarily was due to an increase in salaries and incentive compensation expense, offset partially by non-recurring litigation expense of $1.9 million incurred in 2004.

Technology expenses, excluding the impact of acquisitions, decreased 3% in 2005 compared with 2004. The decrease primarily was due to the 2004 reduction in workforce. During 2005 and 2004, approximately 87% of our technology costs were incurred in company-owned facilities and approximately 13% were incurred at third-party facilities.

The increased amortization expense in 2005 compared with 2004 primarily was due to the Noveon International and hyperdispersants acquisitions in 2004. These two acquisitions resulted in an increase in gross amortizable intangible assets of approximately $320.3 million with useful lives ranging between 3 and 20 years.

We included a one-time, non-cash charge of $34.0 million, or $0.39 per share, in total costs and expenses in 2004 to write-off the estimated fair value of acquired in-process research and development (IPR&D) projects associated with the Noveon International acquisition. Costs to acquire IPR&D projects that have no alternative future use and that have not yet reached technological feasibility at the date of acquisition are expensed upon acquisition. We obtained appraisals to determine the estimated fair value of IPR&D projects. There were approximately nine projects acquired in the Noveon International transaction in several different product lines. The projects were at varying stages of completeness ranging from the early development stage to prototype testing at the time of acquisition. No further adjustments were made in 2005 to the valuation in connection with the completion of the Noveon International purchase accounting.

In 2005, we recorded restructuring and impairment charges aggregating $15.9 million, or $0.15 per diluted share, primarily related to the decision to close three manufacturing facilities, as well as other workforce reductions.

The components of the 2005 restructuring and impairment charges are detailed as follows:

(In Millions of Dollars)	Asset Impairments	Other Plant Exit Costs	Severance	Total
Lubrizol Advanced Materials plant closures and workforce reductions	$ 4.2	$ 1.0	$ 3.8	$ 9.0
Bromborough, U.K. closure	0.7	1.7	3.7	6.1
Corporate / other workforce reductions			0.7	0.7
Noveon International restructuring liabilities assumed			0.1	0.1
Total restructuring and impairment charges	$ 4.9	$ 2.7	$ 8.3	$ 15.9

In May 2005, we announced the reorganization of the Lubrizol Advanced Materials performance coatings product line. This product line includes businesses acquired from Noveon International as well as businesses included in our legacy operations. In connection with the reorganization, we eliminated 26 positions in North America and Europe. These reductions were completed during 2005 and resulted in a severance charge of $1.9 million in 2005.

In the first quarter of 2005, we made the decision and the announcement to close two Lubrizol Advanced Materials performance coatings production facilities in the United States. The aggregate restructuring charge recorded for these closures for the year ended December 31, 2005 was $6.6 million, comprised of $4.2 million in asset impairments, $0.9 million in exit costs and $1.5 million in severance costs. We recorded an impairment charge for both plants in the first quarter of 2005 to reduce the related assets to their estimated fair values. The estimated fair value of the assets was determined primarily from third-party appraisals. Production from these sites was transferred to other facilities in the United States. One facility, located in Mountaintop, Pennsylvania, was closed in October 2005 and sold in January 2006, while the other facility, located in Linden, New Jersey, was closed in the third quarter of 2006. These closures resulted in a workforce reduction of 62 employees. We also recorded European-related restructuring charges in the Lubrizol Advanced Materials segment of $0.4 million in severance costs and $0.1 million in other exit costs during the fourth quarter of 2005.

In December 2004, we decided to close the Lubrizol Additives manufacturing facility in Bromborough, United Kingdom. We announced this decision in January 2005. A $17.0 million impairment charge was recorded in December 2004 to reduce the related assets to their estimated fair values. Production phase-out of this site began in the third quarter of 2005 and was completed in the third quarter of 2006. During this phase-out, U.K. production was transferred to facilities in France and the United States. There were 70 employees impacted by this closure. The aggregate restructuring charge recorded for this closure through December 31, 2005 was $6.1 million. Total 2005 charges were comprised of $0.7 million in asset impairments, $1.7 million in exit costs and $3.7 million in severance costs.

In the second quarter of 2005, we continued a process of identifying further opportunities to increase efficiency and productivity, reduce costs and support our integration strategy of the Noveon International acquisition. As a result, we reduced headcount in the general and administrative area of our Ohio headquarters. Through these restructuring efforts, we eliminated seven positions resulting in a severance-related charge of $0.7 million in 2005. All of the affected employees had left their positions by June 30, 2005 and the remaining personnel-related costs were paid by the end of 2006.

In addition, we realized approximately $18.3 million of pretax savings in 2005 relating to the 2004 restructuring programs.

The charges for these cost reduction initiatives and impairments are reported as a separate line item in the consolidated income statements, entitled Restructuring and impairment charges and are included in the Total cost and expenses subtotal on the consolidated statements of income.

ANALYSIS OF OTHER ITEMS AND NET INCOME

					Excluding the Impact of Acquisitions	
(In Millions of Dollars)	2005	2004	$ Change	% Change	$ Change	% Change
Other income net	$ 1.6	$ 5.4	$ (3.8)	*	$ (4.5)	*
Interest expense net	97.0	72.3	24.7	*	(8.8)	*
Income from continuing operations before income taxes	243.5	137.2	106.3	77%	87.4	64%
Provision for income taxes	82.0	50.0	32.0	64%	28.2	56%
Income from continuing operations	161.5	87.2	74.3	85%	59.2	68%
Discontinued operations net of tax	27.8	6.3	21.5	*	8.7	*
Net income	$ 189.3	$ 93.5	$ 95.8	102%	$ 67.9	73%

* *Calculation not meaningful*

The change in other income net in 2005 predominantly was due to the non-recurring 2004 gain of $6.4 million on a currency forward contract to purchase pound sterling related to the acquisition of the hyperdispersants business. We secured the forward contract in December 2003 and completed the acquisition at the end of January 2004.

The increase in interest expense net in 2005, compared with 2004, primarily was due to the Noveon International pretax acquisition-related financing costs of $82.0 million, or $0.77 per diluted share, in 2005 compared to $56.7 million, or $0.66 per diluted share, in 2004. These costs were comprised of the interest incurred relating to the permanent financing as well as interest on the bridge loan and assumed Noveon International debt not repaid at the time of the acquisition of $42.6 million, amortization of bridge loan fees of $11.2 million and termination of an interest rate swap of $2.9 million. We obtained permanent financing for the Noveon International acquisition in the third quarter of 2004.

We had an effective tax rate of 33.7% in 2005 as compared with 36.4% in 2004. Items driving the decrease in tax rate included reduced tax costs associated with actual and planned foreign dividends, the more favorable impact of foreign tax rate differences and higher U.S. tax benefits on exports. These factors partially were offset by increased state income taxes and lower non-taxable currency gains as compared to 2004.

As of December 31, 2005, we had U.S. net operating loss carryforwards (NOLs) of $178.4 million. These NOLs are a combination of NOLs acquired from Noveon International, as well as those generated in 2004 primarily as a result of transaction-related costs.

Primarily as a result of the above factors, our income from continuing operations per diluted share was $2.35 in 2005 compared to $1.56 in 2004. Income from discontinued operations per diluted share was $0.40 in 2005 compared to $0.11 in 2004. Income from discontinued operations in 2005 included $0.28 per diluted share of operating income from the FIIS and A&I businesses, $0.10 per diluted share related to LPS and ECS, of which $0.04 was attributable to the gain on sale, and $0.02 per diluted share in operating income related to the Telene resins business. Restructuring and impairment charges recorded in 2005 reduced earnings by $0.15 per diluted share. Earnings in 2004 included a one-time write-off for IPR&D projects from the Noveon International acquisition of $0.38 per diluted share, a purchase adjustment associated with the increased valuation of Noveon International-acquired inventory of $0.11 per diluted share, restructuring charges of $0.46 per diluted share, acquisition-related financing costs of $0.66 per diluted share and a gain on a foreign currency forward contract of $0.07 per diluted share.

SEGMENT ANALYSIS

We primarily evaluate performance and allocate resources based on segment operating income, defined as revenues less expenses identifiable to the product lines included within each segment, as well as projected future returns. Segment operating income will reconcile to consolidated income from continuing operations before income taxes by deducting corporate expenses and corporate other income (expense) that are not attributable to the operating segments, restructuring and impairment charges and net interest expense. The proportion of consolidated revenues and segment operating income attributed to each segment was as follows:

	2006	2005	2004
Revenues:			
Lubrizol Additives	64%	63%	70%
Lubrizol Advanced Materials	36%	37%	30%
Segment Operating Income:			
Lubrizol Additives	65%	64%	75%
Lubrizol Advanced Materials	35%	36%	25%

OPERATING RESULTS BY SEGMENT

				2006 vs. 2005		2005 vs. 2004 Excluding the Impact of Acquisitions	
(In Millions of Dollars)	2006	2005	2004	$ Change	% Change	$ Change	% Change
Revenues:							
Lubrizol Additives	$ 2,600.5	$ 2,280.0	$ 1,998.6	$ 320.5	14%	$ 281.4	14%
Lubrizol Advanced Materials	1,440.3	1,342.2	865.8	98.1	7%	51.1	6%
Total	$ 4,040.8	$ 3,622.2	$ 2,864.4	$ 418.6	12%	$ 332.5	12%
Gross Profit:							
Lubrizol Additives	$ 581.3	$ 531.2	$ 508.4	$ 50.1	9%	$ 22.8	4%
Lubrizol Advanced Materials	413.2	391.0	250.4	22.2	6%	6.2	2%

Total	$ 473.7	$ 417.5	$ 319.5	$ 56.2	13%	$ 43.8	14%

LUBRIZOL ADDITIVES SEGMENT

2006 COMPARED WITH 2005 Revenues increased 14% in 2006 when compared to 2005. The increase primarily was due to improvement in the combination of price and product mix, while a slight increase in volume was offset by a slight unfavorable impact of currency.

Volume patterns vary in different geographic zones. The following table shows our volume by geographic zone in 2006 as well as the changes compared with 2005:

	2006 Volume	% Change
North America	38%	1%
Europe	30%	(3%)
Asia-Pacific / Middle East	26%	2%
Latin America	6%	6%
Total	100%	

Volume increased slightly in 2006 compared to 2005; however, excluding the impact of nonrecurring, temporary business gains in 2005, volume increased 2% in 2006 compared to 2005.

The decrease in volume in Europe was due in part to a change in a customer sourcing from Europe to North America. The volume growth in the Asia-Pacific / Middle East region primarily resulted from growth in China, which represents our third largest country in terms of volume sold despite the fact that a majority of the 2005 temporary business gains occurred in this region. The volume growth in Latin America primarily was driven by stronger demand by our major international customers.

Segment gross profit increased 9% in 2006 compared to 2005 as we continued to recover from margin erosion that occurred in 2005 and prior years. The Lubrizol Additives segment implemented a series of price increases in 2006

and 2005 in response to continued raw material and utility cost increases. The effective dates of the selling price increases varied by geographic zone. The gross profit increase primarily was due to an improvement in the combination of price and product mix partially offset by a 19% increase in average material cost in 2006 as compared to 2005. Manufacturing costs on a per-unit-sold basis increased 3% in 2006 compared to 2005. The increase was due in part to higher utility costs as well as higher operating supplies and outside services partially offset by lower depreciation expense, employee benefits and a reclassification of certain expenses from manufacturing to STAR due to a change in organization structure in our European operations. In addition, manufacturing costs were impacted favorably by approximately $5.2 million in 2006 as we curtailed production activity at our Bromborough, U.K. plant in accordance with our previously announced timetable to close this facility.

The gross profit percentage declined to 22.4% in 2006 compared with 23.3% in 2005. The decline in gross profit percentage primarily was due to continuing raw material cost increases throughout most of 2006 outpacing the timing of price increases.

STAR expenses increased 7% in 2006 compared to 2005. This increase primarily was due to an increase in selling and administrative expenses of $14.8 million. The higher selling and administrative costs primarily resulted from the impact of reclassifying to STAR certain expenses that previously were classified as manufacturing resulting from a change in organization structure in our European operations, increases in base and variable compensation and a change in the timing of annual salary increases. The balance of the change in STAR expenses was due to an increase in technical expenses of $3.5 million primarily associated with technical programs within our driveline and industrial oils additives packages.

Other income was impacted favorably by $11.7 million primarily due to legal settlements of insurance and commercial matters as well as the gain on sale of certain properties.

Segment operating income (revenues less expenses attributable to the product lines aggregated within each segment) increased 15% in 2006 compared to the prior year due to the factors discussed above.

2005 COMPARED WITH 2004 Segment revenues increased 14% in 2005 compared to 2004, due to a 12% improvement from the combination of price and product mix, and a 1% increase in both volume and currency.

Volume patterns vary in different geographic zones. The following table shows our volume by geographic zone in 2005 as well as the changes compared with 2004:

	2005 Volume	% Change
North America	38%	(5%)
Europe	31%	3%
Asia-Pacific / Middle East	25%	9%
Latin America	6%	2%
Total	100%	1%

Total volume increased 1% in 2005 compared to 2004. Our results reflect some spot business or temporary business gains during 2005. This increase partially was offset by the final piece of lost business of a major international customer in the second half of 2004 and the impact on volumes of the higher concentration associated with the new passenger car technical standard GF-4 as compared to GF-3. Excluding these three specific factors, volume increased 3% globally and 1% in North America compared to 2004.

Higher volume in Europe in 2005 compared with 2004 primarily was due to increases in our engine additives product line due to improved product mix and market share gains. The Asia-Pacific / Middle East region benefited from

overall expanded growth in that market, particularly China, as well as spot business gains. Excluding the spot business gains, volumes increased 5% in Asia-Pacific / Middle East.

The Lubrizol Additives segment implemented a series of price increases in 2005 in response to continued raw material cost increases as well as higher prices for natural gas and electricity used in our plants. The effective dates of the price increases varied by geographic zone.

Segment gross profit increased $22.8 million, or 4%, in 2005 compared to 2004. The increase primarily was due to the cumulative impact of the selling price increases as well as an increase in volume, largely offset by higher average raw material cost and to a lesser extent, higher utility costs. In 2005, average unit raw material cost increased 22% compared to 2004. Manufacturing expenses increased 3% in 2005; however, on a per-unit-sold basis, manufacturing expenses increased only 1% as compared to the prior year. The increase in manufacturing expenses was driven by higher utilities and maintenance costs in 2005 partially offset by lower employee benefit expense and lower environmental accruals.

Gross profit as a percentage of net sales for the segment was 23.3% for 2005 compared with 25.5% in 2004. The decline primarily was due to the time lag between the effective date of selling price increases in the wake of continuing raw material cost increases and raw material costs rising proportionally faster than selling prices.

STAR expenses decreased 1% in 2005 compared to 2004, primarily due to lower technical expenses of $3.1 million. The decrease in technical expenses primarily was due to lower outside technical expenses impacted by delays in the industry specifications for new lubricant additive programs.

Segment operating income increased 11% in 2005 compared with 2004 due to the factors discussed above.

LUBRIZOL ADVANCED MATERIALS SEGMENT

2006 COMPARED WITH 2005 Revenues for the Lubrizol Advanced Materials segment increased 7% in 2006 compared with 2005. The increase was due to a 6% increase in volume and a 1% improvement in the combination of price and product mix. The improvement in the combination of price and product mix primarily occurred in our Noveon consumer specialties product line.

Volume patterns vary in different geographic zones. The following table shows our volume by geographic zone in 2006 as well as the changes compared with 2005:

	2006 Volume	% Change
North America	65%	1%
Europe	18%	4%
Asia-Pacific / Middle East	13%	28%
Latin America	4%	32%
Total	100%	6%

Our engineered polymers and Noveon consumer specialties product lines both had increases in volume in North America in 2006 compared to 2005. The increase in our engineered polymers product line was due to increased customer demand in both our Estane® thermoplastic polyurethane business (Estane) and our TempRite® engineered polymers business (TempRite). TempRite benefited from continued conversions from metals to plastics. The increase in the Noveon consumer specialties product line primarily was due to increased customer demand in our personal care and home care business and tolling sales to the buyer of our FIIS business. Our performance coatings product line had

a slight decrease in volume in North America in 2006 compared to 2005, which we believe primarily was due to the continued migration of the textile industry from North America to China.

Our engineered polymers and performance coatings product lines had increases in Europe in 2006 compared to 2005. The increase in our performance coatings product line primarily was due to customer demand and market share gains in the textiles market and customer demand in the paints and coatings market. The increase in our engineered polymers product line was due to market-share gains in our Estane business and business gains in our TempRite business resulting from continued conversions from metals to plastics. Our Noveon consumer specialties product line had a decrease in volume in Europe in 2006 compared to 2005 primarily attributable to our AMPS® specialty monomers business. The increase in Asia-Pacific / Middle East volume for 2006 primarily was due to higher customer demand and market-share gains in both our Estane business and performance coatings product line, predominately in the textiles market, and higher customer demand in our Noveon consumer specialties product line. We also experienced higher customer demand in the TempRite business, particularly in the Middle East and India.

Segment gross profit increased $22.2 million, or 6%, in 2006 compared to 2005. The increase in segment gross profit in 2006 primarily was the result of higher revenues due to the increase in volume and improvement in the combination of price and product mix partially offset by higher average raw material cost and manufacturing costs. Average raw material cost increased 4% in 2006 compared to 2005. Manufacturing costs primarily were higher due to increased utility costs, the impact of reclassifying certain expenses from STAR to manufacturing as a result of a change in organizational structure in our European operations and higher volume.

The gross profit percentage for this segment was 28.7% in 2006 compared to 29.1% in 2005. The decrease in gross profit percentage in 2006 was due to higher average raw material cost partially offset by an improvement in the combination of price and product mix.

STAR expenses increased $9.0 million, or 4%, in 2006 compared to 2005. The increase in STAR was due to higher salaries and incentive compensation and increased hiring to support growth initiatives partially offset by the impact of reclassifying certain expenses from STAR to manufacturing as a result of a change in organizational structure in our European operations and reductions in bad debt expense.

Segment operating income increased $16.7 million in 2006 compared to 2005. The increase in segment operating income primarily was due to the increase in segment gross profit as described above, partially offset by the increase in STAR expenses.

2005 COMPARED WITH 2004 In 2005, revenues for the Lubrizol Advanced Materials segment increased 55% compared with 2004 primarily due to the 2004 acquisitions of Noveon International and the hyperdispersants business. Excluding the impact of acquisitions, segment revenues increased 6% in 2005 compared with 2004 due to a 10% improvement in the combination of price and product mix partially offset by a 4% decrease in volume. The improvements in price and product mix occurred relatively evenly across all three of our product lines as we had implemented price increases to offset rising raw material costs.

Volume patterns vary in different geographic zones. The following table shows our volume by geographic zone in 2005 as well as the changes compared with 2004:

	2005 Volume	% Change	Excluding the Impact of Acquisitions % Change
North America	68%	28%	(7%)
Europe	19%	40%	2%
Asia-Pacific / Middle East	10%	44%	(3%)
Latin America	3%	32%	
Total	100%	31%	(4%)

Excluding the impact of acquisitions, all three product lines showed volume decreases in North America. These decreases primarily were due to our exiting certain low-margin business, deterioration in the textiles market and some market-share loss as a result of competitive activity in response to our price increases. The volume increase in Europe primarily was in our Noveon consumer specialties product line and was due to increased sales in our AMPS specialty monomers business.

Segment gross profit increased $140.5 million, or 56% (increased $6.2 million, or 2%, excluding the impact of acquisitions), in 2005 compared with 2004. Excluding the impact of acquisitions, the increase in segment gross profit in 2005 resulted from higher revenues due to an improvement in the combination of price and product mix partially offset by lower volume and higher raw material costs and utility expenses. Average raw material cost increased 12% in 2005 compared with 2004. Raw material cost for 2004 included the impact of $7.5 million of inventory step-up amortization from acquisition accounting. Excluding the impact of the step-up in 2004, average raw material cost increased 13% in 2005 compared with 2004. Manufacturing expenses increased 9% in 2005 compared with 2004 primarily due to higher spending related to utilities. Average unit manufacturing expense increased 14% due to the combination of lower volumes and higher utility and operating expenses.

Gross profit as a percentage of net sales was 29.1% (28.0% excluding the impact of acquisitions) in 2005 compared with 29.0% in 2004. Excluding the impact of the inventory step-up amortization, the gross profit percentage for 2004 was 29.8%. The decrease in gross profit percentage in 2005 was due to higher average raw material cost and higher manufacturing costs partially offset by an improvement in the combination of price and product mix.

STAR expenses increased $62.9 million, or 40%, in 2005 (decreased $11.4 million, or 7%, excluding the impact of acquisitions) compared with 2004. Excluding the impact of acquisitions, the decrease in STAR expenses primarily was due to reduced corporate administrative and technical services provided to the segment, the consolidation of some segment administrative functions into corporate functions and savings from a restructuring in our performance coatings product line.

Segment operating income increased $72.3 million in 2005 (increased $18.1 million, excluding the impact of acquisitions) compared with segment operating income of $78.6 million in 2004. Excluding the impact of acquisitions, the increase in segment operating income primarily was due to the increase in segment gross profit and lower STAR expenses.

RETURN ON AVERAGE SHAREHOLDERS EQUITY

Return on average shareholders equity was 6.5% in 2006, 12.2% in 2005 and 7.6% in 2004. The return on average shareholders equity is calculated as current year net income divided by the rolling 12-month average of shareholders equity for the current and prior years. The earnings (loss) impact of discontinued operations, restructuring and

impairment charges and the write-off of acquired IPR&D in 2004 lowered the return on average shareholders equity by approximately 5.6%, 0.8% and 4.7% in 2006, 2005 and 2004, respectively.

WORKING CAPITAL, LIQUIDITY AND CAPITAL RESOURCES

SELECTED MEASURES OF LIQUIDITY AND CAPITAL RESOURCES The following table summarizes our financial performance indicators of liquidity:

	2006	2005
Cash and short-term investments (in millions of dollars)	$ 575.7	$262.4
Working capital (in millions of dollars)	$1,204.3	$907.4
Current ratio	2.9	2.4
Debt as a % of capitalization	47.5%	51.6%
Net debt as a % of capitalization	36.1%	47.3%

SUMMARY OF CASH FLOWS The following table summarizes the major components of cash flows:

(In Millions of Dollars)	2006	2005	2004
Cash provided by (used for):			
Operating activities	$ 334.8	$ 362.2	$ 331.6
Investing activities	151.4	(106.8)	(1,088.8)
Financing activities	(183.9)	(312.8)	808.5
Effect of exchange-rate changes on cash	11.0	(16.1)	25.9
Net increase (decrease) in cash and short-term investments	$ 313.3	$ (73.5)	$ 77.2

<u>OPERATING ACTIVITIES</u>

The decrease in cash provided by operating activities in 2006 compared with 2005 primarily relates to a decrease in payables and accrued expenses, including the payment of accounts payable of approximately $27.0 million that were retained at the closing of the FIIS divestiture and unfavorable timing of accounts payable disbursements in 2006 compared to 2005. In addition, we experienced higher inventory levels due to increased raw material costs, as well as an increase in finished goods inventory caused by lower year-end shipment volumes.

We manage our levels of inventories and accounts receivable on the basis of average days sales in inventory and average days sales in receivables. We establish our target for accounts receivable by taking into consideration the weighted average of our various terms of trade for each segment. We establish our target for days sales in inventory with the goal of minimizing our investment in inventories while at the same time ensuring adequate supply for our customers. Despite the increase in working capital due to higher average selling price and higher inventory costs, we improved our days outstanding in accounts receivable and days in inventory.

<u>INVESTING ACTIVITIES</u>

Our capital expenditures in 2006 were $130.9 million, as compared with $136.7 million and $133.2 million in 2005 and 2004, respectively. Capital expenditures for the Lubrizol Additives segment primarily are made to maintain existing manufacturing capacity. Approximately 30% of the capital expenditures in the Lubrizol Advanced Materials segment related to increasing capacity. In 2007, we estimate annual capital expenditures will be approximately $175.0 million to $180.0 million. The higher level of estimated capital expenditures in 2007 is driven by our plans to

build production capacity for our Lubrizol Advanced Materials product lines in China, North America and Europe to meet growing demand, as well as to bring both segments onto a common information systems platform.

The sales of FIIS and A&I were completed on May 1, 2006 and May 23, 2006, respectively. In consideration for these divested businesses, we received net cash proceeds of approximately $254.8 million and $10.4 million, respectively. The FIIS sale resulted in a taxable gain, which was offset by our remaining net operating loss carryforwards. The sale of Telene was completed in February 2006 for net cash proceeds of $6.2 million.

FINANCING ACTIVITIES

Cash used for financing activities of $183.9 million in 2006 primarily consisted of repayments of long-term debt and the payment of dividends, partially offset by proceeds from the exercise of stock options. This compares to $312.8 million used for financing activities in 2005, which primarily consisted of net repayments of long-term debt of $280.4 million and the payment of dividends, partially offset by borrowings under our euro revolving credit facility and proceeds from the exercise of stock options.

Other than the 85.0 million outstanding under our euro revolving credit facility, we have no other debt that is prepayable without incurring a penalty.

CAPITALIZATION AND CREDIT FACILITIES

At December 31, 2006, our total debt outstanding of $1,541.7 million consisted of 67% fixed-rate debt and 33% variable-rate debt, including $400.0 million of fixed-rate debt that effectively has been swapped to a variable rate. Our weighted-average interest rate as of December 31, 2006 was approximately 5.8%.

Our net debt to capitalization ratio at December 31, 2006 was 36.1%. Net debt represents total short-term and long-term debt, excluding original issue discounts and unrealized gains and losses on derivative instruments designated as fair-value hedges of fixed-rate debt, reduced by cash and short-term investments. Capitalization is calculated as shareholders equity plus net debt. Total debt as a percent of capitalization was 47.5% at December 31, 2006.

Our ratio of current assets to current liabilities was 2.9 and 2.4 at December 31, 2006 and 2005, respectively.

On September 20, 2006, we amended our five-year unsecured committed U.S. bank credit agreement to reduce the revolving credit facility from $500.0 million to $350.0 million and extend the maturity date to September 2011. In addition, as of September 20, 2006, our direct and indirect domestic subsidiaries were released as guarantors under the credit agreement, and we no longer are subject to any investment or acquisition restrictions. This credit facility allows us to borrow at variable rates based upon the U.S. prime rate or LIBOR plus a specified credit spread. As of December 31, 2006, we had no outstanding borrowings under this agreement.

In addition, at December 31, 2006, two of our wholly owned foreign subsidiaries had a 250.0 million revolving credit facility that matures in September 2010. This credit agreement permits these foreign subsidiaries to borrow at variable rates based on EURIBOR plus a specified credit spread. We have guaranteed all obligations of the borrowers under the credit agreement. On September 20, 2006, we amended this credit agreement such that we no longer are subject to any investment or acquisition restrictions. No other terms or conditions of the agreement were modified. As of December 31, 2006, we had outstanding borrowings of 85.0 million under this agreement.

The cash balance of $575.7 million at December 31, 2006 will be used to fund ongoing operations, pay down debt, pursue acquisition opportunities and buy back shares sufficient to offset future dilution from our stock-based incentive compensation plans. Given the call premium on our long-term debt, it is unlikely that we will reduce debt significantly before our next scheduled maturity in late 2008. Therefore, it is possible that we will carry excess cash until our next scheduled maturity.

CONTRACTUAL CASH OBLIGATIONS

The following table shows our contractual cash obligations under debt agreements, leases, non-cancelable purchase commitments and other long-term liabilities at December 31, 2006:

			Payments Due by Period		
(In Millions of Dollars)	Total	2007	2008 - 2009	2010 - 2011	2012 and After
Total debt (1)	$ 1,549.1	$ 3.7	$ 582.6	$ 112.7	$ 850.1
Interest (2)	954.6	80.9	150.1	103.0	620.6
Operating leases	62.3	17.1	23.0	13.6	8.6
Non-cancelable purchase commitments (3)	178.0	77.9	86.6	9.2	4.3
Other long-term liabilities (4)(5)	88.8	64.1	8.6	0.6	15.5
Total contractual cash obligations	$ 2,832.8	$ 243.7	$ 850.9	$ 239.1	$ 1,499.1

(1) Total debt includes both the current and long-term portions of debt as reported in Note 7 to the consolidated financial statements, excluding original issue discounts and unrealized gains on derivative instruments designated as fair-value hedges of fixed-rate debt.

(2) Represents estimated contractual interest payments for fixed-rate debt only. We are not able to estimate reasonably the cash payments for interest associated with variable-rate debt due to the significant estimation required relating to both market interest rates as well as projected principal payments.

(3) Non-cancelable purchase commitments primarily include raw materials purchased under take-or-pay contracts, drumming, warehousing and

service contracts, utility purchase agreements, terminal agreements and toll processing arrangements.

(4) Other long-term liabilities disclosed in the table represent long-term liabilities reported in our consolidated balance sheet at December 31, 2006 under noncurrent liabilities, excluding pension, postretirement, postemployment, environmental and other non-contractual liabilities.

(5) We are required to make minimum contributions to our U.S. defined benefit pension plans pursuant to the minimum funding requirements of the Internal Revenue Code of 1986, as amended, and the Employee Retirement Income Security Act of 1974, as amended. Funding requirements for plans outside the United States are subject to applicable local regulations. In 2007, we expect to make employer contributions of approximately $57.7 million to the qualified plans to satisfy these minimum statutory funding requirements. In 2007, we expect to make payments of approximately $1.8 million relating to our

unfunded pension plans. The expected payments associated with the unfunded plans represent an actuarial estimate of future assumed payments based upon retirement and payment patterns. Actual amounts paid could differ from this estimate. In addition, non-pension postretirement benefit payments are expected to approximate $4.6 million in 2007. We have included these expected contributions of $64.1 million in the above table. Due to uncertainties regarding significant assumptions involved in estimating future required contributions to our defined benefit pension and other plans, such as interest rate levels, the amount and timing of asset returns and future restructurings, if any, we are not able to reasonably estimate our contributions beyond 2007.

In addition, at December 31, 2006, we had $45.7 million of contingent obligations under standby letters of credit issued in the ordinary course of business to financial institutions, customers and insurance companies to secure short-term support for a variety of commercial transactions, insurance and benefit programs.

We had $1,541.7 million of debt outstanding at December 31, 2006 compared to $1,670.8 million outstanding at December 31, 2005. Our total debt as a percent of capitalization has decreased from 51.6% at December 31, 2005 to 47.5% at December 31, 2006. We believe our future operating cash flows will be sufficient to cover our debt repayments, other contractual obligations, capital expenditures and dividends. In addition, we have untapped borrowing capacity that can provide us with additional financial resources. We currently have a shelf registration statement filed with the Securities and Exchange Commission (SEC) under which $359.8 million of debt securities, preferred shares or common shares may be issued. In addition, as of December 31, 2006, we maintained cash and short-term investment balances of $575.7 million and had $304.3 million available under our U.S. revolving credit facility and 165.0 million available under our euro revolving credit facility.

GUARANTEES

On May 1, 2006, we sold the FIIS business to SPM Group Holdings, LLC, now known as Emerald Performance Materials, LLC (Emerald). As a result of the sale, Emerald became responsible for a supplier contract with SK Corporation (SK). We have provided a guarantee to SK for the timely performance of Emerald s payment obligations. SK may make a demand for payment of outstanding obligations under this guarantee, which extends to January 31, 2008, provided they are unable to collect payment from Emerald using commercially reasonable efforts. The guarantee is revocable by us upon 60 days prior written notice. Because of the existing revocation clause, we estimate that the maximum liability under the guarantee would be approximately $15.2 million. However, we believe that it is highly unlikely that an event would occur requiring us to pay any monies pursuant to the guarantee. Accordingly, no liability has been reflected in our consolidated balance sheet at December 31, 2006.

INDEMNIFICATIONS

In connection with the sale of the FIIS business, we have provided indemnifications to Emerald with respect to the business sold. These indemnifications have been associated with the price and quantity of raw material purchases, permit costs, costs incurred due to the inability to obtain permits and environmental matters. We believe that losses incurred in any of these matters would not have a material effect on our business, financial condition or results of operations. For those indemnification agreements where a payment by us is probable and estimable, a liability has been recorded as of December 31, 2006.

CRITICAL ACCOUNTING POLICIES

The preparation of financial statements and related disclosures in accordance with accounting principles generally accepted in the United States of America requires us to make judgments, assumptions and estimates at a specific point in time that affect the amounts reported in the accompanying consolidated financial statements and related notes. In preparing these financial statements, we have utilized available information including our past history, industry standards and the current economic environment, among other factors, in forming our estimates and judgments of certain amounts included in the consolidated financial statements, giving due consideration to materiality. It is possible that the ultimate outcome as anticipated by management in formulating our estimates inherent in these financial statements may not materialize. Application of the critical accounting policies described below involves the exercise of judgment and the use of assumptions as to future uncertainties and, as a result, actual results could differ from these estimates. In addition, other companies may utilize different estimates, which may impact the comparability of our results of operations to similar businesses.

ACCOUNTING FOR RESERVES AND CONTINGENCIES

Our accounting policies for reserves and contingencies cover a wide variety of business activities, including reserves for potentially uncollectible receivables, slow-moving or obsolete inventory, legal and environmental exposures and tax exposures. We accrue these reserves when our assessments indicate that it is probable that a liability has been incurred or an asset will not be recovered and an amount can be reasonably estimated. We review these estimates quarterly based on currently available information. Actual results may differ from our estimates and our estimates may be revised upward or downward, depending upon the outcome or changed expectations based on the facts surrounding each exposure. We discuss annually with the audit committee of our board of directors our reserves and contingencies, as well as our policies and processes for evaluating them.

ACCOUNTING FOR SALES DISCOUNTS AND REBATES

Sales discounts and rebates are offered to certain customers to promote customer loyalty and to encourage greater product sales. These rebate programs provide that upon the attainment of pre-established volumes or the attainment of revenue milestones for a specified period, the customer receives credits against purchases. We estimate the provision for

rebates based upon the specific terms in each agreement at the time of shipment and an estimate of the customer s achievement of the respective revenue milestones. Customer claims, returns and allowances and discounts are accrued based upon our history of claims and sales returns and allowances. The estimated provisions significantly could be affected if future occurrences and claims differ from these assumptions and historical trends.

DETERMINATION OF NET PERIODIC PENSION COST

Each year we review with our actuaries the actuarial assumptions used in the determination of net periodic pension cost, as prescribed by SFAS No. 87, Employers Accounting for Pensions. The determination of net periodic pension cost is based upon a number of actuarial assumptions. The two most critical assumptions are the expected return on plan assets and the discount rate for determining the funded status. Other assumptions include the rate of compensation increase and demographic factors such as retirement age, mortality and turnover. We review the critical assumptions for our U.S. pension plans with the audit committee of our board of directors. Our net periodic pension cost for all pension plans was $49.8 million in 2006, $40.9 million in 2005 and $34.9 million in 2004. The net periodic pension cost included a settlement loss of $2.9 million, $0.3 million and $7.7 million in 2006, 2005 and 2004, respectively. In accordance with generally accepted accounting principles, actual results that differ from the assumptions are accumulated and amortized over future periods and, therefore, affect expense recognized and obligations recorded in future periods.

In developing our assumption for the expected long-term rate of return on plan assets, we considered historical returns and the future expectations for returns for each asset class, as well as the target asset allocation of the pension portfolio. In 2006, we lowered our assumption for the U.S. pension plans by 25 basis points to 8.25% (7.48% on a weighted-average basis for all plans) based on our investment mix and projected market conditions. We believe 8.25% represents a reasonable return that could be achieved over the long term using our current asset allocation. At December 31, 2006, our U.S. pension plans assets had an investment mix that approximated 73% in equity securities and 27% in debt securities.

A change in the rate of return of 100 basis points would have the following effects on 2007 net periodic pension cost:

	100 Basis Point	
(In Millions of Dollars)	Increase	Decrease
U.S. pension plans	$ (2.7)	$ 2.7
International pension plans	(1.9)	1.9
All pension plans	$ (4.6)	$ 4.6

The selection of a discount rate for pension plans is required to determine the value of future pension obligations and represents our best estimate of our cost in the marketplace to settle all pension obligations through annuity purchases. We determined the discount rate based upon current market indicators, including yields from dedicated bond portfolios that provide for a general matching of bond maturities with the projected benefit cash flows from our plans. The dedicated bond portfolios consist of non-callable corporate bonds that are at least AA- quality. The 2006 year-end discount rate assumption for our U.S. pension plans was set at 6.25%, which is an increase from 5.75% used in 2005. On a worldwide basis, the 2006 weighted-average discount rate utilized increased to 5.67% from 5.28% used in 2005.

A change in the discount rate of 100 basis points would have the following effects on 2007 net periodic pension cost:

(In Millions of Dollars)	100 Basis Point Increase	100 Basis Point Decrease
U.S. pension plans	$ (3.0)	$ 7.0
International pension plans	(5.2)	3.4
All pension plans	$ (8.2)	$ 10.4

The accumulated benefit obligation for all pension plans worldwide exceeds the value of plan assets by $67.1 million. This represents a $45.5 million improvement in funded status from the $112.6 million in the total unfunded accumulated benefit obligation reported in 2005. The accumulated benefit obligation exceeded the plan assets for the U.S. pension plans by $30.3 million and the non-U.S. plans by $36.8 million in 2006. The primary driver behind the $45.5 million decrease in the unfunded benefit obligations was a result of favorable investment returns during 2006.

Changes in pension plan assumptions are expected to decrease pension expense for most pension plans worldwide in 2007. The 2007 pension expense is expected to be approximately $40.2 million, excluding the impact of any settlement charges. The expected decrease in pension expense in 2007, excluding the impact of settlement charges, primarily is due to an increase in expected returns on assets due to the increase in fair value of plan assets at December 31, 2006, a reduction in the amortization of actuarial losses and the increase in the discount rate for all plans, offset by an increase in interest cost associated with an increase in the projected benefit obligation.

DETERMINATION OF POSTRETIREMENT BENEFIT COST

Annually, we review with our actuaries the key economic assumptions used in calculating postretirement benefit cost as prescribed by SFAS No. 106, Employers Accounting for Postretirement Benefits Other than Pensions. Postretirement benefits include health care and life insurance plans. The determination of postretirement benefit cost is based upon a number of actuarial assumptions, including the discount rate for determining the accumulated postretirement benefit obligation, the assumed health care cost trend rates and the ultimate health care trend rate. Except for the U.S. plans, the same discount rate selected for the pension plans generally is used for calculating the postretirement benefit obligation by country. Net non-pension postretirement benefit (credit) cost was ($1.1) million in 2006, $2.4 million in 2005 and $5.8 million in 2004.

A change in the discount rate of 100 basis points would have the following effects on 2007 postretirement benefit cost:

(In Millions of Dollars)	100 Basis Point Increase	100 Basis Point Decrease
U.S. pension plans	$ (0.4)	$ 0.4
International pension plans	(0.1)	0.1
All pension plans	$ (0.5)	$ 0.5

A change in the assumed health care cost trend rate of 100 basis points would have the following effects on 2007 postretirement benefit cost:

(In Millions of Dollars)	100 Basis Point Increase	100 Basis Point Decrease
U.S. postretirement plans	$ 1.1	$ (1.0)
International postretirement plans	0.3	(0.2)
All postretirement plans	$ 1.4	$ (1.2)

ACCOUNTING FOR BUSINESS COMBINATIONS

We allocate the purchase price of business combinations to assets acquired and liabilities assumed based on their relative fair value at the date of acquisition pursuant to the provisions of SFAS No. 141, Business Combinations. In estimating the fair value of the tangible and intangible assets and liabilities acquired, we consider information obtained during our due diligence process and utilize various valuation methods including market prices, where available, appraisals, comparisons to transactions for similar assets and liabilities and present value of estimated future cash flows. We are required to make subjective estimates in connection with these valuations and allocations.

ACCOUNTING FOR IMPAIRMENT OF LONG-LIVED ASSETS

We review the carrying value of our long-lived assets, including property and equipment, whenever events or changes in circumstances indicate that the carrying value of the assets may not be recoverable. An impairment loss exists when estimated undiscounted future cash flows expected to result from the use of the asset, including disposition, are less than the carrying value of the asset. The measurement of the impairment loss to be recognized is based on the difference between the fair value and the carrying amounts of the assets. Fair value is generally is determined based upon a discounted cash flow analysis. In order to determine if an asset has been impaired, assets are grouped and tested at the lowest level for which identifiable, independent, cash flows are available.

The determination of both undiscounted and discounted cash flows requires us to make significant estimates and considers the expected course of action at the balance sheet date. Subsequent changes in estimated undiscounted and discounted cash flows arising from changes in anticipated actions could impact the determination of whether an impairment exists, the amount of the impairment charge recorded and whether the effects could materially impact our consolidated financial statements.

DISCONTINUED OPERATIONS

The results of a component of our business that either has been disposed of or is classified as held for sale are reported in discontinued operations in accordance with the requirements of SFAS No. 144. We classify a component of our business as held for sale if it meets the following criteria as of each balance sheet date:

- We commit to a plan to sell the disposal group.
- The disposal group is available for immediate sale in its present condition, subject only to the terms that are usual and customary for sales of such disposal groups.
- An active program to locate a buyer and other actions required to complete the plan to sell have been initiated.
- The sale of the disposal group is probable and the transfer is expected to qualify for recognition as a completed sale within one year.
- The disposal group is being marketed actively for sale at a price that is reasonable in relation to its current fair value.
- Actions necessary to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

The results of operations of all entities that have been disposed of or are classified as held for sale have been classified in the (loss) income from discontinued operations net of tax line item in the consolidated statements of income for all periods presented. The 2006, 2005 and 2004 cash flow statements are presented on a consolidated basis, including both continuing operations and discontinued operations.

ACCOUNTING FOR IMPAIRMENT OF GOODWILL AND INTANGIBLE ASSETS

Goodwill represents the excess of purchase price and related costs over the value assigned to the net tangible and identifiable intangible assets of businesses acquired. In accordance with SFAS No. 142, Goodwill and Other Intangible Assets, goodwill is to be tested annually and between annual tests if events occur or circumstances change that would more likely than not reduce the fair value of an operating segment below its carrying amount. We have elected October 1 as the annual evaluation date to test for potential goodwill impairment. The annual goodwill impairment test requires us to make a number of assumptions and estimates concerning future levels of earnings and cash flow, which are based upon our strategic plans. The combination of a discounted cash flow analysis and terminal value model is used to determine the fair value of each reporting unit. While we use available information to prepare estimates and to perform the impairment evaluation, actual results could differ significantly resulting in future impairment and losses related to recorded goodwill balances. No impairment of goodwill was identified in the annual impairment test completed in 2006. (See Note 6 to the consolidated financial statements.)

Intangible assets resulting from business acquisitions, including customer lists, purchased technology, trademarks, patents, land-use rights and non-compete agreements, are amortized on a straight-line method over periods ranging from 3 to 40 years. Under SFAS No. 142, intangible assets determined to have indefinite lives are not amortized, but are tested for impairment at least annually. We have elected October 1 as the annual evaluation date to test for potential impairment of indefinite lived intangible assets. The combination of a discounted cash flow analysis and terminal value model is used to determine whether the fair value of an intangible asset exceeds its carrying amount. As part of the annual impairment test, the non-amortized intangible assets are reviewed to determine if the indefinite status remains appropriate.

We completed a corporate identity review in the fourth quarter of 2006 and made a final determination in January 2007 that the trade name Noveon no longer would be used to describe the specialty chemicals business segment of our company and that its use would be discontinued except in connection with the consumer specialties product line. As a result, an impairment charge for the Noveon trade name was recognized in accordance with SFAS No. 142. We calculated a pretax charge of $41.2 million ($25.4 million after-tax) to reduce the related asset to its estimated fair value. This charge was reflected in the fourth quarter of 2006 as we believed at that time we would more likely than not discontinue the use of the Noveon trade name, except in the limited context of the consumer specialties product line.

ASSET-RETIREMENT OBLIGATIONS

We account for asset retirement obligations in accordance with SFAS No. 143, Accounting for Asset Retirement Obligations and Financial Accounting Standards Board (FASB) Interpretation (FIN) No. 47, Accounting for Conditional Asset-Retirement Obligations an interpretation of FASB Statement No. 143. FIN No. 47 requires the recognition of a liability for the fair value of a legal obligation to perform asset-retirement obligations (AROs) that are conditional on a future event if the amount can be reasonably estimated. We have identified AROs related to certain of our leased facilities and to asbestos remediation activities that may be required at other company-owned facilities in the future. We record liabilities for AROs at the time that they are identified and when they can be reasonably estimated. Due to the long-term, productive nature of some of our manufacturing operations, absent plans or expectation of plans to initiate asset retirement activities, we are unable to reasonably estimate the fair value of such asbestos remediation liabilities since the potential settlement dates cannot be determined at this time.

NEW ACCOUNTING STANDARDS

SFAS No. 158

In September 2006, the FASB issued SFAS No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans an amendment of FASB Statements No. 87, 88, 106, and 132(R). This statement requires an

employer to recognize a plan s funded status in its statement of financial position, measure a plan s assets and obligations as of the end of the employer s fiscal year and recognize the changes in a plan s funded status in comprehensive income in the year in which the changes occur. SFAS No. 158 s requirement to recognize a plan s funded status and new disclosure requirements are effective for us as of December 31, 2006. The requirement to measure plan assets and benefit obligations as of the date of our fiscal year-end statement of financial position is effective for fiscal years ending after December 15, 2008. Currently, we measure plan assets and benefit obligations as of the date of our fiscal year-end. We adopted the required provisions of SFAS No. 158 on December 31, 2006.
The incremental effects of adopting SFAS No. 158 on our consolidated balance sheet at December 31, 2006 were as follows:

	Balance Before Applying SFAS No. 158	SFAS No. 158 Adjustments	Balance After Applying SFAS No. 158
Current assets:			
Other current assets	$ 104.9	$ (6.9)	$ 98.0
Noncurrent assets:			
Other assets	$ 61.0	$ 1.0	$ 62.0
Intangible assets net	$ 326.6	$ (3.8)	$ 322.8
Total assets	$4,395.9	$ (9.7)	$4,386.2
Current liabilities:			
Accrued expenses and other current liabilities	$ 286.8	$ 1.0	$ 287.8
Noncurrent liabilities:			
Pension obligations	$ 130.1	$ 88.4	$ 218.5
Other postretirement benefit obligations	$ 96.3	$(14.3)	$ 82.0
Deferred income taxes	$ 116.2	$(27.3)	$ 88.9
Total liabilities	$2,578.3	$ 47.8	$2,626.1
Accumulated other comprehensive income (loss)	$ 4.6	$(57.5)	$ (52.9)
Total shareholders equity	$1,764.9	$(57.5)	$1,707.4

SFAS No. 157

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements. This statement defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles (GAAP) and expands disclosure about fair value measurements. SFAS No. 157 does not expand the use of fair value measures in financial statements, but simplifies and codifies related guidance within GAAP. SFAS No. 157 establishes a fair value hierarchy using observable market data as the highest level and an entity s own fair value assumptions as the lowest level. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007 and interim periods within those years. SFAS No. 157 requires adoption prospectively as of the beginning of the fiscal year in which this statement is initially applied, with the exception of certain financial instruments in which adoption is applied retrospectively as of the beginning of the fiscal year in which this statement is initially applied. We currently are evaluating the impact of this recently issued standard on our consolidated financial statements.

SAB No. 108

In September 2006, the SEC released Staff Accounting Bulletin (SAB) No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements. This bulletin provides

guidance on how the effects of prior-year uncorrected financial statement misstatements should be considered in quantifying a current-year misstatement. SAB No. 108 requires registrants to quantify misstatements using both an income statement (rollover) and balance sheet (iron curtain) approach and evaluate whether either approach results in a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. If prior-year errors that previously had been considered immaterial now are considered material based on either approach, no restatement is required so long as management properly applied its previous approach and all relevant facts and circumstances were considered. If prior years are not restated, a cumulative-effect adjustment is recorded in opening accumulated earnings as of the beginning of the fiscal year of adoption. SAB No. 108 is effective for us for the fiscal year ending December 31, 2006. Our adoption of this standard did not have an impact on our consolidated financial statements.

FIN No. 48

In July 2006, the FASB issued FIN No. 48, Accounting for Uncertainty in Income Taxes, that prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Under FIN No. 48, a contingent tax asset only will be recognized if it is more likely than not that a tax position ultimately will be sustained. After this threshold is met, a tax position is reported at the largest amount of benefit that is more likely than not to be realized. FIN No. 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods and disclosure. FIN No. 48 is effective for fiscal years beginning after December 15, 2006. FIN No. 48 requires the cumulative effect of applying the provisions to be reported separately as an adjustment to the opening balance of retained earnings in the year of adoption. We currently are evaluating the impact of this recently issued Interpretation on our consolidated financial statements.

SFAS No. 154

In May 2005, the FASB issued SFAS No. 154, Accounting Changes and Error Corrections. This standard establishes new standards on accounting for changes in accounting principles. Pursuant to the new rules, all such changes must be accounted for by retrospective application to the financial statements of prior periods unless it is impracticable to do so. SFAS No. 154 completely replaces Accounting Principles Board (APB) Opinion No. 20, Accounting Changes, and SFAS No. 3, Reporting Accounting Changes in Interim Financial Statements, though it carries forward the guidance in those pronouncements with respect to accounting for changes in estimates, changes in the reporting entity and the correction of errors. This statement is effective for accounting changes and corrections of errors beginning January 1, 2006. Our adoption of this standard did not have a material impact on our consolidated financial statements.

SFAS No. 123R

In December 2004, the FASB issued SFAS No. 123R. This standard requires compensation costs related to share-based payment transactions to be recognized in the financial statements. With limited exceptions, the amount of compensation cost is measured based on the grant-date fair value of the equity or liability instruments issued. In addition, liability awards are remeasured each reporting period. Compensation cost is recognized over the period that an employee provides service in exchange for the award. This standard replaces SFAS No. 123, Accounting for Stock-Based Compensation, and supersedes APB Opinion No. 25, Accounting for Stock Issued to Employees, and applies to all awards granted, modified, repurchased or cancelled after July 1, 2005. In April 2005, the SEC amended the compliance date of SFAS No. 123R through an amendment of Regulation S-X. We adopted SFAS No. 123R on January 1, 2006. The adoption of SFAS No. 123R incrementally increased before-tax compensation expense by approximately $2.4 million during 2006.

SFAS No. 151

In November 2004, the FASB issued SFAS No. 151, Inventory Costs, to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs and wasted material. This standard requires that such items be recognized as current-period charges. The standard also establishes the concept of normal capacity and requires the allocation of fixed-production overhead to inventory based on the normal capacity of the production facilities. Any

unallocated overhead must be recognized as an expense in the period incurred. This standard was effective for inventory costs incurred beginning January 1, 2006. The adoption of this standard did not have a material impact on our consolidated financial statements.

CAUTIONARY STATEMENTS FOR SAFE HARBOR PURPOSES

This Management s Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements within the meaning of the federal securities laws. As a general matter, forward-looking statements are those focused upon future plans, objectives or performance as opposed to historical items and include statements of anticipated events or trends and expectations and beliefs relating to matters not historical in nature. Forward-looking statements are subject to uncertainties and factors relating to our operations and business environment, all of which are difficult to predict and many of which are beyond our control. These uncertainties and factors could cause our actual results to differ materially from those matters expressed in or implied by any forward-looking statements, although we believe our expectations reflected in those forward-looking statements are based upon reasonable assumptions. For this purpose, any statements contained herein that are not statements of historical fact should be deemed to be forward-looking statements.

We believe that the following factors, among others, could affect our future performance and cause our actual results to differ materially from those expressed or implied by forward-looking statements made in this annual report:

- The cost, availability and quality of raw materials, especially petroleum-based products.

- Our ability to sustain profitability of our products in a competitive environment.

- The demand for our products as influenced by factors such as the global economic environment, longer-term technology developments and the success of our commercial development programs.

- The risks of conducting business in foreign countries, including the effects of fluctuations in currency exchange rates upon our consolidated results and political, social, economic and regulatory factors.

- The extent to which we are successful in expanding our business in new and existing markets and in identifying, understanding and managing the risks inherent in those markets.

- The effect of required principal and interest payments on our ability to fund capital expenditures and acquisitions and to meet operating needs.

- Our ability to identify, complete and integrate acquisitions for profitable growth and operating efficiencies.

- Our success at continuing to develop proprietary technology to meet or exceed new industry performance standards and individual customer expectations.

- Our ability to implement a new common information systems platform primarily into our Lubrizol Advanced Materials segment successfully, including the management of project costs, its timely completion and realization of its benefits.

- Our ability to continue to reduce complexities and conversion costs and modify our cost structure to maintain and enhance our competitiveness.

- Our success in retaining and growing the business that we have with our largest customers.

- The cost and availability of energy, especially natural gas and electricity.

- The effect of interest rate fluctuations on our net interest expense.

- The risk of weather-related disruptions to our Lubrizol Additives production facilities located near the U.S. Gulf coast.

Significant changes in government regulations affecting environmental compliance.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We operate manufacturing and blending facilities, laboratories and offices around the world and utilize fixed-rate and variable-rate debt to finance our global operations. As a result, we are subject to business risks inherent in non-U.S. activities, including political and economic uncertainties, import and export limitations, and market risks related to changes in interest rates and foreign currency exchange rates. We believe the political and economic risks related to our foreign operations are mitigated due to the stability of the countries in which our largest foreign operations are located.

In the normal course of business, we use derivative financial instruments including interest rate and commodity hedges and forward foreign currency exchange contracts to manage our market risks. Our objective in managing our exposure to changes in interest rates is to limit the impact of such changes on our earnings and cash flow. Our objective in managing the exposure to changes in foreign currency exchange rates is to reduce volatility on our earnings and cash flow associated with such changes. Our principal currency exposures are the euro, the pound sterling, the Japanese yen and certain Latin American currencies. Our objective in managing our exposure to changes in commodity prices is to reduce the volatility on earnings of utility expense. We do not hold derivatives for trading purposes.

We measure our market risk related to our holdings of financial instruments based on changes in interest rates, foreign currency rates and commodity prices utilizing a sensitivity analysis. The sensitivity analysis measures the potential loss in fair value, cash flow and earnings based on a hypothetical 10% change (increase and decrease) in interest, currency exchange rates and commodity prices. We use current market rates on our debt and derivative portfolios to perform the sensitivity analysis. Certain items such as lease contracts, insurance contracts and obligations for pension and other postretirement benefits are not included in the analysis.

Our primary interest rate exposures relate to our cash and short-term investments, fixed-rate and variable-rate debt and interest rate swaps. The calculation of potential loss in fair value is based on an immediate change in the net present values of our interest rate-sensitive exposures resulting from a 10% change in interest rates. The potential loss in cash flow and income before tax is based on the change in the net interest income/expense over a one-year period due to an immediate 10% change in rates. A hypothetical 10% increase in interest rates would have had a favorable impact and a hypothetical 10% decrease in interest rates would have had an unfavorable impact on fair values of $41.1 million and $42.7 million at December 31, 2006 and 2005, respectively. In addition, a hypothetical 10% increase in interest rates would have had an unfavorable impact and a hypothetical 10% decrease in interest rates would have had a favorable impact on cash flows and income before tax of $1.6 million and $1.8 million in 2006 and 2005, respectively.

Our primary currency exchange rate exposures are to foreign currency-denominated debt, intercompany debt, cash and short-term investments and forward foreign currency exchange contracts. The calculation of potential loss in fair value is based on an immediate change in the U.S. dollar equivalent balances of our currency exposures due to a 10% shift in exchange rates. The potential loss in cash flow and income before tax is based on the change in cash flow and income before tax over a one-year period resulting from an immediate 10% change in currency exchange rates. A hypothetical 10% increase in currency exchange rates would have had an unfavorable impact and a hypothetical 10% decrease in currency exchange rates would have had a favorable impact on fair values of $3.5 million at December 31, 2006. In addition, a hypothetical 10% increase in currency exchange rates would have had a favorable impact and a hypothetical 10% decrease in currency exchange rates would have had an unfavorable impact on fair values of $6.8 million at December 31, 2005. Further, a hypothetical 10% increase in currency exchange rates would have had an unfavorable impact and a hypothetical 10% decrease in currency exchange rates would have had a favorable impact on cash flows of $21.1 million and $21.4 million and on income before tax of $4.0 million and $4.4 million in 2006 and 2005, respectively.

Our primary commodity hedge exposures relate to natural gas and electric utility expenses. The calculation of potential loss in fair value is based on an immediate change in the U.S. dollar equivalent balances of our commodity exposures due to a 10% shift in the underlying commodity prices. The potential loss in cash flow and income before tax is based on the change in cash flow and income before tax over a one-year period resulting from an immediate 10% change in commodity prices. A hypothetical 10% increase in commodity prices would have had a favorable impact and a hypothetical 10% decrease in commodity prices would have had an unfavorable impact on fair values, cash flows and income before tax of $1.3 million and $0.9 million in 2006 and 2005, respectively.

MANAGEMENT S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of The Lubrizol Corporation and its subsidiaries (the Company) is responsible for establishing and maintaining adequate internal control over financial reporting. The Lubrizol Corporation s internal control system was designed to provide reasonable assurance to the Company s management and board of directors regarding the preparation and fair presentation of published financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

The Lubrizol Corporation s management assessed the effectiveness of the Company s internal control over financial reporting as of December 31, 2006. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control Integrated Framework.* Based on this assessment, management believes that, as of December 31, 2006, the Company s internal control over financial reporting is effective based on those criteria.

Management s assessment of the effectiveness of internal control over financial reporting as of December 31, 2006 has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, who expressed an unqualified opinion as stated in their report, a copy of which is included in this annual report.

NEW YORK STOCK EXCHANGE CERTIFICATIONS

On April 25, 2006, James L. Hambrick, as chief executive officer, certified, as required by Section 303A.12(a) of the New York Stock Exchange (NYSE) Listed Company Manual, that as of that date he was not aware of any violations by the Company of the NYSE s Corporate Governance listing standards. This certification has been delivered to the NYSE.

The chief executive officer and chief financial officer certifications created by Section 302 of the Sarbanes-Oxley Act of 2002 are included as exhibits to our Form 10-K and are incorporated herein by reference.

REPORTS OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors of
The Lubrizol Corporation

We have audited management s assessment, included in the accompanying Management s Report on Internal Control Over Financial Reporting, that The Lubrizol Corporation and subsidiaries (the Company) maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management s assessment and an opinion on the effectiveness of the Company s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management s assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company s internal control over financial reporting is a process designed by, or under the supervision of, the company s principal executive and principal financial officers, or persons performing similar functions, and effected by the company s board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company s assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management s assessment that the Company maintained effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on the criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on the criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2006 of the Company and our report dated February 28, 2007 expressed an unqualified opinion on those financial statements and included an explanatory paragraph regarding the Company s adoption of new accounting standards.

REPORTS OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM (continued)

To the Shareholders and Board of Directors of
The Lubrizol Corporation

We have audited the accompanying consolidated balance sheets of The Lubrizol Corporation and subsidiaries (the Company) as of December 31, 2006 and 2005, and the related consolidated statements of income, shareholders equity, and cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of The Lubrizol Corporation and subsidiaries at December 31, 2006 and 2005, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2006, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Notes 2 and 16 to the consolidated financial statements, the Company changed its method of accounting for stock-based compensation with the adoption of Statement of Financial Accounting Standards (SFAS) No. 123R, Share-Based Payment effective January 1, 2006. Also, as discussed in Note 13 to the consolidated financial statements, the Company changed its method of accounting for defined pension and other postretirement plans with the adoption of SFAS No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans effective December 31, 2006.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company s internal control over financial reporting as of December 31, 2006, based on the criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 28, 2007 expressed an unqualified opinion on management s assessment of the effectiveness of the Company s internal control over financial reporting and an unqualified opinion on the effectiveness of the Company s internal control over financial reporting.

The accompanying notes are an integral part of these consolidated financial statements.

Notes to Financial Statements
(In Millions Except Per Share Data)
Note 1 NATURE OF OPERATIONS
The Lubrizol Corporation (the company) is an innovative specialty chemical company that produces and supplies technologies that improve the quality and performance of its customers products in the global transportation, industrial and consumer markets. These technologies include lubricant additives for engine oils, other transportation-related fluids and industrial lubricants, as well as additives for gasoline and diesel fuel. In addition, the company makes ingredients and additives for personal care products and pharmaceuticals; engineered polymers, including plastics technology; and performance coatings in the form of specialty resins and additives.
The company is organized into two operating and reporting segments: Lubrizol Additives (formerly known as the Lubricant Additives segment) and Lubrizol Advanced Materials (formerly known as the Specialty Chemicals segment). Refer to Note 15 for a further description of the nature of the company s operations, the product lines within each of the operating segments, segment operating income and related financial disclosures for the reportable segments.
Note 2 SIGNIFICANT ACCOUNTING POLICIES
CONSOLIDATION The consolidated financial statements include the accounts of the company and its consolidated subsidiaries. The company consolidates certain entities in which it owns less than a 100% equity interest if it is either deemed to be the primary beneficiary in a variable interest entity, as defined in Financial Accounting Standards Board (FASB) Interpretation (FIN) No. 46 (revised December 2003), Consolidation of Variable Interest Entities or where its ownership interest is at least 50% and the company has effective management control. The equity method of accounting is applied to non-consolidated entities in which the company can exercise significant influence over the entity with respect to its operations and major decisions. The book value of investments carried on the equity method was $6.3 million and $6.1 million at December 31, 2006 and 2005, respectively. Investments carried at cost were $1.4 million and $1.5 million at December 31, 2006 and 2005, respectively.
DISCONTINUED OPERATIONS The results of a component of the company that either has been disposed of or is classified as held for sale are reported in discontinued operations in accordance with the requirements of Statement of Financial Accounting Standards (SFAS) No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets. A component of an entity is classified as held for sale when the transaction has been approved by the appropriate level of management and there are no known significant contingencies outstanding that would prevent the sale from closing within one year. The results of operations of all entities that have been disposed of or that are classified as held for sale in 2006 and 2005 have been classified as discontinued operations in all periods presented in the consolidated statements of income. The 2006, 2005 and 2004 cash flow statements are presented on a consolidated basis, including both continuing operations and discontinued operations.
USE OF ESTIMATES The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.
CASH EQUIVALENTS The company invests its excess cash in short-term investments with various banks and financial institutions. Short-term investments are cash equivalents, as they are part of the cash management activities of the company and are comprised of investments having maturities of three months or less when purchased.
INVENTORIES Inventories are stated at the lower of cost or market value. Cost of inventories is determined by either the first-in, first-out (FIFO) method or the moving-average method, except in the United States for chemical inventories, which primarily are valued using the last-in, first-out (LIFO) method.

The company accrues volume discounts on purchases from vendors where it is probable that the required volume will be attained and the amount can be reasonably estimated. The company records the discount as a reduction in the cost of the purchase (generally raw materials), based on projected purchases over the purchase agreement period.

In November 2004, the FASB issued SFAS No. 151, Inventory Costs, to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs and wasted material. This standard requires that such items be recognized as current-period charges. The standard also establishes the concept of normal capacity and requires the allocation of fixed production overhead to inventory based on the normal capacity of the production facilities. Any unallocated overhead must be recognized as an expense in the period incurred. This standard was effective for inventory costs incurred beginning on January 1, 2006. The company s adoption of this standard did not have a material impact on its financial position, results of operations or cash flows.

PROPERTY AND EQUIPMENT Property and equipment are carried at cost. Repair and maintenance costs are charged against income while renewals and betterments are capitalized as additions to the related assets. Costs incurred for computer software developed or obtained for internal use are capitalized for application development activities and immediately expensed for preliminary project activities or post-implementation activities. Accelerated depreciation methods, which are used in computing depreciation on certain machinery and equipment, comprised approximately 6% of the depreciable assets at December 31, 2006 and 2005. The remaining assets are depreciated using the straight-line method. The estimated useful lives are 10 to 40 years for buildings and improvements for buildings and land. Estimated useful lives range from 3 to 20 years for machinery and equipment.

IMPAIRMENT OR DISPOSAL OF LONG-LIVED ASSETS The company reviews the carrying value of its long-lived assets, including property and equipment, whenever events or changes in circumstances indicate that the carrying value of the assets may not be recoverable. An impairment loss exists when estimated undiscounted future cash flows expected to result from the use of the asset, including disposition, are less than the carrying value of the asset. The measurement of the impairment loss to be recognized is based on the difference between the fair value and the carrying amounts of the assets. Fair value is generally determined based on a discounted cash flow analysis. In order to determine if an asset has been impaired, assets are grouped and tested at the lowest level for which identifiable, independent, cash flows are available.

GOODWILL AND INTANGIBLE ASSETS Goodwill represents the excess of purchase price and related costs over the value assigned to the net tangible and identifiable intangible assets of businesses acquired and is not amortized in accordance with SFAS No. 142, Goodwill and Other Intangible Assets. Goodwill is tested for impairment annually, and between annual tests if an event occurs or circumstances change that indicates the carrying amount may be impaired. The company has elected to perform its annual tests for potential impairment of goodwill and indefinite-lived intangible assets as of October 1 of each year. Impairment testing is performed at the reporting unit level. An impairment loss generally would be recognized when the carrying amount of the reporting unit s net assets exceeds the estimated fair value of the reporting unit. The estimated fair value of a reporting unit is determined through a combination of discounted cash flow analysis and terminal value calculations.

Intangible assets resulting from business acquisitions, including customer lists, purchased technology, trademarks, patents, land-use rights and non-compete agreements, are amortized on a straight-line method over periods ranging from 3 to 40 years. Under SFAS No. 142, intangible assets determined to have indefinite lives are not amortized, but are tested for impairment at least annually. As part of the annual impairment test, the non-amortized intangible assets are reviewed to determine if the indefinite status remains appropriate.

DEFERRED FINANCING COSTS Costs incurred with the issuance of debt and credit facilities are capitalized and amortized over the life of the associated debt as a component of interest expense using the effective interest method of amortization. In June 2004, the company initially financed the Noveon International, Inc. acquisition with a temporary bridge facility. Fees associated with the bridge facility were capitalized and amortized over the bridge financing period. A total of $11.2 million was incurred in bridge facility fees in June 2004. These fees were expensed ratably through September 2004 when the bridge facility was repaid in full. In September 2004, the company incurred $16.8 million in debt issuance costs and fees relating to the issuance of $1,150.0 million in senior notes and debentures, and a $1,075.0 million five-year credit facility. Such costs are being amortized under

the effective interest method over the respective terms of the debt. Net deferred financing costs were $15.7 million and $18.3 million at December 31, 2006 and 2005, respectively. Amortization expense incurred in 2006, 2005 and 2004 was $2.9 million, $3.6 million and $1.6 million, respectively.

ENVIRONMENTAL LIABILITIES The company accrues for expenses associated with environmental remediation obligations when such expenses are probable and reasonably estimable, based upon current law and existing technologies. These accruals are adjusted as further information develops or circumstances change. Costs of future expenditures for environmental remediation obligations are not discounted to their present value.

SHARE REPURCHASES The company uses the par-value method of accounting for its treasury shares. Under this method, the cost to reacquire shares in excess of paid-in capital related to those shares is charged against retained earnings.

FOREIGN CURRENCY TRANSLATION The assets and liabilities of the company s international subsidiaries are translated into U.S. dollars at exchange rates in effect at the balance sheet date, while revenues and expenses are translated at weighted-average exchange rates in effect during the period. Unrealized translation adjustments are recorded as a component of accumulated other comprehensive income or loss in the consolidated statements of shareholders equity, except for subsidiaries for which the functional currency is other than the local currency, where translation adjustments are recognized in income. Transaction gains or losses that arise from exchange rate changes on transactions denominated in a currency other than the functional currency, except those transactions that function as a hedge of an identifiable foreign currency commitment or as a hedge of a foreign currency investment, are included in income as incurred.

REVENUE RECOGNITION Revenues are recognized at the time of shipment of products to customers, or at the time of transfer of title, if later, and when collection is reasonably assured. All amounts in a sales transaction billed to a customer related to shipping and handling are reported as revenues.

Provisions for sales discounts and rebates to customers are recorded, based upon the terms of sales contracts, in the same period the related sales are recorded, as a deduction to the sale. Sales discounts and rebates are offered to certain customers to promote customer loyalty and encourage greater product sales. These rebate programs provide that upon the attainment of pre-established volumes or the attainment of revenue milestones for a specified period, the customer receives credits against purchases. The company estimates the provision for rebates based on the specific terms in each agreement at the time of shipment and an estimate of the customer s achievement of the respective revenue milestones.

COMPONENTS OF COST OF SALES Cost of sales is comprised of raw material costs including freight and duty, inbound handling costs associated with the receipt of raw materials, direct production, maintenance and utility costs, plant and engineering overhead, terminals and warehousing costs, and outbound shipping and handling costs.

RESEARCH, TESTING AND DEVELOPMENT Research, testing and development costs are expensed as incurred. Research and development expenses, excluding testing, were $135.3 million in 2006, $128.1 million in 2005 and $103.7 million in 2004. Costs to acquire in-process research and development (IPR&D) projects that have no alternative future use and that have not yet reached technological feasibility at the date of acquisition are expensed upon acquisition.

INCOME TAXES The company provides for income taxes in accordance with SFAS No. 109, Accounting for Income Taxes. SFAS No. 109 requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the financial statement carrying amounts and the tax bases of the assets and liabilities.

In June 2006, the FASB issued FIN No. 48, Accounting for Uncertainty in Income Taxes, that prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Under FIN No. 48, a contingent tax asset only will be recognized if it is more likely than not that a tax position ultimately will be sustained. After this threshold is met, a tax position is reported at the largest amount of benefit that is more likely than not to be realized. FIN No. 48 also provides guidance on derecognition, classification,

interest and penalties, accounting in interim periods and disclosure. FIN No. 48 is effective for fiscal years beginning after December 15, 2006. This Interpretation requires the cumulative effect of applying the provisions to be reported separately as an adjustment to the opening balance of retained earnings in the year of adoption. We currently are evaluating the impact of this recently issued Interpretation on our consolidated financial statements.

PER SHARE AMOUNTS Net income per share is computed by dividing net income by average common shares outstanding during the period, including contingently issuable shares. Net income per diluted share includes the dilutive impact resulting from outstanding stock options and awards. Per share amounts are computed as follows:

	2006	2005	2004
Numerator:			
Income from continuing operations	$ 181.8	$ 161.5	$ 87.2
(Loss) income from discontinued operations net of tax	(76.2)	27.8	6.3
Net income	$ 105.6	$ 189.3	$ 93.5
Denominator:			
Weighted-average common shares outstanding	68.7	67.9	55.7
Dilutive effect of stock options and awards	0.6	0.9	0.3
Denominator for net income per share, diluted	69.3	68.8	56.0
Basic earnings (loss) per share:			
Continuing operations	$ 2.65	$ 2.38	$ 1.57
Discontinued operations	(1.11)	0.41	0.11
Net income per share, basic	$ 1.54	$ 2.79	$ 1.68
Diluted earnings (loss) per share:			
Continuing operations	$ 2.62	$ 2.35	$ 1.56
Discontinued operations	(1.10)	0.40	0.11
Net income per share, diluted	$ 1.52	$ 2.75	$ 1.67

There were no shares excluded from the diluted earnings per share calculations because they were antidilutive in 2006 and 2005. There were 1.1 million weighted-average shares issuable upon the exercise of stock options and awards that were excluded from the diluted earnings per share calculation because they were antidilutive in 2004.

ACCOUNTING FOR DERIVATIVE INSTRUMENTS Derivative financial instruments are recognized on the balance sheet as either assets or liabilities and are measured at fair value. Derivatives that are not hedges are adjusted to fair value through income. Depending upon the nature of the hedge, changes in fair value of the derivative are either offset against the change in fair value of assets, liabilities or firm commitments through earnings or recognized in other comprehensive income or loss until the hedged item is recognized in earnings. The ineffective portion of a derivative s change in value is recognized immediately in earnings. The company only uses derivative financial instruments to manage well-defined interest rate, foreign currency and commodity price risks. The company does not use derivatives for trading purposes.

COSTS ASSOCIATED WITH EXIT OR DISPOSAL ACTIVITIES Liabilities for costs associated with exit or disposal activities are recognized and measured initially at fair value when the liability is incurred pursuant to the requirements of SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities.

ASSET-RETIREMENT OBLIGATIONS The company accounts for asset retirement obligations in accordance with SFAS No. 143, Accounting for Asset Retirement Obligations and FIN No. 47, Accounting for Conditional Asset-Retirement Obligations an interpretation of FASB Statement No. 143. FIN No. 47 requires the recognition of a liability for the fair value of a legal obligation to perform asset-retirement obligations (AROs) that are conditional on a future event if the amount can be reasonably estimated. The company has identified AROs related to certain of our leased facilities and to asbestos remediation activities that may be required in the future. However, due to the long-term, productive nature of the company s manufacturing operations, absent plans or expectation of plans to initiate asset

retirement activities, the company is unable to reasonably estimate the fair value of such asbestos remediation liabilities since the potential settlement dates cannot be determined at this time.

GUARANTEES FIN No. 45, Guarantor s Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others requires the recognition of a liability for any guarantees entered into or modified. At December 31, 2006, the company had guaranteed the timely performance of payment obligations under supplier contracts by a third-party purchaser of the company s food ingredients and industrial specialties (FIIS) business. The company believes that it is highly unlikely that an event would occur requiring the company to pay any monies pursuant to the guarantee. Accordingly, no liability has been reflected in the accompanying consolidated balance sheet at December 31, 2006 (see Note 18). The company did not have any other material guarantees within the scope of FIN No. 45 at December 31, 2006 and 2005, respectively.

STOCK-BASED COMPENSATION Effective January 1, 2006, the company adopted the fair value recognition provisions of SFAS No. 123R, Share-Based Payment, using the modified prospective transition method and therefore has not restated results for prior periods. Under this transition method, stock-based compensation expense for 2006 includes compensation expense for all stock-based compensation awards granted prior to, but not yet vested as of, January 1, 2006, based on the grant-date fair value estimated in accordance with the original provisions of SFAS No. 123, Accounting for Stock-Based Compensation. Stock-based compensation expense for all stock-based compensation awards granted after January 1, 2006 is based on the grant-date fair value estimated in accordance with the provisions of SFAS No. 123R. The company recognizes these compensation costs, net of a forfeiture rate, on a straight-line basis over the requisite service period of the award, which generally is the option vesting term of three years with the options becoming exercisable 50% one year after date of grant, 75% after two years and 100% after three years. The company estimates the forfeiture rate based on its historical experience during the preceding 10 years.

The following table shows the pro forma effect on net income and earnings per share if the company had applied the fair-value recognition provisions of SFAS No. 123, Accounting for Stock-Based Compensation, to stock-based employee compensation for 2005 and 2004. There is no pro forma presentation necessary after December 31, 2005 as the company adopted the fair value recognition provisions of SFAS No. 123R on January 1, 2006.

	2005	2004
Reported net income	$ 189.3	$ 93.5
Plus: Stock-based employee compensation (net of tax) included in net income	5.5	2.1
Less: Stock-based employee compensation (net of tax) using the fair value method	(6.5)	(6.0)
Pro forma net income	$ 188.3	$ 89.6
Reported net income per share, basic	$ 2.79	$ 1.68
Pro forma net income per share, basic	$ 2.77	$ 1.61
Reported net income per share, diluted	$ 2.75	$ 1.67
Pro forma net income per share, diluted	$ 2.74	$ 1.60

FAIR VALUE MEASUREMENTS In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements. This statement defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles (GAAP) and expands disclosure about fair value measurements. SFAS No. 157 does not expand the use of fair value measures in financial statements, but simplifies and codifies related guidance within GAAP. SFAS No. 157 establishes a fair value hierarchy from observable market data as the highest level to fair value based on an entity s own fair value assumptions as the lowest level. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007 and interim periods within those years. SFAS No. 157 requires adoption prospectively as of the beginning of the fiscal year in which this statement is initially applied, with the exception of certain financial instruments, in which adoption is applied retrospectively as of the beginning of the fiscal year in which this statement is initially applied. The company is currently evaluating the impact of this recently issued standard on its consolidated financial statements.

ACCOUNTING CHANGES AND ERROR CORRECTIONS In September 2006, the Securities and Exchange Commission (SEC) released Staff Accounting Bulletin (SAB) No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements. SAB No. 108 provides guidance on how the effects of prior-year uncorrected financial statement misstatements should be considered in quantifying a current-year misstatement. SAB No. 108 requires registrants to quantify misstatements using both an income statement (rollover) and balance sheet (iron curtain) approach and evaluate whether either approach results in a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. If prior-year errors that previously had been considered immaterial now are considered material based on either approach, no restatement is required so long as management properly applied its previous approach and all relevant facts and circumstances were considered. If prior years are not restated, a cumulative-effect adjustment is recorded in opening accumulated earnings as of the beginning of the fiscal year of adoption. SAB No. 108 is effective for us for the fiscal year ending December 31, 2006. The company s adoption of this standard did not have a material impact on its consolidated financial statements.

In May 2005, the FASB issued SFAS No. 154, Accounting Changes and Error Corrections. This standard establishes new standards on accounting for changes in accounting principles. Pursuant to the new rules, all such changes must be accounted for by retrospective application to the financial statements of prior periods unless it is impracticable to do so. SFAS No. 154 completely replaces Accounting Principles Board (APB) Opinion No. 20 and SFAS No. 3, though it carries forward the guidance in those pronouncements with respect to accounting for changes in estimates, changes in the reporting entity, and the correction of errors. This statement is effective for accounting changes and corrections of errors beginning January 1, 2006. The company s adoption of this standard did not have a material impact on its consolidated financial statements.

RECLASSIFICATIONS Certain prior period amounts have been reclassified to conform to the current year presentation.

Note 3 ACQUISITIONS

On February 7, 2007, the company completed the acquisition of a broad line of additive products used in the metalworking markets worldwide from Lockhart Chemical Company (Lockhart), a private company with headquarters in Gibsonia, Pennsylvania. Lockhart is recognized in the metalworking industry for its application and formulation capabilities and quality products. The company purchased Lockhart s entire metalworking product line, which includes: natural, synthetic and gelled sulfonates; emulsifier packages; corrosion inhibitors and lubricity agents; grease additives; oxidates; esters; soap; semi-finished coatings; and rust preventatives. In 2006, these product lines had annualized revenues of approximately $20.0 million.

On June 3, 2004, the company completed the acquisition of Noveon International for cash of $920.2 million (inclusive of $32.9 million in certain seller expenses) plus transaction costs of $11.4 million and less cash acquired of $103.0 million. In addition, the company assumed $1,103.1 million of long-term indebtedness from Noveon International.

The acquisition and related costs initially were financed with the proceeds of a $2,450.0 million 364-day bridge credit facility. Shortly after the acquisition, the company repaid substantially all of the assumed long-term debt of Noveon International with proceeds of the temporary bridge loan. In addition, the temporary bridge loan was repaid in full in September 2004 with the proceeds from the permanent financing obtained by the issuance of senior notes, debentures and equity and the borrowing of $575.0 million of bank term loans, resulting in proceeds of approximately $2,170.0 million, net of underwriting commissions, discounts and transaction costs. The company recorded the various assets acquired and liabilities assumed, primarily working capital accounts, of Noveon International at their estimated fair values determined as of the acquisition date under the purchase method of accounting. Actuarial valuations were completed for the projected pension and other post-employment benefit obligations and were reflected in the purchase price allocation. Appraisals of long-lived assets and identifiable intangible assets, including an evaluation of IPR&D projects, also were obtained.

The purchase price included the estimated fair value of IPR&D projects totaling $34.0 million that, as of the acquisition date, had not yet reached technological feasibility and had no alternative future use. As a result, the full amount allocated to IPR&D was expensed in 2004. There were nine projects acquired in the Noveon International transaction in several different product lines. The projects were at varying stages of completeness ranging from the early development stage to

prototype testing at the time of acquisition. The inventory step-up to fair value totaled $24.2 million, of which $9.8 million was expensed in 2004. As the remaining step-up relates to inventories accounted for on the LIFO method of accounting, the company does not anticipate that additional amounts of step-up will be expensed in the near term.

The 2004 historical results of the company include revenues and expenses of Noveon International since the date of acquisition.

In January 2004, the company completed the acquisition of the coatings hyperdispersants business from Avecia for cash totaling $129.7 million, including transaction costs of $2.2 million. This business is headquartered in Blackley, United Kingdom and develops, manufactures and markets high-value additives that are based on polymeric dispersion technology and used in coatings and inks.

Note 4 DIVESTITURES

In May 2006, the company sold the FIIS business and the active pharmaceutical ingredients and intermediate compounds business (A&I), both of which were included in the Lubrizol Advanced Materials segment. A&I and almost all of FIIS were included in the Noveon consumer specialties product line. A small portion of the FIIS divestiture was included in the performance coatings product line. In consideration for the FIIS and A&I businesses, the company received net cash proceeds of approximately $254.8 million and $10.4 million, respectively. The company recorded a $10.4 million pretax ($15.9 million after-tax) loss on the sale of these divested businesses. The tax charge of $5.5 million primarily related to the difference in book and tax basis in goodwill. The net charge of $76.2 million recorded in discontinued operations in 2006 also reflected a $60.6 million after-tax goodwill impairment charge in the first quarter of 2006 to reduce the FIIS business to its carrying value. The company performed the impairment test on the FIIS business in connection with its classification as held for sale and estimated its fair value based on expected proceeds from the sale, less transaction costs. In addition, a charge of $4.4 million pretax ($2.9 million after-tax) was recorded in the fourth quarter of 2006 to write-off an intangible asset associated with the FIIS business.

The company performed a SFAS No. 144 impairment test of the FIIS business at December 31, 2005 and determined that the estimated fair value of the FIIS business exceeded its carrying value. The company calculated the fair value using a probability-weighted assessment based on selling the businesses versus continuing operations of the businesses. Based on the results of this impairment analysis, an impairment charge was not warranted at December 31, 2005.

In February 2006, the company sold certain assets and liabilities of its Telene® resins business (Telene), which was included in the Lubrizol Advanced Materials segment. The company received net cash proceeds of $6.2 million for the sale of Telene.

The results of the FIIS, A&I and the Telene businesses were reflected in the (loss) income from discontinued operations net of tax line item in the consolidated statements of income for 2006, 2005 and 2004, respectively.

In December 2005, the company sold certain assets, liabilities and stock of its Engine Control Systems (ECS) business and, in September 2005, the company sold certain assets and liabilities of its U.S. and U.K. Lubrizol Performance Systems (LPS) operations, both of which were included in the Lubrizol Additives segment. The company reflected the results of these businesses in the (loss) income from discontinued operations net of tax line item in the consolidated statements of income for 2005 and 2004, respectively.

Revenues from discontinued operations were $143.8 million, $476.7 million and $295.1 million in 2006, 2005 and 2004, respectively.

Loss from discontinued operations net of tax was $76.2 million in 2006 and primarily related to a $60.6 million after-tax goodwill impairment charge on the FIIS business recorded in the first quarter of 2006 and a $16.6 million after-tax loss on the sale of divested businesses. Loss from discontinued operations net of tax in 2006 includes income tax expense of $9.4 million. Income from discontinued operations net of tax in 2005 was $27.8 million and includes income tax expense of $15.5 million. Income from discontinued operations net of tax in 2004 was $6.3 million and includes income tax expense of $3.1 million.

The company s consolidated balance sheet at December 31, 2006 does not reflect any businesses classified as discontinued operations as all activities related to discontinued operations were fully completed during 2006. The company s consolidated balance sheet at December 31, 2005 included $132.1 million in current assets, $115.6 million

in net property and equipment, $87.6 million in goodwill, $24.8 million in net intangible assets, $0.6 million in other current assets, $8.5 million in current liabilities and $6.4 million in long-term liabilities pertaining to businesses reflected as discontinued operations.

Note 5 INVENTORIES

	2006	2005
Finished products	$ 315.0	$ 319.6
Products in process	108.2	86.9
Raw materials	138.2	151.2
Supplies and engine test parts	27.6	28.3
Total inventory	$ 589.0	$ 586.0

Inventories valued using the LIFO method were 40% and 42% of consolidated inventories at December 31, 2006 and 2005, respectively. The current replacement cost of these inventories exceeded the LIFO cost at December 31, 2006 and 2005 by $132.8 million and $121.5 million, respectively.

Note 6 GOODWILL AND INTANGIBLE ASSETS

Goodwill

Goodwill is tested for impairment at the reporting unit level as of October 1 of each year or if events or circumstances occur that would more likely than not reduce the fair value of a reporting unit below its carrying amount. No impairment of goodwill was identified in connection with the 2006, 2005 or 2004 annual impairment test.

The carrying amount of goodwill by reporting segment follows:

	Lubrizol Advanced Materials	Lubrizol Additives	Total
Balance, January 1, 2005	$ 1,052.9	$ 100.9	$ 1,153.8
Goodwill acquired	32.9		32.9
Translation & other adjustments	(42.8)	(5.1)	(47.9)
Balance, December 31, 2005	1,043.0	95.8	1,138.8
Goodwill of divestitures	(87.6)		(87.6)
Translation & other adjustments	22.9	2.0	24.9
Balance, December 31, 2006	$ 978.3	$ 97.8	$ 1,076.1

The decrease in the carrying amount of goodwill from December 31, 2005 to December 31, 2006 primarily reflects the elimination of the goodwill of divestitures in the Lubrizol Advanced Materials segment of $87.6 million, of which $85.1 million was associated with the FIIS business sold in the second quarter of 2006 and $2.5 million related to the Telene business sold during the first quarter of 2006. The $85.1 million goodwill reduction related to the FIIS business includes an impairment charge of $60.6 million reflected in the first quarter of 2006 and a $24.5 million disposition of the residual balance at the time of sale (see Note 4).

Intangible Assets

The major components of the company s identifiable intangible assets are customer lists, technology, trademarks, patents, land-use rights and non-compete agreements. Definite-lived intangible assets are amortized over their useful lives, which range between 3 and 40 years. The company s indefinite-lived intangible assets consist of certain trademarks which are tested for impairment each year as of October 1 or more frequently if impairment indicators arise. Indefinite-lived trademarks are assessed for impairment separately from goodwill. No impairment of indefinite-lived trademarks was identified in connection with the 2006, 2005 or 2004 annual impairment test. However, the decrease in

gross intangible assets from December 31, 2005 to December 31, 2006 primarily was due to a $41.2 million write-down of the Noveon trade name in the Lubrizol Advanced Materials segment during the fourth quarter of 2006 (see Note 17) and intangible assets associated with the FIIS business sold during the second quarter of 2006.
The following table shows the components of identifiable intangible assets as of December 31, 2006 and 2005:

	2006		2005	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Amortized intangible assets:				
Customer lists	$ 145.0	$ 24.0	$ 151.5	$ 15.8
Technology	139.8	44.9	144.4	35.6
Trademarks	20.7	5.5	24.5	4.2
Patents	14.0	4.2	11.8	2.5
Land-use rights	7.5	1.2	7.3	1.0
Non-compete agreements	8.2	7.2	9.1	5.9
Other	0.9	0.7	5.4	0.7
Total amortized intangible assets	336.1	87.7	354.0	65.7
Non-amortized trademarks	74.4		116.3	
Total	$ 410.5	$ 87.7	$ 470.3	$ 65.7

Annual intangible amortization expense for the next five years will approximate $22.5 million in 2007, $21.0 million in 2008 and $19.3 million in 2009, 2010 and 2011, respectively.

Note 7 DEBT

The company s debt is comprised of the following at December 31, 2006 and 2005:

	2006	2005
Short-term debt:		
Yen denominated, at weighted-average rates of 0.8% and 0.5%	$ 2.5	$ 2.5
Other	0.2	0.8
Current portion of long-term debt	1.0	4.6
Total	$ 3.7	$ 7.9
Long-term debt:		
5.875% notes, due 2008, including a fair value adjustment of $(1.1) million and $(0.6) million in 2006 and 2005, respectively, for unrealized losses on derivative hedge instruments and remaining unamortized gain on termination of swaps of $5.2 million and $8.0 million in 2006 and 2005, respectively	$ 204.1	$ 207.4
4.625% notes, due 2009, net of original issue discount of $0.2 million and $0.3 million in 2006 and 2005, respectively, and fair value adjustments of $(4.1) million and $(4.3) million for unrealized losses on derivative hedge instruments in 2006 and 2005, respectively	377.5	395.4
5.5% notes, due 2014, net of original issue discount of $2.4 million and $2.7 million in 2006 and 2005, respectively	447.6	447.3
7.25% debentures, due 2025	100.0	100.0
6.5% debentures, due 2034, net of original issue discount of $4.8 million and $4.9 million in 2006 and 2005, respectively	295.2	295.1
Debt supported by long-term banking arrangements: Euro revolving credit borrowing, at EURIBOR plus 0.4% (4.1% and 2.9% at December 31, 2006 and 2005, respectively)	112.2	215.6
Other	2.4	6.7
	1,539.0	1,667.5
Less current portion	1.0	4.6
Total	$ 1,538.0	$ 1,662.9

The scheduled principal payments for all outstanding debt are $3.7 million in 2007, $200.5 million in 2008, $382.1 million in 2009, $112.5 million in 2010, $0.2 million in 2011 and $850.1 million thereafter.

During the third quarter of 2006, the company repurchased $18.2 million of its 4.625% notes due in 2009. The weighted-average purchase price was 97.298% per note, resulting in a gain on retirement of $0.5 million. The company also accelerated amortization of $0.6 million in debt issuance costs, original issue discounts and losses on Treasury rate lock agreements associated with the repurchased notes. The remaining outstanding balance on the 4.625% notes due in 2009 was $381.8 million as of December 31, 2006.

In September 2005, certain wholly owned international subsidiaries of the company entered into a five-year unsecured committed 250.0 million revolving credit agreement. This credit agreement permits these designated international subsidiaries to borrow at variable rates based on EURIBOR plus a specified credit spread. In September 2006, two of the company s wholly owned foreign subsidiaries amended their five-year unsecured committed 250.0 million credit agreement such that neither the company nor its subsidiaries are any longer subject to any investment or acquisition

restrictions. No other terms or conditions of the agreement were modified. As of December 31, 2006 and 2005, borrowings of 85.0 million and 182.0 million were outstanding under this agreement, respectively.

In November 2004, the company entered into interest rate swap agreements that effectively converted the interest on $200.0 million of outstanding 4.625% notes due 2009 to a variable rate of six-month LIBOR plus 40 basis points. In June 2004, the company entered into interest rate swap agreements that effectively converted the interest on $200.0 million of outstanding 5.875% notes due 2008 to a variable rate of six-month LIBOR plus 111 basis points. In addition, the company had an interest rate swap agreement, which expired in October 2006, that exchanged variable-rate interest obligations on a notional principal amount of Japanese yen 500.0 million for a fixed rate of 2.0%.

In September 2004, the company issued senior unsecured notes and debentures having an aggregate principal amount of $1,150.0 million including: $400.0 million 4.625% notes due October 1, 2009; $450.0 million 5.5% notes due October 1, 2014; and $300.0 million 6.5% debentures due October 1, 2034. The price to the public was 99.911% per 2009 note, 99.339% per 2014 note and 98.341% per 2034 debenture. The resulting original issue discount from the issuance of these notes and debentures of $8.3 million was recorded as a reduction of the underlying debt issuances and is being amortized over the life of the debt using the effective interest method. Interest is payable semi-annually on April 1 and October 1 of each year, beginning April 1, 2005. The notes and debentures have no sinking fund requirement, but are redeemable, in whole or in part, at the option of the company. The proceeds from these notes and debentures were used to repay a portion of the 364-day credit facility that was utilized to bridge finance the Noveon International acquisition. Including debt issuance costs, original issue discounts and losses on Treasury rate lock agreements, the 2009 notes, 2014 notes and 2034 debentures have effective annualized interest rates of approximately 5.3%, 6.3% and 6.7%, respectively, with a weighted-average interest rate for the aggregate issuances of approximately 6.1%.

In August 2004, the company entered into a five-year $1,075.0 million unsecured bank credit agreement consisting of: $575.0 million in term loans and a $500.0 million committed revolving credit facility. This credit agreement permits the company to borrow at variable rates based upon the U.S. prime rate or LIBOR plus a specified spread. The spread is dependent on the company s long-term unsecured senior debt rating from Standard and Poor s and Moody s Investor Services. In September 2004, the company borrowed $575.0 million in term loans, the proceeds of which were used to repay a portion of the 364-day credit facility used to bridge finance the Noveon International acquisition. Principal on the term loans was due quarterly in equal installments of $14.4 million beginning March 31, 2005, with any remaining unpaid balance due in September 2009. In the fourth quarter of 2004, the company prepaid $75.0 million and, in 2005, the company prepaid the remaining $500.0 million to pay off the bank term loan. The loans were prepayable at any time without penalty. There were no outstanding revolving credit facility borrowings as of December 31, 2006 and 2005. In September 2006, the company amended its five-year unsecured committed U.S. bank credit agreement to reduce the amount of revolving credit available under the agreement from $500.0 million to $350.0 million and extended the maturity date to September 2011. In addition, the company s direct and indirect domestic subsidiaries were released as guarantors under the credit agreement, and the company no longer is subject to any investment or acquisition restrictions. Due to provisions in each of the three indentures underlying the company s outstanding public debt, upon effectiveness of the amendment to the credit agreement described above, the company s direct and indirect domestic subsidiaries were released as guarantors of the outstanding public debt effective in September 2006.

In July 2002, the company terminated its interest rate swap agreements expiring December 2008, which converted fixed-rate interest on $100.0 million of its 5.875% debentures to a variable rate. In terminating the swaps, the company received cash of $18.1 million, which is being amortized as a reduction of interest expense through December 1, 2008, the due date of the underlying debt. Gains and losses on terminations of interest rate swap agreements designated as fair value hedges are deferred as an adjustment to the carrying amount of the outstanding obligation and amortized as an adjustment to interest expense related to the obligation over the remaining term of the original contract life of the terminated swap agreement. In the event of early extinguishment of the outstanding obligation, any unamortized gain or loss from the swaps would be recognized in the consolidated statement of income at the time of such extinguishment. In 2002, the company recorded a $17.3 million unrealized gain, net of accrued interest, on the termination of the interest rate swaps as an increase in the underlying long-term debt. The remaining unrealized gain was $5.2 million and $8.0 million at December 31, 2006 and 2005, respectively.

In November 1998, the company issued notes having an aggregate principal amount of $200.0 million. The notes are unsecured, senior obligations of the company that mature on December 1, 2008, and bear interest at 5.875% per annum, payable semi-annually on June 1 and December 1 of each year. The notes have no sinking fund requirement but are redeemable, in whole or in part, at the option of the company. The company incurred debt issuance costs aggregating $10.5 million, including a loss of $6.5 million related to closed Treasury rate lock agreements originally entered into as a hedge against changes in interest rates relative to the anticipated issuance of these notes.

The company has debentures outstanding, issued in June 1995, in an aggregate principal amount of $100.0 million. These debentures are unsecured, senior obligations of the company that mature on June 15, 2025, and bear interest at an annualized rate of 7.25%, payable semi-annually on June 15 and December 15 of each year. The debentures are not redeemable prior to maturity and are not subject to any sinking fund requirements.

Interest paid, net of amounts capitalized, was $98.2 million, $104.3 million and $80.0 million during 2006, 2005 and 2004, respectively. The company capitalizes interest on qualifying capital projects. The amount of interest capitalized during 2006, 2005 and 2004 amounted to $1.5 million, $0.7 million and $0.6 million, respectively.

Note 8 FINANCIAL INSTRUMENTS

The company has various financial instruments, including cash and short-term investments, investments in nonconsolidated companies, foreign currency forward contracts, commodity forward contracts, interest rate swaps and short-term and long-term debt. The company has determined the estimated fair value of these financial instruments by using available market information and generally accepted valuation methodologies. The use of different market assumptions or estimation methodologies could have a material effect on the estimated fair value amounts. The estimated fair value of the company s debt instruments at December 31, 2006 and 2005 approximated $1,533.5 million and $1,687.0 million, compared with the carrying value of $1,541.7 million and $1,670.8 million, respectively.

The company is exposed to market risk from changes in interest rates. The company s policy is to manage interest expense using a mix of fixed-rate and variable-rate debt. To manage this mix in a cost-efficient manner, the company may enter into interest rate swaps in which the company agrees to exchange, at specified intervals, the difference between fixed and variable interest amounts calculated by reference to an agreed-upon notional principal amount. Interest payments receivable and payable under the terms of the interest rate swap agreements are accrued over the period to which the payment relates and the net difference is treated as an adjustment of interest expense related to the underlying liability.

In November 2004, the company entered into interest rate swap agreements that effectively convert the interest on $200.0 million of outstanding 4.625% notes due 2009 to a variable rate of six-month LIBOR plus 40 basis points. The fair value of the interest rate swaps included in long-term debt was $(4.1) million and $(4.3) million at December 31, 2006 and 2005, respectively. In June 2004, the company entered into interest rate swap agreements that effectively convert the interest on $200.0 million of outstanding 5.875% notes due 2008 to a variable rate of six-month LIBOR plus 111 basis points. The fair value of the interest rate swaps included in long-term debt was $(1.1) million and $(0.6) million at December 31, 2006 and 2005, respectively. These swaps are designated as fair-value hedges of underlying fixed-rate debt obligations and are recorded as an adjustment to long-term debt and noncurrent assets or liabilities. These interest rate swaps qualify for the short-cut method for assessing hedge effectiveness per SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities. Changes in fair value of the swaps are offset by the change in fair value of the underlying debt. As a result, there was no impact to earnings in 2006 or 2005 due to hedge ineffectiveness.

The company also had an interest rate swap agreement that matured in October 2006 that exchanged variable-rate interest obligations for a fixed rate on a notional principal amount of Japanese yen 500.0 million. This interest rate swap was designated as a cash-flow hedge.

In April 2004, the company terminated interest rate swap agreements resulting in a pretax charge of $2.9 million recognized in 2004. The interest rate swap, which had an original expiration date of March 2005, exchanged variable-rate interest obligations on a notional principal amount of $50.0 million for a fixed rate of 7.6%. The company terminated the interest rate swap as a result of the company s debt and commercial paper credit rating being downgraded

upon the announcement of the Noveon International acquisition effectively eliminating the company s access to the commercial paper market.

In June 2004, the company entered into several Treasury rate lock agreements with an aggregate notional principal amount of $900.0 million, all maturing September 30, 2004, whereby the company had locked in Treasury rates relating to a portion of the then anticipated public debt securities issuance. These rate locks were designated as cash-flow hedges of the forecasted semi-annual interest payments associated with the expected debt issuance. In September 2004, the company incurred a pretax loss on the termination of these agreements in an aggregate amount of $73.9 million. Gains and losses on terminations of Treasury rate lock agreements designated as cash-flow hedges are deferred and amortized as an adjustment to interest expense over the life of the corresponding debt issuance using the effective interest method. The unamortized balance of the Treasury rate lock recorded in accumulated other comprehensive income, net of tax, was $41.2 million and $44.5 million at December 31, 2006 and 2005, respectively.

The company is exposed to the effect of changes in foreign currency rates on its earnings and cash flow as a result of doing business internationally. In addition to working capital management, pricing and sourcing, the company selectively uses foreign currency forward contracts to lessen the potential effect of currency changes. The maximum amount of foreign currency forward contracts outstanding at any one time was $35.5 million in 2006, $34.4 million in 2005 and $140.8 million in 2004. At December 31, 2006, the company had short-term forward contracts to buy or sell currencies at various dates during 2007 for $28.8 million. At December 31, 2005, the company had short-term forward contracts to buy or sell currencies at various dates during 2006 for $27.3 million. Changes in the fair value of these contracts are recorded in other income. The fair value of these instruments at December 31, 2006 and 2005, and the related adjustments recorded in other income, were an unrealized gain (loss) of $0.2 million and $(0.2) million, respectively.

The company is exposed to market risk from changes in commodity prices. The company uses financial instruments to manage the cost of natural gas and electricity purchases. These contracts have been designated as cash-flow hedges and, accordingly, any effective unrealized gains or losses on open contracts are recorded in other comprehensive income or loss, net of related tax effects. At December 31, 2006 and 2005, the notional amounts of open contracts totaled $15.0 million and $10.1 million, respectively. A hedge liability of $1.9 million ($1.2 million net of tax) and $0.9 million ($0.6 million net of tax) was recorded at December 31, 2006 and 2005, respectively, which represents the net unrealized losses or gains based upon current futures prices at that date. Ineffectiveness was determined to be immaterial in 2006 and 2005. Contract maturities are less than 12 months. As such, the company expects that all of these losses will be reclassified into earnings within the next 12 months.

Note 9 OTHER BALANCE SHEET INFORMATION

	2006	2005
Receivables:		
Customers	$ 509.3	$ 533.9
Affiliates	4.0	8.1
Other	60.3	43.6
Total	$ 573.6	$ 585.6

Receivables are net of allowance for doubtful accounts of $7.5 million and $10.1 million at December 31, 2006 and 2005, respectively.

	2006	2005
Property and equipment at cost:		
Land and improvements	$ 177.0	$ 178.0
Buildings and improvements	457.8	456.2
Machinery and equipment	1,820.2	1,912.2
Construction in progress	91.0	75.1
Total	$ 2,546.0	$ 2,621.5

Depreciation expense of property and equipment from continuing operations was $133.3 million, $139.4 million and $115.4 million in 2006, 2005 and 2004, respectively. Depreciation expense of property and equipment from discontinued operations was $4.4 million, $15.2 million and $21.3 million in 2006, 2005 and 2004, respectively.

	2006	2005
Accrued expenses and other current liabilities:		
Employee compensation	$ 108.1	$ 99.4
Income taxes	48.5	56.3
Sales allowances and rebates	33.8	30.3
Taxes other than income	31.2	31.2
Interest	17.9	17.6
Other	48.3	50.0
Total	$ 287.8	$ 284.8

Dividends payable at December 31, 2006 and 2005 were $17.9 million and $17.7 million, respectively, and are included in accounts payable in the consolidated balance sheet.

Note 10 SHAREHOLDERS EQUITY

The company has 147.0 million authorized shares consisting of 2.0 million shares of serial preferred stock, 25.0 million shares of serial preference shares and 120.0 million common shares, each of which is without par value. Common shares outstanding exclude common shares held in treasury of 17.2 million and 18.2 million at December 31, 2006 and 2005, respectively.

In September 2004, the company issued and sold 13.4 million common shares at a price of $33.25 per share. Net proceeds from the sale of common shares were $427.2 million and were used primarily to repay the temporary bridge loan that financed a portion of the Noveon International acquisition. In October 2004, the company issued an additional 1.3 million common shares at a price of $33.25 per share due to the exercise of the over-allotment option relating to the September common share offering. This issuance generated net proceeds to the company of $42.8 million, which were utilized to prepay $40.0 million in term loan debt.

The company has a shareholder rights plan under which one right to buy one-half common share has been distributed for each common share held. The rights may become exercisable under certain circumstances involving actual or potential acquisitions of 20% or more of the common shares by a person or affiliated persons who acquire stock without complying with the requirements of the company s articles of incorporation. The rights would entitle shareholders, other than this person or affiliated persons, to purchase common shares of the company or of certain acquiring persons at 50% of the then current market value. At the option of the directors, the rights may be exchanged for common shares, and may be redeemed in cash, securities or other consideration. The rights will expire in October 2007.

Accumulated other comprehensive (loss) income shown in the consolidated statements of shareholders equity at December 31, 2006, 2005 and 2004 is comprised of the following:

	Foreign Currency Translation Adjustment	Treasury Rate Locks	Unrealized Gains (Losses) on Interest Rate Swaps	Unrecognized Pension Plan and Other Postretirement Benefit Costs	Accumulated Other Comprehensive (Loss) Income
Balance, January 1, 2004	$ (4.1)	$	$ (1.8)	$ (30.1)	$ (36.0)
Other comprehensive income (loss):					
Pretax	97.5	(72.9)	3.2	1.9	29.7
Tax benefit (provision)	(1.9)	25.5	(1.1)	(0.7)	21.8
Total	95.6	(47.4)	2.1	1.2	51.5
Balance, December 31, 2004	91.5	(47.4)	0.3	(28.9)	15.5
Other comprehensive (loss) income:					
Pretax	(119.1)	4.4		(19.1)	(133.8)
Tax benefit (provision)	1.9	(1.5)		5.4	5.8
Total	(117.2)	2.9		(13.7)	(128.0)
Balance, December 31, 2005	(25.7)	(44.5)	0.3	(42.6)	(112.5)
Other comprehensive income (loss):

Balance, December 31, 2006	$ 55.2	$ (41.2)	$ 0.3	$ (67.2)	$ (52.9)

Note 11 OTHER INCOME NET

	2006	2005	2004
Settlement of insurance and legal matters	$ 10.4	$	$
Currency exchange / transaction (loss) gain	(2.9)	(0.6)	6.6
Equity earnings of nonconsolidated companies	1.0	0.8	0.8
Other net	(0.2)	1.4	(2.0)
Total	$ 8.3	$ 1.6	$ 5.4

Dividends received from nonconsolidated companies were $0.2 million in 2006, $0.9 million in 2005 and $0.4 million in 2004.

Note 12 INCOME TAXES

Income from continuing operations before income taxes consists of the following:

	2006	2005	2004
United States	$ 75.5	$ 40.2	$ 32.2
Foreign	189.6	203.3	105.0
Total	$ 265.1	$ 243.5	$ 137.2

The provision for income taxes from continuing operations consists of the following:

	2006	2005	2004
Current:			
United States:			
Federal	$ (3.9)	$ 4.0	$ 1.4
State	(0.7)	(0.2)	1.4
Foreign	48.2	67.5	40.9
	43.6	71.3	43.7
Deferred:			
United States:			
Federal	28.6	9.5	17.5
State	8.5	6.1	(1.0)
Foreign	2.6	(4.9)	(10.2)
	39.7	10.7	6.3
Total	$ 83.3	$ 82.0	$ 50.0

The differences between the provision for income taxes at the U.S. statutory rate and the tax shown in the consolidated statements of income are summarized as follows:

	2006	2005	2004
Tax at statutory rate of 35%	$ 92.8	$ 85.2	$ 48.0
U.S. and foreign tax on foreign dividends	7.7	8.1	13.8
U.S. tax benefit on exports	(4.1)	(5.0)	(1.8)
State and local income taxes	5.1	3.8	0.3
Untaxed translation gains	(0.5)	(0.8)	(2.5)
Provision impacts of foreign operations	(19.4)	(11.5)	(8.0)
Other net	1.7	2.2	0.2
Provision for income taxes	$ 83.3	$ 82.0	$ 50.0

The tax effects of temporary differences that give rise to significant portions of deferred tax assets and liabilities at December 31 are as follows:

	2006	2005
Deferred tax assets:		
Accrued compensation and benefits	$ 135.2	$ 108.3
Inventory	22.4	16.7
Cash flow hedges	22.9	24.3
Net operating losses and tax credits carried forward	29.9	94.9
Other	23.8	27.0
Total gross deferred tax assets	234.2	271.2
Less valuation allowance	(17.8)	(18.1)
Net deferred tax assets	216.4	253.1
Deferred tax liabilities:		
Depreciation and other basis differences	203.8	233.5
Foreign subsidiary and affiliate undistributed earnings	7.9	6.5
Other	11.9	13.5
Total gross deferred tax liabilities	223.6	253.5
Net deferred tax liabilities	$ (7.2)	$ (0.4)

At December 31, 2006, the company had U.S. tax credit carryforwards and state and foreign net operating loss carryforwards (NOLs). The company s U.S. tax credits totaled $15.3 million, of which $8.4 million expire in 2007 through 2026, and $6.9 million have no expiration. The company had $9.3 million of state tax benefit from NOLs, which expire in 2007 through 2026. Foreign NOLs totaled $18.6 million, of which $15.0 million expire in 2008 through 2021 and $3.6 million, which can be carried forward indefinitely. Additionally, the company has incurred losses in a foreign jurisdiction where realization of the future economic benefit is so remote that the benefit is not reflected as a deferred tax asset.

Gross deferred tax assets as of December 31, 2006 and 2005 were reduced by valuation allowances of $17.8 million and $18.1 million, respectively, to reflect the amounts expected to be realized. Of the $17.8 million in valuation allowances at December 31, 2006, $10.2 million relates to certain Noveon International deferred tax assets existing at the time of the 2004 acquisition. Any reversal of this portion of the valuation allowance reduces goodwill. No valuation allowance has been recognized against the U.S. tax credits because management believes that the company will generate sufficient future taxable income during the carryforward period in order to utilize these credits.

U.S. income taxes and foreign withholding taxes are not provided on undistributed earnings of foreign subsidiaries, which are considered to be indefinitely reinvested in the operations of such subsidiaries. The amount of these earnings was approximately $735.5 million at December 31, 2006. Determination of the net amount of unrecognized taxes with respect to these earnings is not practicable.

Income taxes paid during 2006, 2005 and 2004 were $72.9 million, $75.7 million and $34.6 million, respectively.

Note 13 PENSION, PROFIT SHARING AND OTHER POSTRETIREMENT BENEFIT PLANS

The company has noncontributory defined benefit pension plans covering most employees. Pension benefits under these plans are based on years of service and the employee s compensation. The company s funding policy in the United States is to contribute amounts to satisfy the funding standards of the Internal Revenue Code of 1986, as amended (IRC), and the Employee Retirement Income Security Act of 1974, as amended, and elsewhere to fund amounts in accordance with local regulations. Several of the company s smaller defined benefit plans are not funded.

The investment objective of the funded pension plans sponsored by the company and certain subsidiaries is to assure the timely payment of promised benefits at a minimum cost consistent with prudent standards of investment, given the strength of the company and the subsidiaries, their earnings record, the adequacy of each plan s funding and the age of

each entity s work force. The plans utilize diversified investment portfolios and seek to earn returns consistent with a reasonable level of risk. The long-term expected return on plan assets used to determine the net periodic pension cost is based upon each entity s investment allocation and anticipated returns for specific investment classes. In 2006, the company lowered the expected long-term rate of return assumption for the U.S. pension plans 25 basis points to 8.25% (7.48% on a weighted-average basis for all plans) based on investment mix and projected market conditions.

As long-term asset allocation is recognized as the primary determinant of performance, the sponsoring entities generally utilize the following asset allocation targets to achieve their plan investment objectives: 70% equity securities and 30% debt securities. The non-U.S. plans have a slightly higher allocation to debt securities than the U.S. plans. As appropriate, allocation targets and ranges may be established for various subcategories. Allocations are reviewed periodically and adjusted as necessary. In January 2005, the company transferred the Noveon International U.S. pension assets into one master trust arrangement with the company s existing U.S. pension plans. As a result, the combined assets are subject to the same overall investment strategy and management.

Approved pension plan investments include, but are not limited to: equities, fixed-income securities, venture capital, cash and cash equivalent instruments and such other instruments (including mutual fund investments), as the company may approve. Investments in tax-exempt securities, commodities and options, other than covered calls, and the use of leverage are prohibited. Plan investment managers may use derivatives to hedge currency risk and to maintain full investment. Any other use of derivative instruments must be approved by the sponsoring entity.

The market values of pension plan assets are compared periodically to the value of plan benefit obligations. The future value of assets, as calculated based on the expected long-term rate of return, are also compared to expected future plan benefit distributions and contributions to determine the sufficiency of expected plan funding levels. Investment asset allocations are revised as appropriate.

Plan assets are invested in marketable equity securities and fixed-income instruments. The allocation of pension plan assets by major asset class is shown below on a weighted-average basis:

	Percentage of Plan Assets at December 31	
	2006	2005
Asset category:		
Equity securities	73%	72%
Debt securities	27%	28%
Total	100%	100%

No equity or debt securities of the company or any of its subsidiaries were included in the pension plans assets in 2006 and 2005, respectively.

The company also provides certain non-pension postretirement benefits, primarily health care and life insurance benefits, for retired employees. Most of the legacy Lubrizol full-time employees in the United States may become eligible for health care benefits upon retirement. Full-time employees who retired between January 1, 1992 and December 31, 2002 are also eligible for life insurance benefits. Participants contribute a portion of the cost of these benefits. The company s non-pension postretirement benefit plans are not funded.

As part of the Noveon International integration efforts to provide consistent benefits, the company communicated to employees in May 2005 changes to the benefits structure of certain of its U.S. pension and postretirement benefit plans. This communication triggered a remeasurement of the related benefit obligations and net periodic benefit cost in 2005 for both the legacy Noveon International U.S. pension plans as well as for the U.S. postretirement benefit plan. The net impact of the benefit and actuarial assumption changes reduced our aggregate net periodic pension and postretirement benefit cost by $3.5 million in 2005. The annualized savings resulting from this benefits change is estimated to be approximately $5.3 million.

In September 2006, the FASB issued SFAS No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans an amendment of FASB Statements No. 87, 88, 106, and 132(R). SFAS No. 158 requires an employer to recognize a plan s funded status in its statement of financial position, measure a plan s assets and obligations

as of the end of the employer s fiscal year and recognize the changes in a plan s funded status in comprehensive income in the year in which the changes occur. SFAS No. 158 s requirement to recognize a plan s funded status and new disclosure requirements are effective for the company as of December 31, 2006. The requirement to measure plan assets and benefit obligations as of the date of the company s fiscal year-end statement of financial position is effective for fiscal years ending after December 15, 2008. Currently, the company measures plan assets as of the date of its fiscal year-end. The company adopted the required provisions of SFAS No. 158 on December 31, 2006.

The incremental effects of adopting SFAS No. 158 on the company s consolidated balance sheet at December 31, 2006 were as follows:

	Balance Before Applying SFAS No. 158	SFAS No. 158 Adjustments	Balance After Applying SFAS No. 158
Current assets:			
Other current assets	$ 104.9	$ (6.9)	$ 98.0
Noncurrent assets:			
Other assets	$ 61.0	$ 1.0	$ 62.0
Intangible assets net	$ 326.6	$ (3.8)	$ 322.8
Total assets	$4,395.9	$ (9.7)	$4,386.2
Current liabilities:			
Accrued expenses and other current liabilities	$ 286.8	$ 1.0	$ 287.8
Noncurrent liabilities:			
Pension obligations	$ 130.1	$ 88.4	$ 218.5
Other postretirement benefit obligations	$ 96.3	$ (14.3)	$ 82.0
Deferred income taxes	$ 116.2	$ (27.3)	$ 88.9
Total liabilities	$2,578.3	$ 47.8	$2,626.1
Accumulated other comprehensive income (loss)	$ 4.6	$ (57.5)	$ (52.9)
Total shareholders equity	$1,764.9	$ (57.5)	$1,707.4

The change in the projected benefit obligation and plan assets for 2006 and 2005 and the amounts recognized in the consolidated balance sheets at December 31 of the company s defined benefit pension and non-pension postretirement plans were as follows:

	Pension Plans		Other Benefits	
	2006	2005	2006	2005
Change in Projected Benefit Obligation:				
Projected benefit obligation at beginning of year	$ 641.8	$ 558.5	$ 93.8	$ 122.5
Service cost	30.2	28.1	1.5	1.8
Interest cost	34.1	31.5	4.9	6.0
Plan participants contributions	0.6	0.6	3.6	3.3
Actuarial (gain) loss	(21.0)	74.2	(1.5)	(9.0)
Currency exchange rate change	32.8	(27.0)	0.2	(0.2)
Plan amendments	2.5	2.3		(22.1)
Settlement / curtailments	(2.8)	(1.0)	(1.5)	
Divestitures	(3.6)		(6.2)	
Benefits paid	(25.5)	(25.4)	(8.2)	(8.5)
Benefit obligation at end of year	689.1	641.8	86.6	93.8
Change in Plan Assets:				
Fair value of plan assets at beginning of year	400.5	357.2		
Actual return on plan assets	50.6	46.1		
Employer contributions	23.5	38.2	4.6	5.2
Settlements		(0.9)		
Plan participants contributions	0.6	0.6	3.6	3.3
Currency exchange rate change	19.7	(15.3)		
Adjustments	1.2			
Benefits paid	(25.5)	(25.4)	(8.2)	(8.5)
Fair value of plan assets at end of year	470.6	400.5		
Funded Status	$ (218.5)	(241.3)	$ (86.6)	(93.8)
Items not yet recognized as a component of net periodic pension and other postretirement benefit cost (credit):				
Unrecognized net loss	$ 89.6	147.5	$ 25.8	34.9
Unrecognized net transition obligation	0.4	0.5		
Unrecognized prior service cost (credit)	23.0	22.7	(40.1)	(48.3)
Total	$ 113.0	170.7	$ (14.3)	(13.4)
Net amounts recognized		$ (70.6)		$ (107.2)
Net amounts recognized in the consolidated balance sheets:				
Prepaid benefit cost	$ 1.0	$ 0.3	$	$
Intangible asset		4.9		
Accrued benefit liability	(219.5)	(136.5)	(86.6)	(107.2)
Funded Status	$ (218.5)		$ (86.6)	
Accumulated other comprehensive loss		60.7		
Net amounts recognized		$ (70.6)		$ (107.2)

The accumulated benefit obligation for all defined benefit pension plans was $537.7 million and $513.1 million at December 31, 2006 and 2005, respectively. The projected benefit obligation and fair value of plan assets for pension plans with

projected benefit obligations in excess of plan assets were $675.7 million and $456.1 million, respectively, at December 31, 2006, and $637.8 million and $395.9 million, respectively, at December 31, 2005. The accumulated benefit obligation and fair value of plan assets for pension plans with accumulated benefit obligations in excess of plan assets were $522.1 million and $450.1 million, respectively, at December 31, 2006 and $306.0 million and $189.4 million, respectively, at December 31, 2005.

The company amortizes gains and losses, as well as the effects of changes in actuarial assumptions and plan provisions, over the average remaining service period of participating employees expected to receive benefits under the plans.

Net periodic pension cost of the company s defined benefit pension plans consists of:

	2006	2005	2004
Service cost benefits earned during period	$ 30.2	$ 28.1	$ 22.0
Interest cost on projected benefit obligation	34.1	31.5	27.9
Expected return on plan assets	(28.3)	(26.9)	(27.4)
Amortization of prior service costs	2.3	2.2	1.6
Amortization of initial net obligation (asset)	0.2	0.2	(0.7)
Recognized net actuarial loss	8.4	5.5	3.8
Settlement / curtailment loss	2.9	0.3	7.7
Net periodic pension cost	$ 49.8	$ 40.9	$ 34.9

The company recorded a $7.7 million settlement charge in 2004 primarily associated with workforce reductions announced in June 2004 in the United States.

The amount of net loss and prior service cost that is expected to be recognized as a component of net periodic benefit cost in 2007 is $4.9 million and $2.4 million, respectively.

Net periodic non-pension postretirement benefit cost consists of:

	2006	2005	2004
Service cost benefits earned during period	$ 1.5	$ 1.8	$ 2.5
Interest cost on projected benefit obligation	4.9	6.0	6.9
Amortization of prior service credits	(8.2)	(7.5)	(6.1)
Recognized net actuarial loss	1.8	2.1	2.5
Settlement / curtailment loss	(1.1)		
Net periodic non-pension postretirement benefit (credit) cost	$ (1.1)	$ 2.4	$ 5.8

The amount of net loss and prior service cost (credit) that is expected to be recognized as a component of net periodic non-pension postretirement benefit cost (credit) in 2007 is $1.3 million and $(6.6) million respectively.

The company s actuarial assumptions used to determine benefit obligations and earnings effects for its defined benefit pension and non-pension postretirement plans are as follows:

	Pension Plans		Other Benefits	
	2006	2005	2006	2005
The weighted-average assumptions used to determine benefit obligations at December 31:				
Measurement date	12/31	12/31	12/31	12/31
Discount rate	5.67%	5.28%	6.12%	5.50%
Rate of compensation increase	3.85%	3.94%	*	*
The weighted-average assumptions used to determine net periodic benefit cost for years ended December 31:				
Discount rate	5.28%	5.74%	5.54%	6.20%
Expected long-term return on plan assets	7.48%	7.72%	*	*
Rate of compensation increase	3.95%	4.08%	*	*

* Disclosure not applicable

The following table shows the amounts the company contributed to its postretirement plans in 2005 and 2006 and the expected contributions for 2007:

	Pension Plans	Other Plans	Total
2005	$38.2	$5.2	$43.4
2006	23.5	4.6	28.1
2007 (expected)	59.5	4.6	64.1

Expected employer contributions for pension benefits in 2007 include $1.8 million for unfunded plans. The expected contributions to these plans represent an actuarial estimate of future assumed payments based on historic retirement and payment patterns. Actual amounts paid could differ from this estimate.

Contributions by participants to the other benefit plans were $3.6 million and $3.3 million for the years ending December 31, 2006 and 2005, respectively.

The following table shows the benefits expected to be paid in each of the next five years and the aggregate benefits expected to be paid for the subsequent five years:

	Pension Benefits	Other Benefits	Total Benefits
2007	$ 26.3	$ 4.7	$ 31.0
2008	28.9	4.9	33.8
2009	32.0	5.2	37.2
2010	35.5	5.6	41.1
2011	36.7	6.1	42.8
2012-2016	217.8	35.1	252.9

The other benefits in the above table are presented net of expected Medicare Part D subsidy payments of $0.7 million in 2007, $0.8 million in 2008, $0.9 million in 2009, $1.0 million in 2010, $1.1 million in 2011 and $6.7 million in 2012 2016. The weighted average of the assumed health care cost trend rates used in measuring the accumulated postretirement benefit obligation for the company s postretirement benefit plans at December 31, 2006 was 9.60% (8.27% at December 31, 2005), with subsequent annual decrements to an ultimate trend rate of 5.10% by 2012. The assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. A one-percentage-point change in the assumed health care cost trend rate would have the following effects as of and for the year ended December 31, 2006:

	One-Percentage-Point	
	Increase	Decrease
Effect on postretirement benefit obligation	$8.9	$(7.7)
Effect on total service and interest cost components	$0.8	$(0.7)

The company also has defined contribution plans, principally involving profit sharing plans and / or 401(k) savings plans, covering most employees in the United States and at certain non-U.S. subsidiaries. Expense for all defined contribution retirement plans was $16.3 million in 2006, $15.3 million in 2005 and $12.8 million in 2004.

Note 14 LEASES

The company has commitments under operating leases primarily for office space, terminal facilities, land, railcars and various computer and office equipment. Rental expense from continuing operations was $26.4 million in 2006, $28.2 million in 2005 and $25.3 million in 2004. Future minimum rental commitments under operating leases having initial or remaining non-cancelable lease terms exceeding one year are $17.1 million in 2007, $13.8 million in 2008, $9.2 million in 2009, $8.0 million in 2010, $5.6 million in 2011 and $8.6 million thereafter.

Note 15 SEGMENT AND GEOGRAPHIC INFORMATION

The company is organized into two operating and reporting segments. We changed the names of our two reporting segments in 2007. The new segment names are Lubrizol Additives, previously known as Lubricant Additives, and Lubrizol Advanced Materials, previously known as Specialty Chemicals. The change was in name only as the management structure of the segments and product lines included in each segment remained unchanged. The Lubrizol Additives segment represented 64% of the company s consolidated revenues for 2006 and is comprised of the company s businesses in engine additives and driveline and industrial oil additives. The Lubrizol Advanced Materials segment represented 36% of the company s consolidated revenues for 2006 and is comprised of the businesses in Noveon consumer specialties, engineered polymers and performance coatings.

Lubrizol Additives consists of two product lines: engine additives and driveline and industrial oil additives. Engine additives is comprised of additives for lubricating engine oils, such as for gasoline, diesel, marine and stationary gas engines and additive components, additives for fuel products and refinery and oil field chemicals, as well as outsourcing strategies for supply chain and knowledge center management. In addition, this product line sells additive components and viscosity improvers within its lubricant and fuel additives product areas. Driveline and industrial oil additives is comprised of additives for driveline oils, such as automatic transmission fluids, gear oils and tractor lubricants and industrial oil additives, such as additives for hydraulic, grease and metalworking fluids, as well as compressor lubricants. Lubrizol Additives product lines generally are produced in company-owned shared manufacturing facilities and largely sold to a common customer base. During 2005, the company sold the equipment companies, ECS and LPS, and recorded the results of operations of these businesses in the (loss) income from discontinued operations net of tax line item in the consolidated statements of income in 2005 and 2004 (see Note 4).

The Lubrizol Advanced Materials segment consists of Noveon consumer specialties, engineered polymers and performance coatings product lines. The Noveon consumer specialties product line is characterized by global production of acrylic thickeners, specialty monomers, film formers, fixatives, emollients, silicones, surfactants, botanicals and process chemicals. The company markets products in the Noveon consumer specialties product line to the personal care and pharmaceutical primary end-use industries. The Noveon consumer specialties products are sold to customers worldwide and these customers include major manufacturers of cosmetics, personal care products, water soluble polymers and household products. The engineered polymers product line is characterized by products such as TempRite® engineered polymers and Estane® thermoplastic polyurethane. Engineered polymers products are sold to a diverse customer base comprised of major manufacturers in the construction, automotive, telecommunications, electronics and recreation industries. The performance coatings product line includes high-performance polymers and additives for specialty paper, graphic arts, paint and textile coatings applications. During the second quarter of 2006, the company completed the sale of the FIIS and A&I businesses, while the sale of the Telene business was completed during the first quarter of 2006. The company recorded the results of operations of these divested businesses in the (loss) income from discontinued operations net of tax line item in the consolidated statements of income for all periods presented (see Note 4).

The company primarily evaluates performance and allocates resources based on segment operating income, defined as revenues less expenses identifiable to the product lines included within each segment, as well as projected future returns. Segment operating income reconciles to consolidated income from continuing operations before income taxes by deducting corporate expenses and corporate other (expense) income that are not attributed to the operating segments, restructuring and impairment charges, the write-off of acquired IPR&D and net interest expense.

The following table summarizes the results of the company s reportable segments for the years ended December 31, 2006, 2005 and 2004:

	2006	2005	2004
Lubrizol Additives:			
Revenues from external customers	$ 2,600.5	$ 2,280.0	$ 1,998.6
Equity earnings	1.0	0.8	0.8
Amortization of intangibles	3.1	3.0	3.0
Operating income	306.1	266.6	240.9
Total assets	1,392.9	1,319.1	1,337.1
Capital expenditures	77.1	70.0	82.4
Depreciation	71.7	79.7	86.2
Lubrizol Advanced Materials:			
Revenues from external customers	$ 1,440.3	$ 1,342.2	$ 865.8
Amortization of intangibles	20.6	20.5	13.9
Operating income	167.6	150.9	78.6
Total assets	2,193.7	2,536.8	2,733.3
Capital expenditures	40.2	51.3	40.1
Depreciation	61.0	59.0	28.1
Corporate:			
Total assets	$ 799.6	$ 510.4	$ 495.9
Capital expenditures	8.4	0.6	0.1
Depreciation	0.6	0.7	1.1
Discontinued operations:			
Capital expenditures	$ 5.2	$ 14.8	$ 10.6
Depreciation	4.4	15.2	21.3
Reconciliation to income from continuing operations before income taxes:			
Segment operating income	$ 473.7	$ 417.5	$ 319.5
Corporate expenses	(73.6)	(61.1)	(44.1)
Corporate other (expense) income net	(3.8)		6.2
Write-off of acquired IPR&D			(34.0)
Restructuring and impairment charges	(51.9)	(15.9)	(38.1)
Interest expense net	(79.3)	(97.0)	(72.3)
Income from continuing operations before income taxes	$ 265.1	$ 243.5	$ 137.2

Revenues from external customers by product line are as follows:

	2006	2005	2004
Engine additives	$ 1,665.4	$ 1,404.7	$ 1,222.7
Driveline and industrial oil additives	935.1	875.3	775.9
Total Lubrizol Additives	2,600.5	2,280.0	1,998.6
Performance coatings	543.7	537.6	366.2
Engineered polymers	523.1	462.3	260.2
Noveon consumer specialties	373.5	342.3	239.4
Total Lubrizol Advanced Materials	1,440.3	1,342.2	865.8
Total revenues from external customers	$ 4,040.8	$ 3,622.2	$ 2,864.4

Revenues are attributable to countries based on the location of the customer. The United States is the only country where sales to external customers comprise in excess of 10% of the company s consolidated revenues. Revenues from external customers by geographic zone are as follows:

	2006	2005	2004
United States	$ 1,637.0	$ 1,492.3	$ 1,159.1
Other North America	187.2	178.3	151.0
Europe	1,144.7	1,045.0	835.7
Asia-Pacific / Middle East	823.5	708.8	560.5
Latin America	248.4	197.8	158.1
Total revenues from external customers	$ 4,040.8	$ 3,622.2	$ 2,864.4

The company s sales and receivables are concentrated in the oil and chemical industries. Lubrizol Additives customers consist primarily of oil refiners and independent oil blenders located in more than 100 countries. The 10 largest customers, most of which are international oil companies and a number of which are groups of affiliated entities, comprised approximately 39%, 39% and 42% of consolidated net sales in 2006, 2005 and 2004, respectively. In 2006, 2005 and 2004, there was no single customer that accounted for more than 10% of consolidated net sales.

Segment assets include receivables, inventories and long-lived assets including goodwill and intangible assets. Corporate assets include cash and short-term investments and other current and noncurrent assets.

The company s principal long-lived assets are located in the following countries at December 31:

	2006	2005
United States	$ 1,525.3	$ 1,827.8
Belgium	375.1	346.1
United Kingdom	154.4	152.5
France	103.9	79.3
Hong Kong	77.5	78.7
China	45.1	45.5
Germany	34.5	31.6
Other	164.4	166.3
Total long-lived assets	$ 2,480.2	$ 2,727.8

Income from continuing operations of non-U.S. subsidiaries was $138.8 million in 2006, $140.7 million in 2005 and $74.3 million in 2004. Dividends received from these subsidiaries were $0.4 million, $151.8 million and $1.2 million in 2006, 2005 and 2004, respectively.

Note 16 STOCK COMPENSATION PLANS

All references to the number of shares and share units in this Note are based on actual share and unit numbers and are not shown in millions.

Effective January 1, 2006, the company adopted the fair value recognition provisions of SFAS No. 123R, Share-Based Payment, using the modified prospective transition method and therefore has not restated results for prior periods. Under this transition method, stock-based compensation expense for 2006 includes compensation expense for all stock-based compensation awards granted prior to, but not yet vested as of January 1, 2006, based on the grant-date fair value estimated in accordance with the original provisions of SFAS No. 123, Accounting for Stock-Based Compensation. Stock-based compensation expense for all stock-based compensation awards granted after January 1, 2006 is based on the grant-date fair value estimated in accordance with the provisions of SFAS No. 123R. The company recognizes these compensation costs, net of a forfeiture rate, on a straight-line basis over the requisite service period of the award. The company estimates the forfeiture rate based on its historical experience during the preceding 10 years. The impact of adopting SFAS No. 123R in 2006 resulted in an increase in compensation expense of $2.4 million pretax ($1.6 million after-tax).

Prior to January 1, 2006, the company accounted for stock-based compensation using the intrinsic value method under the recognition and measurement principles of APB Opinion 25, Accounting for Stock Issued to Employees and related Interpretations and applied SFAS No. 123, Accounting for Stock-Based Compensation, as amended by SFAS No. 148, Accounting for Stock-Based Compensation Transition and Disclosure for disclosure purposes only. SFAS No. 123 disclosures included pro forma net income and earnings per share as if the fair value-based method of accounting had been used. Under the provisions of APB No. 25, no stock-based employee compensation cost is reflected in net income, as all options granted under those plans had an exercise price equal to the market value of the underlying stock on the date of grant.

The company utilizes the 2005 Stock Incentive Plan (2005 Plan) and other deferred compensation plans to provide equity awards to its key employees. The 2005 Plan, approved by the company s shareholders on April 25, 2005, provides for the granting of restricted and unrestricted shares and options to buy common shares up to an amount equal to 4,000,000 common shares, of which no more than 2,000,000 can be settled as full-value awards. After the 2,000,000 limit has been reached, full-value awards are counted in a 3-to-1 ratio against the 4,000,000 limit. Options are intended either to qualify as incentive stock options under the IRC, or to be non-statutory stock options not intended to so qualify. Under the 2005 Plan, options generally become exercisable 50% one year after date of grant, 75% after two years, 100% after three years and expire up to 10 years after grant. The 2005 Plan generally supersedes the 1991 Stock Incentive Plan (1991 Plan), which was terminated by the board of directors with respect to future grants effective November 15, 2004. Options outstanding at December 31, 2006 for all grants under the 1991 Plan are fully vested and remain exercisable until their expiration dates. The exercise price of stock options granted under the 2005 Plan is not less than the fair market value of the shares on the date of grant. The 2005 Plan permits the granting of stock appreciation rights in connection with the grant of options. In addition, the 2005 Plan provides each nonemployee director of the company an automatic annual grant of restricted stock units worth $0.1 million, based on the fair market value of the company s common shares on the date of the Annual Meeting of Shareholders. The restricted stock units generally vest one year after the grant date. For all grants made prior to November 14, 2006, fair market value was defined as the average of the high and low common share prices of the company on the date of grant. For grants made on or after November 14, 2006, fair market value is defined as the closing price of the company s common shares on the date of grant.

Under the 1991 Plan, the company had granted performance share stock awards to certain executive officers. Common shares equal to the number of performance share stock awards granted were to be issued if the market price of the company s common stock reached $45.00 per common share for 10 consecutive trading days or on March 24, 2003, whichever occurred first. Under certain conditions such as retirement, a grantee of performance share stock awards could have been issued a pro-rata number of common shares. The company recognized compensation expense related to performance share stock awards ratably over the estimated period of vesting. On March 24, 2003, 3,500 shares were issued and 57,250 shares were deferred into share units under the deferred compensation plan for officers. The company allocated 933 and 1,404 share units under this plan in 2006 and 2005, respectively, which represent quarterly dividends paid on the company s shares. As of December 31, 2006, 37,299 share units were outstanding.

Under the Supplemental Retirement Plan for Donald W. Bogus, an account is credited with 500 share units each year and is credited with additional share units for quarterly dividends paid on the company s shares. When Mr. Bogus retires, the company will issue shares equal to the number of share units in his account or the cash equivalent. The company has allocated 54, 55 and 67 share units under this plan for 2006, 2005 and 2004, respectively, which represent quarterly dividends paid on the company s shares. As of December 31, 2006, 2,336 share units were outstanding. For share units attributable to grants credited after January 1, 2004, the payment will be in cash.

Under the Deferred Stock Compensation Plan for Outside Directors, each nonemployee director received 500 share units each year on October 1 and is credited with additional share units for quarterly dividends paid on the company s shares. When a participant ceases to be a director, the company issues shares equal to the number of share units in the director s account. The company has allocated to nonemployee directors 877, 1,022 and 1,351 share units under this plan for 2006, 2005 and 2004, respectively, which represent quarterly dividends paid on the company s shares. As of December 31, 2006, 35,563 share units were outstanding. No new grants have been made under this plan since January 1, 2004.

In addition, under the Deferred Compensation Plan for Directors, the company has allocated 669, 466 and 569 share units to nonemployee directors under this plan for 2006, 2005 and 2004, respectively. These share units continue to accrue quarterly dividends paid on the company s shares. When a participant ceases to be a director, the company issues shares equal to the number of share units in the director s account. As of December 31, 2006, 31,682 share units for nonemployee directors were outstanding.

Under the Executive Council Deferred Compensation Plan, participants may elect to defer any amount of their variable pay. Deferred amounts are converted into share units based on the current market price of the company s shares. There is a 25% company match. Additional share units are credited for quarterly dividends paid on the company s shares. At the end of the deferral period, which is at least three years, the company issues shares equal to the number of share units in the participant s account. The company has allocated to executive officers 31,662, 19,840 and 16,743 share units under this plan in 2006, 2005 and 2004, respectively. As of December 31, 2006, 92,523 share units for executive officers were outstanding. For share units attributable to the company match credited after January 1, 2004, distributions will be made in cash.

Under the 1991 Plan, effective January 1, 2003, the company granted 15,000 restricted shares to each of three executive officers. The shares will be issued only if the executive remains an employee until January 1, 2008. Also, effective January 1, 2003, the company granted 5,000 restricted shares to one executive officer, which would be issued only if the executive remained with the company until January 1, 2008. On July 26, 2004, this grant was amended to issue the shares if the executive remained employed until July 29, 2004. The shares were issued on July 29, 2005. There are no voting or dividend rights on the restricted shares described in this paragraph unless and until they are issued. The restricted shares stock awards had a fair value of $25.83 per share at the date of grant. The company recognizes compensation expense related to restricted shares ratably over the estimated period of vesting.

Option activity under the 2005 Plan and 1991 Plan as of December 31, 2006 and changes during the year ended December 31, 2006 were as follows:

	Shares	Weighted-Average Exercise Price
Outstanding, January 1, 2006	4,283,917	$32.35
Granted		
Exercised	(938,950)	$31.03
Forfeited	(5,638)	$29.72
Outstanding, December 31, 2006	3,339,329	$32.72
Options exercisable, December 31, 2006	2,992,327	$31.93

The aggregate intrinsic value of options outstanding at December 31, 2006 based on the company s closing stock price on the last trading day of 2006, which would have been received by the option holders had all options been exercised on that date was $58.1 million. The aggregate intrinsic value of options exercisable at December 31, 2006 based on the company s closing stock price on the last trading day of 2006, which would have been received by the option holders had all options exercisable been exercised on that date, was $53.2 million. The total intrinsic value of stock options exercised was $13.5 million, $13.0 million and $3.6 million in 2006, 2005 and 2004, respectively. Intrinsic value is the amount by which the company s closing share price exceeds the exercise price of the options multiplied by the number of in-the-money options. The weighted-average remaining contractual term of options outstanding and exercisable at December 31, 2006 was 5.4 years and 5.0 years.

The fair value of share-based payment awards are estimated using the Black-Scholes option pricing model. There were no stock options granted during 2006. The weighted-average fair value of stock options granted during 2005 and 2004 was $9.87 and $6.50, respectively. Disclosures under the fair-value method are estimated using the Black-Scholes option-pricing model with the following weighted-average assumptions for stock option grants in the following years:

	2005	2004
Risk-free interest rate	4.3%	3.7%
Dividend yield	2.5%	3.5%
Volatility	21.2%	24.0%
Expected life (years)	8.0	10.0

If the fair-value method to measure compensation cost for the above plans and awards had been used, the compensation cost, which is required to be charged against income, would have been $6.5 million in 2005 and $6.0 million in 2004. See Note 2 for the pro forma presentation.

Cash received from option exercises and purchases under the 2005 Plan and 1991 Plan during 2006 was $31.3 million. The company realized a reduction in its income tax payable of $4.7 million in 2006 relating to the exercise of nonqualified stock options. For accounting purposes, these tax benefits were realized as increases in paid-in capital included in the common shares caption in the consolidated statement of shareholders equity.

As of December 31, 2006, there was $10.3 million of total before-tax unrecognized compensation cost related to nonvested stock-based awards. That cost is expected to be recognized over a weighted-average period of 1.6 years. The company is using previously purchased treasury shares for all net shares issued for option exercises, long-term incentive plans and restricted stock awards.

Nonvested restricted stock awards as of December 31, 2006 and changes during 2006 were as follows:

	Share Units	Weighted-Average Grant Date Fair Value
Nonvested at January 1, 2006	58,689	$29.01
Granted	12,777	$42.27
Vested	13,689	$39.45
Forfeited		
Nonvested at December 31, 2006	57,777	$29.46

Under the company s long-term incentive program, dollar-based target awards were determined by the organization and compensation committee of the board of directors in December 2002, December 2003, February 2005 and December 2005 for the three-year performance periods of 2003-2005, 2004-2006, 2005-2007 and 2006-2008, respectively. The company recognized compensation expense of $4.9 million, $8.0 million and $5.1 million in 2006, 2005 and 2004, respectively, related to the cash portion of these awards that are not share-based. In addition, a portion of each of the awards was converted into a number of share units based on the price of the company common stock on the date of the award. There are no voting or dividend rights associated with the share units until the end of the performance period and a distribution of shares from the 2005 Plan, if any, is made. The target awards correspond to pre-determined three-year earnings before interest, taxes, depreciation and amortization (EBITDA) and/or earnings per share growth rate targets. In accordance with SFAS No. 123R, compensation expense for these performance awards, except for the 2004-2006 award, was calculated based on the grant-date fair value. The terms of the 2004-2006 award states that payment will be in cash and as such liability accounting was used for this award and compensation expense was calculated based on the year-end share closing price on December 31, 2006. In 2006, the award for the 2003-2005 performance period was paid. The company allocated 338 share units during 2006 for those participants who elected to defer their shares. As of December 31, 2006, 19,318 share units were outstanding.

Prior to the adoption of SFAS No. 123R, compensation expense for these awards was based on variable accounting and was calculated using the closing stock price at period end. The other portion of the 2002, 2003, February 2005 and December 2005 award grants is a cash award, which also is determined for the same three-year performance periods.

The following table identifies the number of shares expected to be issued based on current performance measures and the stock price on the date of grant for the performance shares granted:

Award		Expected Number of Units to be Issued	Average Stock Price on Date of Grant
2004	2006 (a)	178,541	$ 30.65
2005	2007	216,388	$ 39.44
2006	2008	154,060	$ 43.07

(a) On February 19, 2007, the organization and compensation committee of the board of directors approved the issuance of 178,541 share units in lieu of a cash distribution.

Performance-based stock awards as of December 31, 2006 and changes during 2006 were as follows:

	Share Units	Weighted-Average Grant Date Fair Value
Nonvested at January 1, 2006	330,460	$41.13
Granted		
Performance increase	39,988	$39.44
Vested		
Forfeited		
Nonvested at December 31, 2006	370,448	$40.95

The following table reflects the total stock-based compensation expense and the related tax benefit recognized in the consolidated statements of income for 2006, 2005 and 2004:

	2006	2005	2004
Restricted share units:			
Long-term incentive program	$ 9.5	$ 7.8	$ 2.6
Other plans	3.3	2.3	1.1
Stock options	3.5		
Total	$ 16.3	$ 10.1	$ 3.7
Tax benefit	$ 6.1	$ 3.8	$ 1.4

The following table summarizes information about stock options outstanding, excluding the performance share stock awards, restricted share stock awards and long-term incentive plan awards at December 31, 2006:

		Options Outstanding			Options Exercisable	
Range of Exercise Prices		Number Outstanding at 12/31/06	Weighted-Average Remaining Contractual Life	Weighted-Average Exercise Price	Number Exercisable at 12/31/06	Weighted-Average Exercise Price
$19	$25	86,612	2.1 years	$21.36	86,612	$21.36
$25	$31	1,929,878	4.9 years	$29.89	1,820,876	$29.87
$31	$38	708,839	4.5 years	$34.51	707,839	$34.51
$38	$45	614,000	8.6 years	$41.18	307,000	$41.18
		3,339,329	5.4 years	$32.72	2,922,327	$31.93

Note 17 RESTRUCTURING AND IMPAIRMENT CHARGES

In 2006, the company recorded aggregate restructuring and impairment charges of $51.9 million. These charges primarily related to the write-down of a trade name in the Lubrizol Advanced Materials segment and the phase-out of a manufacturing facility in the Lubrizol Additives segment.

The following table shows the reconciliation of the restructuring liability beginning January 1, 2004 by major restructuring activity:

	Liability January 1, 2006	Restructuring and Impairment Charges	Cash Paid	Non-cash Adjustments	Liability December 31, 2006
Noveon trade name impairment	$	$ 41.2	$	$ (41.2)	$
Bromborough, U.K. plant closure	2.3	6.7	(8.2)	0.2	1.0
Lubrizol Advanced Materials facility and line closures and workforce reductions	2.5	4.1	(2.5)	(3.4)	0.7
Corporate / other workforce reductions	0.3	(0.1)			0.2
Noveon International restructuring liabilities assumed	1.3		(0.4)		0.9
	$ 6.4	$ 51.9	$ (11.1)	$ (44.4)	$ 2.8

	Liability January 1, 2005	Restructuring and Impairment Charges	Cash Paid	Non-cash Adjustments	Liability December 31, 2005
Bromborough, U.K. plant closure	$	$ 6.1	$ (3.1)	$ (0.7)	$ 2.3
Lubrizol Advanced Materials facility closures and workforce reductions		9.0	(2.3)	(4.2)	2.5
Corporate / other workforce reductions	2.7	0.7	(3.1)		0.3
Noveon International restructuring liabilities assumed	6.1	0.1	(5.0)	0.1	1.3
	$ 8.8	$ 15.9	$ (13.5)	$ (4.8)	$ 6.4

	Liability January 1, 2004	Restructuring and Impairment Charges	Cash Paid	Non-cash Adjustments	Liability December 31, 2004
Bromborough, U.K. plant closure	$	$ 17.0	$	$ (17.0)	$
Bromborough, U.K. workforce reductions	0.2		(0.2)		
Corporate / other workforce reductions	12.2	11.1	(20.6)		2.7
Pension settlement		7.7		(7.7)	
Noveon International restructuring liabilities assumed		0.2	(1.1)	7.0	6.1
PuriNOx asset impairment		2.1		(2.1)	
	$ 12.4	$ 38.1	$ (21.9)	$ (19.8)	$ 8.8

As part of its corporate goal to enhance its one company identity and to reflect more accurately its positioning in the marketplace, the company completed a corporate identity review in the fourth quarter of 2006. Senior management of the company made a final determination in January 2007 that the trade name Noveon no longer would be used to describe the Lubrizol Advanced Materials segment of the company and that its use would be discontinued except in connection with the Noveon consumer specialties product line. The company acquired the rights to the Noveon trade name in June 2004 when it acquired Noveon International. At the time of acquisition, an appraised value was attached to the Noveon trade name. The company calculated a pretax charge of $41.2 million ($25.4 million after-tax) to reduce the related asset to its estimated fair value. This charge was reflected in the fourth quarter of 2006 as the company believed at that time it would more likely than not discontinue the use of the Noveon trade name, except in the limited context of its Noveon consumer specialties product line.

In September 2006, the company entered into an agreement to sell the manufacturing facility located in Bromborough, United Kingdom. The sale closed in January 2007. In connection with the sale, the company received net cash proceeds of

$5.9 million and recorded a pretax gain of $2.9 million during the first quarter of 2007. The gain will be classified as a restructuring credit associated with closure of the facility. At December 31, 2006, the Bromborough site was classified as an asset held for sale but was not disclosed separately on the balance sheet because the amount was not material to the company s consolidated financial position. In December 2004, management decided to close this facility, which triggered an impairment charge of $17.0 million that was recorded in December 2004 to reflect long-lived assets at their estimated fair values. The estimated fair value of the long-lived assets was determined using a discounted cash flow model. The company announced its decision to close the facility in January 2005. Production phase-out of this site began in the third quarter of 2005 and was completed in 2006. During this phase-out, production was transferred to higher-capacity facilities in France and the United States. There were 70 employees impacted by this closure.

In 2005, management made the decision and the announcement to close two Lubrizol Advanced Materials performance coatings production facilities located in the United States. The aggregate restructuring charges recorded for these closures were $8.0 million, of which $1.4 million was recorded in 2006. Total charges were comprised of $4.8 million in asset impairments, $1.1 million in exit costs and $2.1 million in severance costs. The impairment charges for both facilities were recorded to reduce the related assets to their estimated fair values, which were determined primarily from third-party appraisals. Production from these sites was transferred to other facilities in the United States. One facility, located in Mountaintop, Pennsylvania, was closed in October 2005 and sold in January 2006. The other facility, located in Linden, New Jersey, was closed in the third quarter of 2006. These closures resulted in a workforce reduction of 62 employees. Additional asset impairment charges of $2.7 million were recorded in 2006, which primarily related to the planned closure of a performance coatings production line in the first quarter of 2007. In May 2005, the company announced the reorganization of the Lubrizol Advanced Materials performance coatings product line. This product line includes businesses acquired from Noveon International as well as businesses included in the company s legacy operations. In connection with the reorganization, management eliminated 26 positions in North America and Europe. These reductions were completed during 2005 and resulted in a severance-related charge of $1.9 million for the year ended December 31, 2005.

In 2004, the company eliminated more than 100 positions, primarily affecting technical and commercial employees located at the Wickliffe, Ohio headquarters. Most of these workforce reductions were related to the restructuring following the acquisition of Noveon International. These reductions were completed by December 31, 2004. In the second quarter of 2005, the company began a process of identifying further opportunities to increase efficiency and productivity, reduce costs and support the company s integration strategy of the Noveon International acquisition. As a result, the company reduced headcount in the general and administrative area of its Ohio headquarters. Through these restructuring efforts, the company eliminated seven positions resulting in a severance-related charge of $0.7 million for the year ended December 31, 2005. All of the affected employees had left their positions by June 30, 2005 and the remaining personnel-related costs were paid in 2006.

In 2004, asset impairments and non-cash adjustments include $7.2 million in restructuring liabilities assumed related to the legacy operations of Noveon International, $7.7 million of pension settlement charges included in the accrued pension liability account and the PuriNOx asset impairment charge of $2.1 million.

The charges for these cost reduction initiatives and impairments are reported as a separate line item in the consolidated statements of income entitled Restructuring and impairment charges and are included in the Total cost and expenses subtotal on the consolidated statements of income.

Note 18 CONTINGENCIES

The company has numerous purchase commitments for materials, supplies and energy in the ordinary course of business. The company also has numerous sales commitments for product supply contracts in the ordinary course of business.

General

There are pending or threatened claims, lawsuits and administrative proceedings against the company or its subsidiaries, all arising from the ordinary course of business with respect to commercial, product liability and environmental matters, which seek remedies or damages. The company believes that any liability that finally may be determined with respect to commercial and product liability claims should not have a material adverse effect on the company s consolidated financial position, results of operations or cash flows. From time to time, the company is also involved in legal proceedings as a

plaintiff involving contract, patent protection, environmental and other matters. Gain contingencies, if any, are recognized when they are realized.

Environmental

The company s environmental engineers and consultants review and monitor environmental issues at operating facilities and, where appropriate, the company initiates corrective and/or preventive environmental projects to ensure environmental compliance and safe and lawful activities at its current operations. The company also conducts compliance and management systems audits.

The company and its subsidiaries are generators of both hazardous and non-hazardous wastes, the treatment, storage, transportation and disposal of which are regulated by various laws and governmental regulations. These laws and regulations generally impose liability for costs to investigate and remediate contamination without regard to fault and, under certain circumstances, liability may be joint and several resulting in one party being held responsible for the entire obligation. Liability also may include damages to natural resources. Although the company believes past operations were in substantial compliance with the then-applicable regulations, either the company or the predecessor of Noveon International, the Performance Materials Segment of Goodrich Corporation (Goodrich), has been designated under a country s laws and/or regulations as a potentially responsible party (PRP) in connection with several sites including both third party sites and/or current operating facilities.

The company participates in the remediation process for onsite and third party waste management sites at which the company has been identified as a PRP. This process includes investigation, remedial action selection and implementation, as well as discussions and negotiations with other parties, which primarily include PRPs, past owners and operators and governmental agencies. The estimates of environmental liabilities are based on the results of this process. Inherent uncertainties exist in these estimates primarily due to unknown conditions, changing governmental regulations and legal standards regarding liability, remediation standards and evolving technologies for managing investigations and remediations. The company revises its estimates accordingly as events in this process occur and additional information is obtained.

The company s environmental reserves, measured on an undiscounted basis, totaled $14.2 million at December 31, 2006 and $23.2 million at December 31, 2005. Of these amounts, $4.5 million and $3.4 million were included in accrued expenses and other current liabilities at December 31, 2006 and 2005, respectively. Goodrich provided Noveon International with an indemnity for various environmental liabilities. The company estimates Goodrich s share of such currently identified liabilities under the indemnity, which extends through February 2011, to be approximately $3.5 million of which $0.5 million of the recovery is included in receivables and $3.0 million is included in other assets. There are specific environmental contingencies for company-owned sites for which third parties such as past owners and/or operators are the named PRPs and also for which the company is indemnified by Goodrich. Goodrich currently is indemnifying Noveon International for several environmental remediation projects. Goodrich s share of all of these liabilities may increase to the extent such third parties fail to honor their obligations through February 2011.

The company believes that its environmental accruals are adequate based on currently available information. The company believes that it is reasonably possible that $19.8 million in additional costs may be incurred at certain locations beyond the amounts accrued as a result of new information, newly discovered conditions, changes in remediation standards or technologies or a change in the law. Additionally, as the indemnification from Goodrich extends through February 2011, changes in assumptions regarding when costs will be incurred may result in additional expenses to the company. Additional costs in excess of $19.8 million cannot currently be estimated.

GUARANTEES

On May 1, 2006, the company sold the FIIS business to SPM Group Holdings, LLC, now known as Emerald Performance Materials, LLC (Emerald). As a result of the sale, Emerald became responsible for contracts relating to FIIS, including a Toluene Sale and Purchase Agreement between SK Corporation (SK) and the company dated December 6, 2005 (the Toluene Agreement). Although Emerald has assumed the obligations under the Toluene Agreement, the company has guaranteed to SK the timely performance of Emerald s payment obligations under the Toluene Agreement for purchases thereunder. The term of the Toluene Agreement extends to January 31, 2008.

If Emerald does not satisfy its obligations under the Toluene Agreement, SK shall notify the company and use commercially reasonable efforts to collect what is due from Emerald. If SK is unable to collect from Emerald, then SK may make a demand on the company for payment of the outstanding obligations. The guarantee is revocable by the company upon 60 days prior written notice.

Because of the guarantee s existing revocation clause, the company estimates that the maximum liability under the guarantee would be approximately $15.2 million, representing the estimated liability for two shipments to Emerald. However, the company believes that it is highly unlikely that an event would occur requiring the company to pay any monies pursuant to the guarantee. Accordingly, no liability has been reflected in the accompanying consolidated balance sheet at December 31, 2006.

INDEMNIFICATIONS

In connection with the sale of the FIIS business, the company has provided indemnifications to Emerald with respect to the business sold. These indemnifications have been associated with the price and quantity of raw material purchases, permit costs, costs incurred due to the inability to obtain permits and environmental matters. In each of these circumstances, payment by the company is dependent on Emerald filing a claim. In addition, the company s obligations under these agreements may be limited in terms of time and/or amount. It is not possible to predict the maximum potential amount of future payments under certain of these agreements due to the conditional nature of the company s obligations and the unique facts and circumstances involved in each particular agreement. The company believes that if it were to incur a loss in any of these matters, such loss would not have a material effect on the company s business, financial condition or results of operations. For those indemnification agreements where a payment by the company is probable and estimable, a liability has been recorded as of December 31, 2006.

Note 19 QUARTERLY FINANCIAL DATA (UNAUDITED)
The following table sets forth the quarterly results of operations for the years ended December 31, 2006 and 2005:

			2006		
	First (1)	Second (1)	Third (1)	Fourth (1)	Full Year
Net sales	$ 984.1	$ 1,041.1	$ 1,031.0	$ 984.6	$ 4,040.8
Gross profit	$ 245.0	$ 265.4	$ 248.1	$ 236.0	$ 994.5
Income from continuing operations	$ 45.8	$ 63.5	$ 50.8	$ 21.7	$ 181.8
Discontinued operations	(60.7)	(12.4)	(0.5)	(2.6)	(76.2)

			2005		
	First (2)	Second (2)	Third (2)	Fourth (2)	Full Year
Net sales	$ 848.8	$ 942.3	$ 899.5	$ 931.6	$ 3,622.2
Gross profit	$ 229.8	$ 246.7	$ 229.7	$ 216.0	$ 922.2
Income from continuing operations	$ 40.1	$ 50.2	$ 42.7	$ 28.5	$ 161.5
Discontinued operations	8.4	9.9	5.9	3.6	27.8
Net income	$ 48.5	$ 60.1	$ 48.6	$ 32.1	$ 189.3
Per common share basic:					
Continuing operations	$ 0.59	$ 0.74	$ 0.63	$ 0.42	$ 2.38
Discontinued operations	0.13	0.14	0.08	0.05	0.41
Net income	$ 0.72	$ 0.88	$ 0.71	$ 0.47	$ 2.79
Per common share diluted:					
Continuing operations	$ 0.59	$ 0.73	$ 0.62	$ 0.41	$ 2.35
Discontinued operations	0.12	0.14	0.08	0.05	0.40
Net income	$ 0.71	$ 0.87	$ 0.70	$ 0.46	$ 2.75

(1) The company recorded restructuring and impairment charges of $1.8 million, $1.8 million, $2.7 million and $45.6 million in the first, second, third and fourth quarters of 2006, respectively.

(2)

The company recorded restructuring and impairment charges of $6.1 million, $5.4 million, $1.1 million and $3.3 million in the first, second, third and fourth quarters of 2005, respectively.

The sum of the quarterly earnings per-share amounts does not equal the annual amount reported since per-share amounts are computed independently for each quarter and for the full year based upon respective weighted-average common shares outstanding and other dilutive shares.

CONSENT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We consent to the incorporation by reference in Registration Statement Nos. 33-61091, 33-42211, 333-42338 and 333-124763 on Form S-8 and 333-115662 on Form S-3 of The Lubrizol Corporation of our reports dated February 28, 2007, relating to the financial statements and financial statement schedule of The Lubrizol Corporation (which report relating to the consolidated financial statements expresses an unqualified opinion and includes an explanatory paragraph regarding the Company s adoption of new accounting standards in 2006) and management s report on the effectiveness of internal control over financial reporting, appearing in and incorporated by reference in this Annual Report on Form 10-K of The Lubrizol Corporation for the year ended December 31, 2006.

Exhibit 31.1

THE LUBRIZOL CORPORATION
Rule 13a-14(a) Certification

I, James L. Hambrick, certify that:

1. I have reviewed this annual report on Form 10-K of The Lubrizol Corporation;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the consolidated financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and we have:

(a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) evaluated the effectiveness of the registrant s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based upon such evaluation; and

(d) disclosed in this report any change in registrant s internal control over financial reporting that occurred during registrant s most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant s internal control over financial reporting; and

5. The registrant s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant s auditors and the audit committee of the registrant s board of directors (or persons performing the equivalent functions):

(a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant s ability to record, process, summarize and report financial information; and

(b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant s internal control over financial reporting.
